WASHROOMS THAT WORK

Washroom Brochure

For more information on our HiZone full height cubicles see pages 14–15.

We believe well designed washrooms should be available to everyone.

Bushboard have been developing cubicle and washroom systems for over 80 years and our reputation has been built on delivering quality products at affordable prices.

We do this by combining innovative design with quality materials and fittings to deliver great style and great value. This straightforward approach means our tried and trusted ranges are specified time and time again.

Over 35,000 projects successfully completed nationwide:

15,500
Education projects

12,500
Commercial projects

5,000
Healthcare projects

2,500
Leisure projects

Exceptional products at exceptional prices.

Through our experience, we have perfected the art of delivering cost-effective washrooms without compromising on quality.

Attention to detail, in-built functionality, and the latest technology mean that we can deliver excellent value for money, every time.

It's simple. We work hard to develop great products at great prices so your washroom will work really hard for you.

Cost-effective, single order solutions.

Bushboard's Ready Plumbed Modules arrive on site with sanitaryware and brassware pre-fitted to panels which are pre-assembled to a rigid steel frame.

Bushboard work in partnership with SanCeram and a number of leading sanitaryware and brassware brands, meaning ordering your washroom from a single supplier has never been easier.

For your cost-effective, one order, one delivery option see page 37.

Bushboard's Ready Plumbed Modules save both time and money, offering a one supplier, one delivery option. For more information see page 39.

Service and support.

From initial planning through to installation, we work hard to make sure choosing the right washroom at the right price is as easy as possible.

Specification
From presenting CPDs to writing National Building Specifications (NBS) and assisting contractors, our UK-wide Specification Manager is always on hand to help.

All Bushboard products are available as BIM models, downloadable from the website www.bushboard-washrooms.co.uk

Estimating
Our quotations are designed to give you a clear and concise breakdown of products and costs.

CAD
You will be assigned a dedicated CAD technician who can draft drawings for approval prior to manufacture.

Delivery
All delivery costs are included within our price.*

Installation
Our UK-wide network of Preferred Installers are completely familiar with our washroom ranges and offer an exceptional service.

After Sales
Your dedicated contact in our friendly and efficient after sales team will guide you from order to delivery and beyond.

Guarantees
All of our manufactured products come with a 5 year guarantee.

* UK mainland only.

Choosing your washroom couldn’t be simpler.

Whether you are driven by budget or design, our simple 3 step process will ensure that your washroom is perfectly suited to your individual requirements.

1 Choose your cubicle system, see pages 5 – 33
Our range of 14 cubicles are designed to deliver the perfect balance of quality and value by combining the very best in design with tried and trusted materials. See pages 24 – 33 for our range of education cubicles, specifically designed for children from nursery to university.

2 Choose your ducting, including sanitaryware and brassware, see pages 34 – 59
Our Ready Plumbed Modules (RPM) arrive on site with sanitaryware and brassware pre-fitted to panels and panels pre-assembled to a rigid aluminium frame. RPM is the best option for fast and cost-effective installation, or for increased flexibility you can supply and fit your own sanitaryware with our Ezeeduct or Panel Only options.

3 Choose your vanity system, including counter top, semi-recessed, cantilever or solid surface, see pages 61 – 68
We offer a number of smart, practical and hardwearing vanities to suit your needs. Our pre-plumbed vanities arrive on site with basins and taps, pre-fitted for quick and easy installation. Alternatively supply and fit your own sanitaryware with our Ezeevanity and Panel Only options.

For more information on **Definition**™ **ColourCoat**™ see pages 16 – 17.

CHOOSE YOUR CUBICLE SYSTEM

Bushboard cubicles are designed to deliver quality, durability and excellent value for money, down to the smallest detail.

Not only are our ranges exceptionally designed, they are also exceptionally easy to install and the final finish is always first class.

BASELINE™

Delivering our trademark quality and design at very affordable prices, Baseline comes in Bushboard's full 34 laminate colour options.

Baseline is finished with a sturdy satin anodised aluminium pedestal foot and headrail, ensuring it is robust enough to withstand the busiest of washroom environments.

Education washrooms, from nursery to university.

Bushboard Washrooms has developed a leading reputation as a supplier of school washrooms. Our education range aims to create an accessible but safe environment for children.

Using Department for Education guidelines we have carefully designed our ranges to suit the user age group.

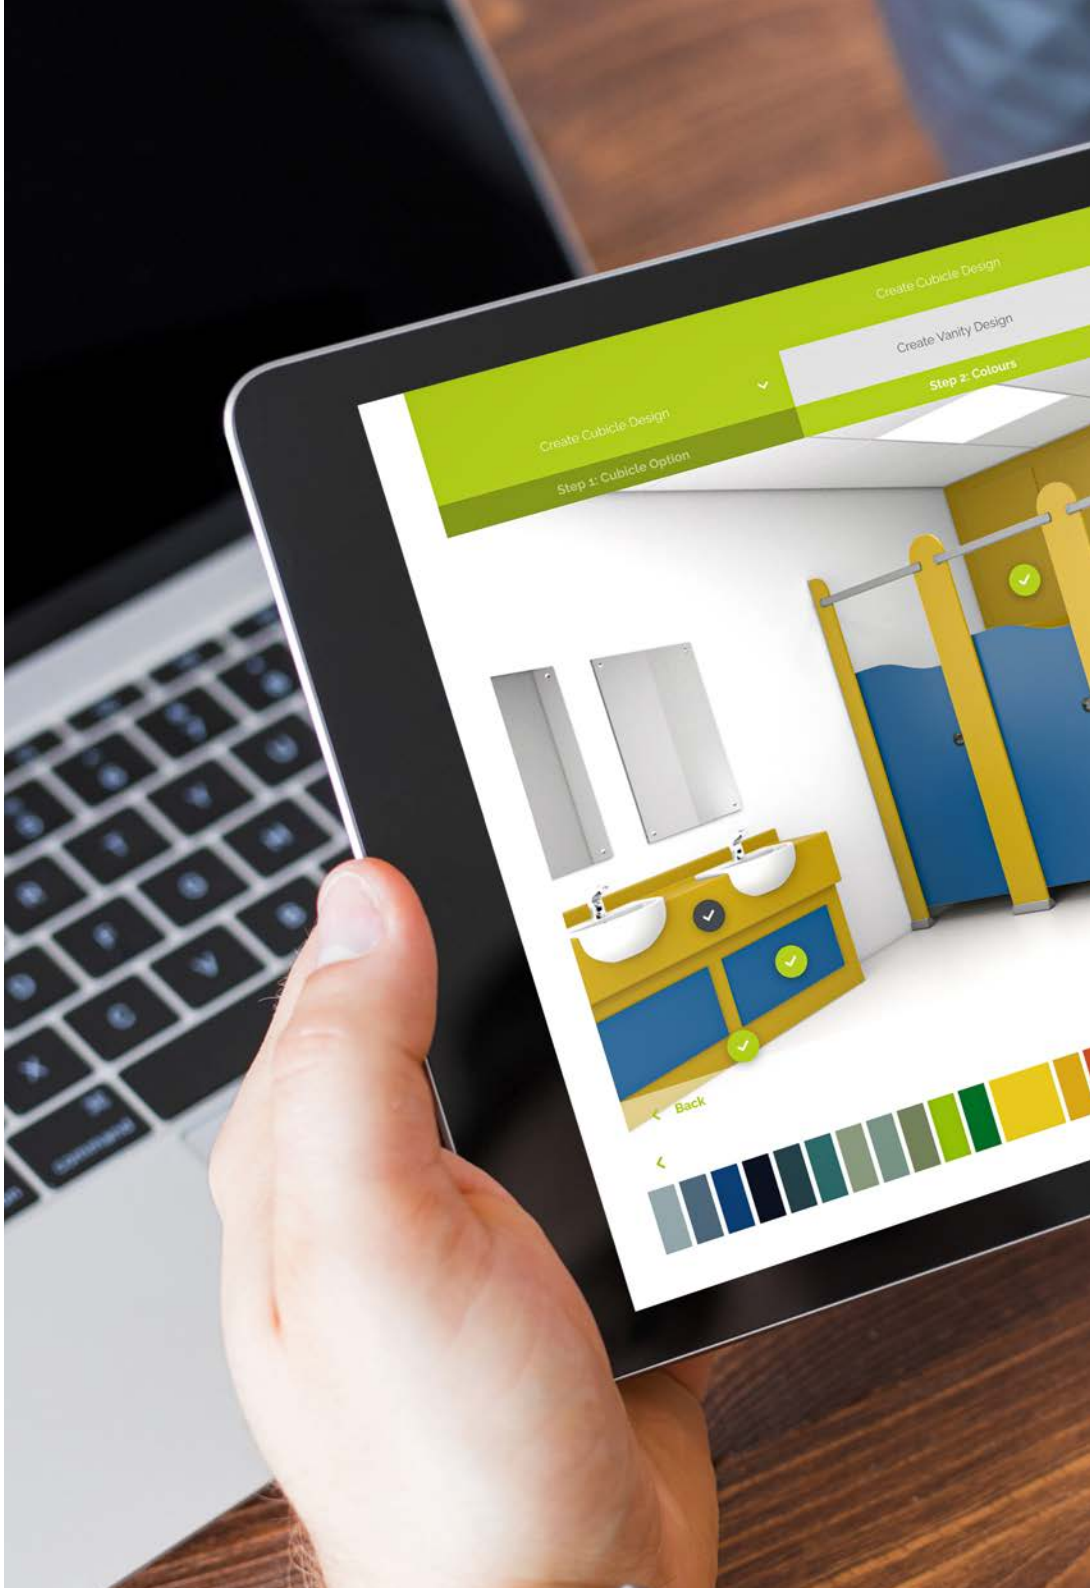
For early years and Key Stage 1 & 2 we offer lower height, shaped doors for easy supervision and safety features like anti-finger trap hinges.

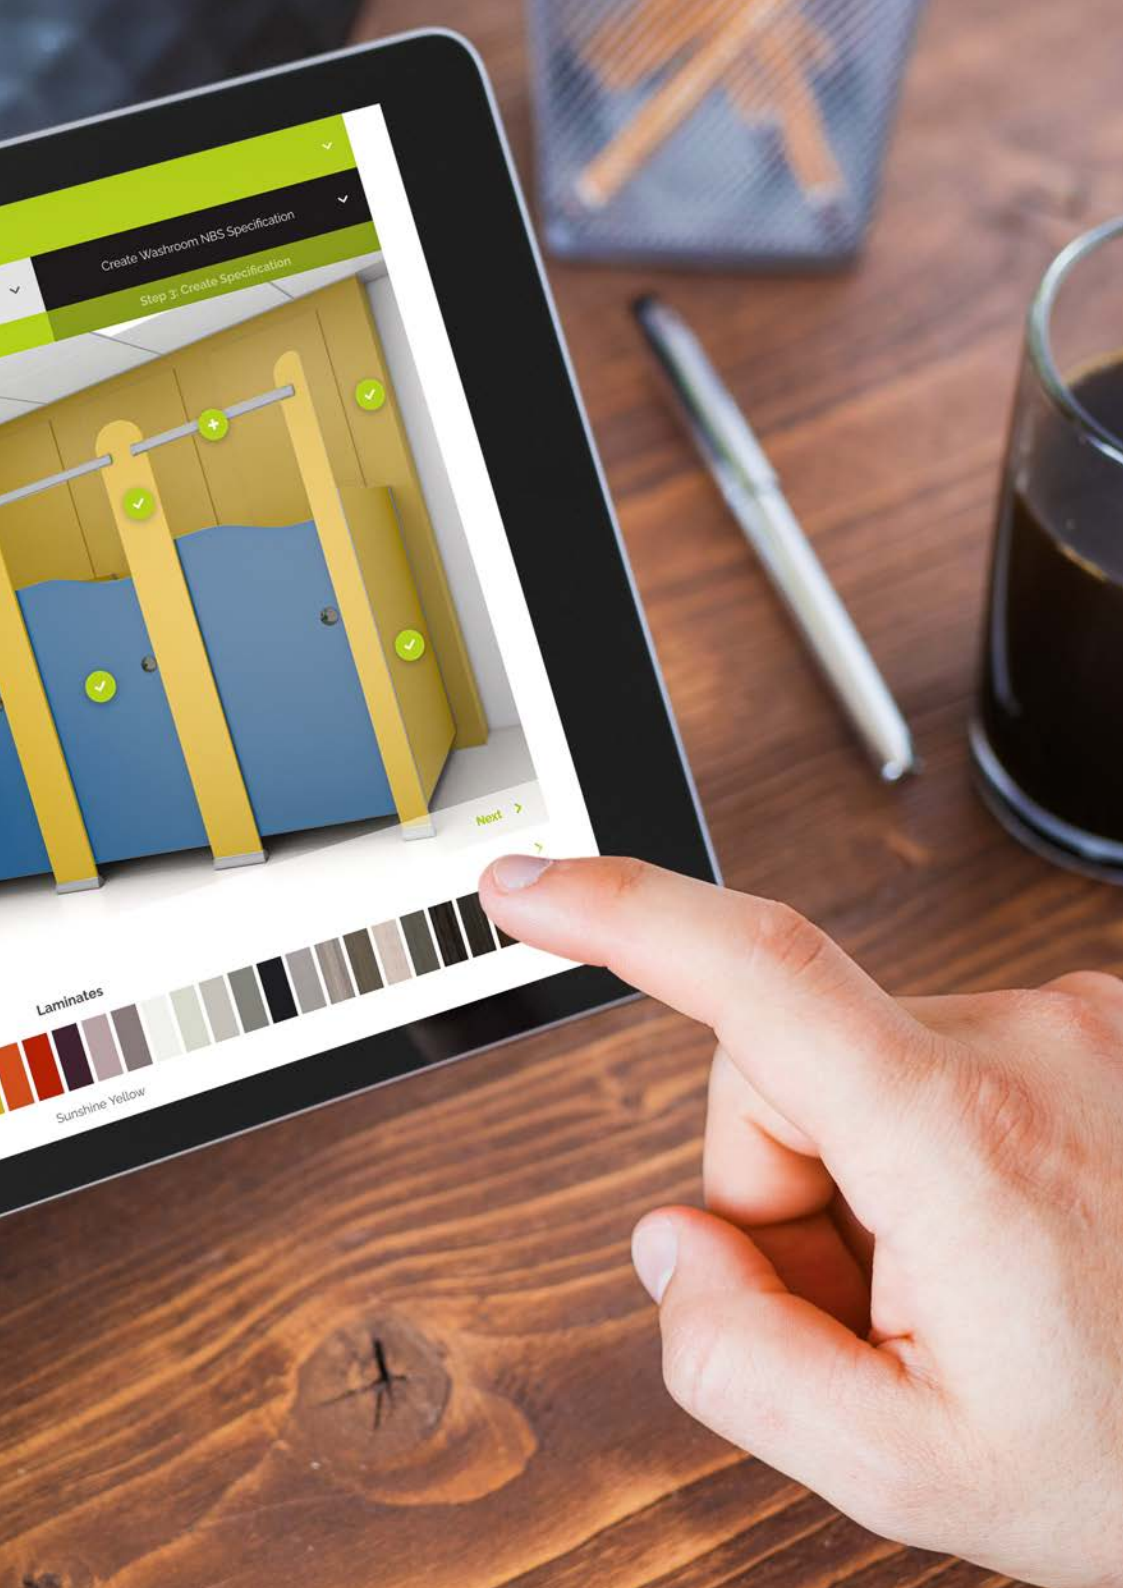
For Secondary Schools and above our ranges focus on students privacy and deterring anti-social behaviour, particularly the use of mobile phones, with a 5mm minimum clearance around doors and partitions to the floor.

Over 15,000

education establishments nationwide have trusted us with their washrooms, including:

- Nurseries & Pre-Schools
- Primary Schools
- Secondary Schools
- Colleges
- Universities





With stunning colour options and shaped pilasters and doors, designing washrooms has never been so fun!

Experiment with colour! Our online Design Tool makes choosing your own unique washroom as easy as 1, 2, 3!

1. Start by visiting www.bushboard-washrooms.co.uk and select the Design Tool option.

2. Add your favourite colours at the touch of a button.

3. Once you are happy with your chosen colour scheme, save, share and print your design.

Next Day Laminate Sample Service

Delivered in as little as 24 hours you can order online by visiting www.bushboard-washrooms.co.uk or call 01536 533 620.

TINY STUFF™

Designed specifically for Early Years Tiny Stuff is a fun, safe and DfE compliant cubicle secured with sturdy floor and wall channels for stability.

Tiny Stuff features floor-mounted pilasters and sturdy wall fixings to ensure robustness, anti-finger-trap hinges for added safety and low height doors with no headrail for easy supervision. Tiny Stuff has shaped doors and pilasters which are so much fun!

HIZONE™ FOR SCHOOLS

We developed HiZone for Schools in response to Department for Education regulations. The requirements for added privacy are at the forefront of this toilet cubicle suitable for Primary and Secondary School age groups.

These full height cubicles are finished at ground level with satin anodised privacy skirting and a 5mm door clearance. Featuring a privacy strip to limit the gap between the door and the hinge to 5mm to discourage anti-social behaviour such as use of mobile phone cameras. HiZone is designed to allow the door to be lifted off in emergencies.

Building Regulations

All Bushboard cubicles can be delivered to comply with Building Regulations Approved Document T, Approved Document M and the Equality Act 2010*. We can help you with planning your washroom and the issues you need to consider.

Enlarged

Where four or more cubicles are provided in a washroom one of these must be enlarged. Enlarged cubicles are there to assist the ambulant disabled, people with babies or small children and/or people with bags.

Standard

A standard WC compartment must have a minimum 465mm diameter manoeuvring space within the cubicle. This is to be maintained between the swing of the door, the WC pan and the side wall of the compartment.

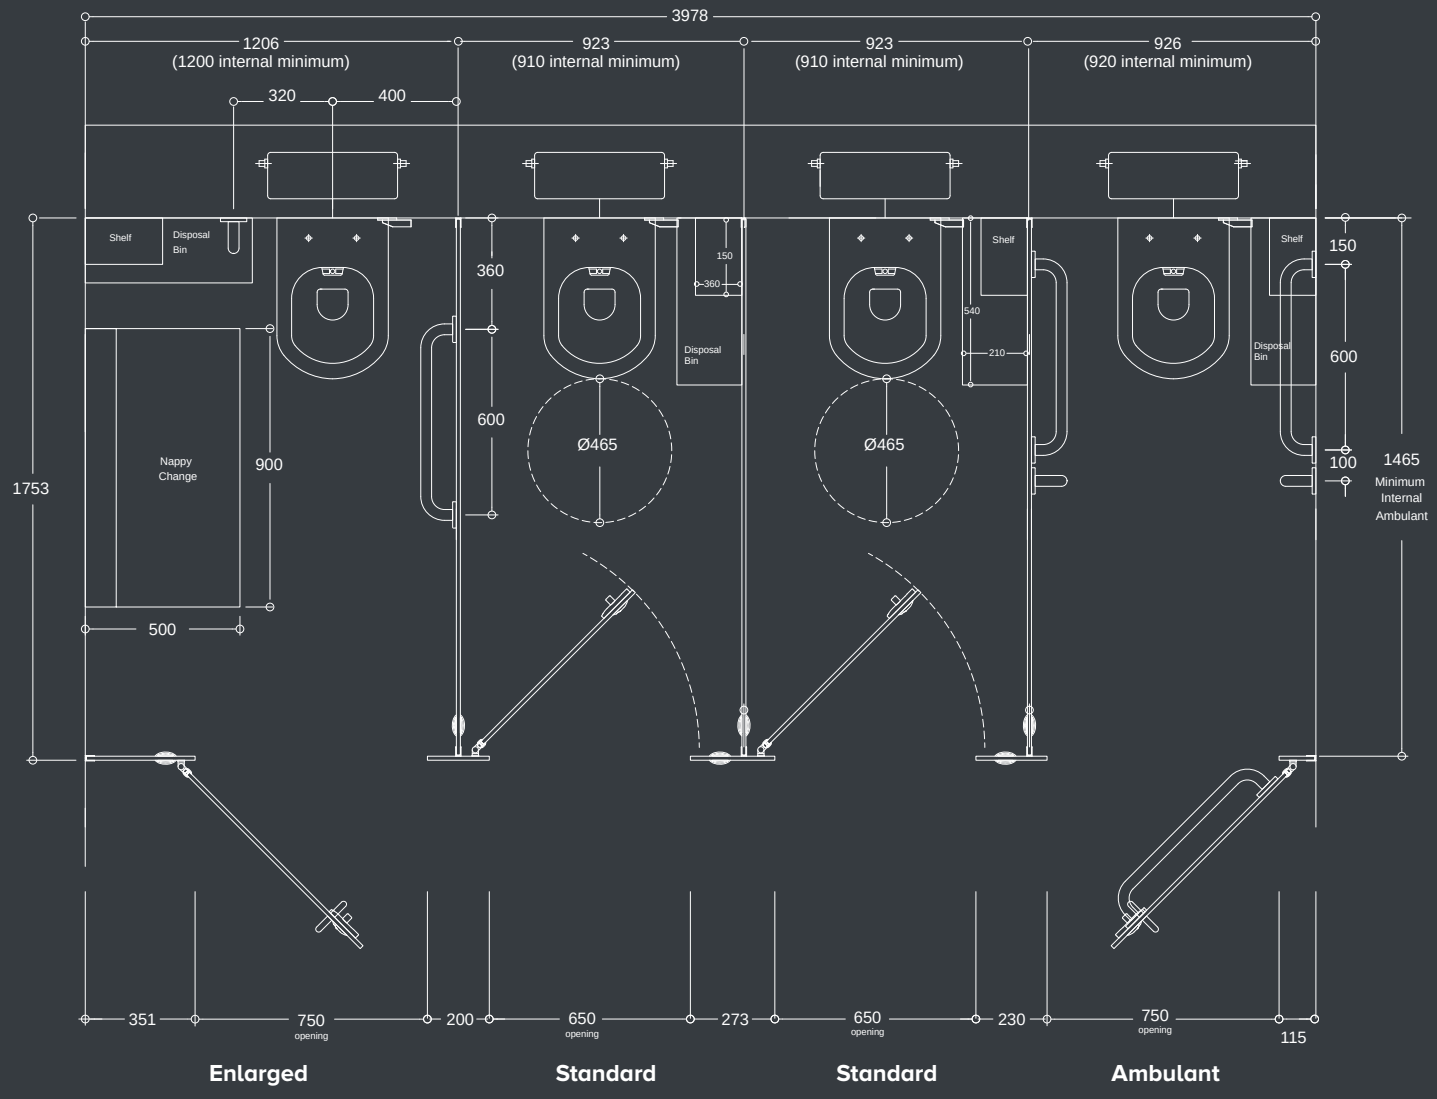
Ambulant Disabled

Every same-sex washroom must have at least one WC compartment (cubicle) that is suitable for the ambulant disabled. If there is only one cubicle in the washroom then this must be suitable for an ambulant disabled person.

In addition the ambulant cubicle must provide the correct grab rails and inner pull handles – for more information see our accessories range (page 86).

Light Reflectance Values

Consideration should also be given to colour contrast to aid partially sighted people. To help you when choosing your colour scheme our colours are graded with an LRV value.



Typical layout requirements for new buildings to meet Building Regulations.

* It is the responsibility of the customer to work towards your obligation to the Equality Act 2010 and to comply with the latest Building Regulations Approved Document T and Approved Document M. We recommend you contact your Local Authority Access Control Officer.

CHOOSE YOUR DUCTING SYSTEM

Our ducting and access panel systems can be delivered in three ways.

Whether you choose our Ready Plumbed Modules, Ezeeduct, or Panel Only, we can deliver a flexible, cost-effective solution to suit your needs.

Bushboard Ready Plumbed Modules

First designed over 20 years ago we wanted our RPM system to be the best pre-plumbed system on the market and today over 100,000 units are in use across the UK.

Changing the way washrooms are installed, pre-plumbed systems make duct fitting faster and easier. Delivered ready to install, each module combines a carefully selected range of sanitaryware and brassware fitted to panels and pre-assembled onto a rigid steel frame so on-site labour is kept to a minimum and the finished look is always first class.

Our RPM systems change the way washrooms are installed

The benefits of choosing Bushboard Ready Plumbed Modules

Guaranteed quality: a factory engineered solution that uses standardised processes and the latest manufacturing technology to deliver an exceptionally high quality, durable finished product.

Improved cost control: one product delivered from one source ensuring greater predictability of cost and programming.

Utilisation of off-site skills: removes the interface between joinery and plumbing trades reducing reliance on skilled labour on-site.

Improved sustainability: reduces the impact of construction activities on-site including noise, vehicle movements and waste reduction.

Reduced accidents: transferring work off-site into our controlled production environment reduces site health and safety issues.

Reduced costs: our independent research proves RPM is up to 20% cheaper than traditional timber frame and panelling*.

Time savings on-site: delivered ready to fit, RPM is proven to be up to 75% faster to install than traditional timber frame and panelling*.

Testing off-site: units are pressure tested prior to delivery to ensure they are ready to install.

Delivery and distribution: units are delivered palletised for ease of handling and distribution on-site.

* Research carried out by QMP, an independent partnership of surveyors, architects and designers.

Optional hinged and lockable access panels
The RPM galvanised steel frame has been specifically designed to incorporate optional hinged panels to meet the increasing demand for quick and easy access to essential services for routine maintenance.

In addition, hinges make for easier manual handling and because panels are not completely removed to access pipework, any risk of damage or water ingress from potentially wet floors is eliminated.

Anti-tamper locks are ideal for areas where security is paramount.

Hinged access panel

Panel stay

Linear-bearing hinge

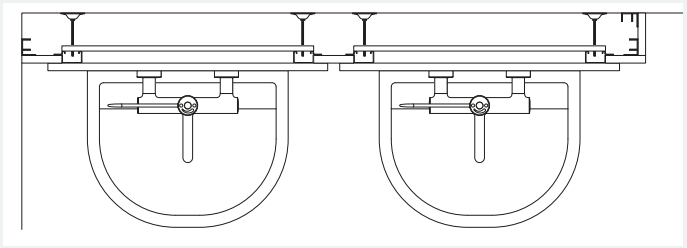
Anti-tamper lock

Please note: Hinged panels available at a minimum height of 400mm and a maximum width of 850mm. Panels above 1500mm high must have two locks.

READY PLUMBED MODULES

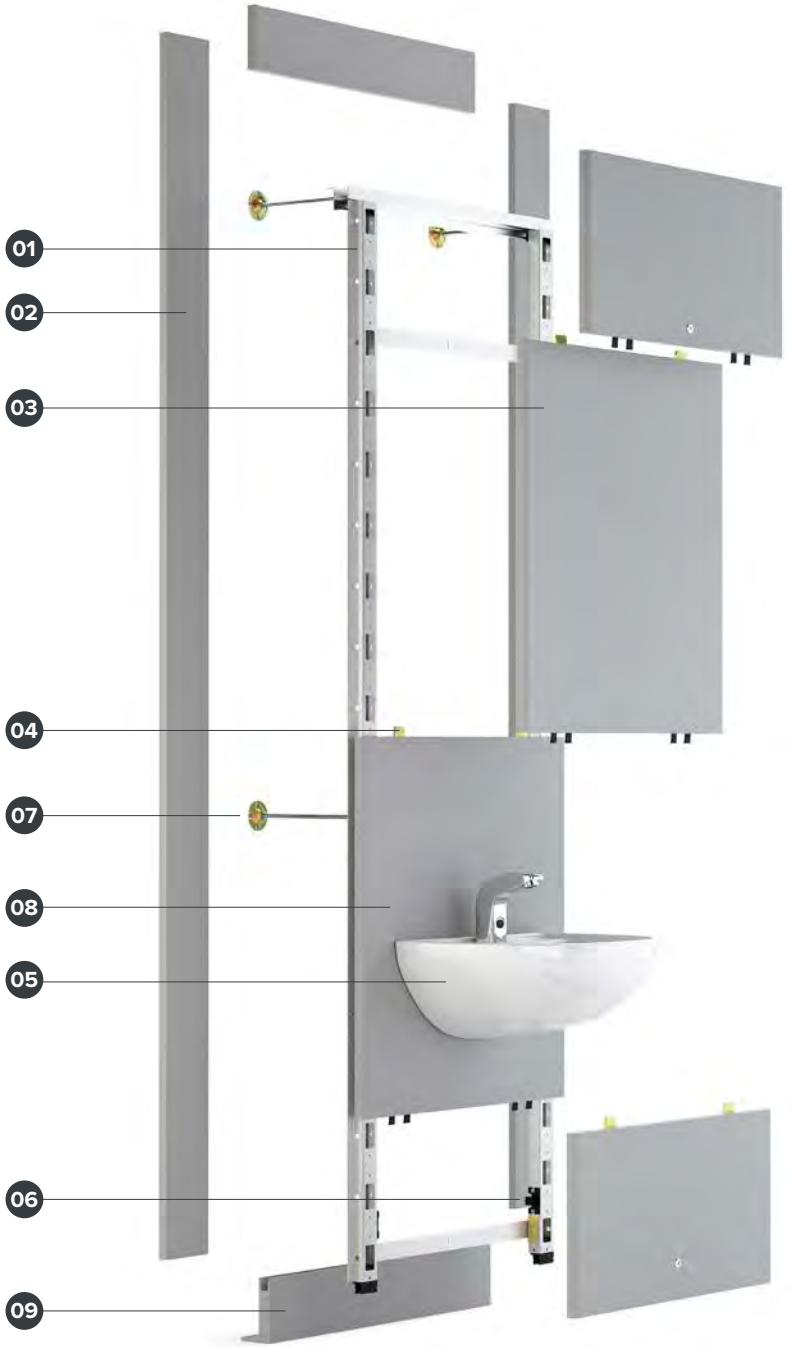
These pre-plumbed units come complete with panels, sanitaryware, brassware and plumbing all assembled onto a rigid aluminium frame ready to install.

01	**Framing**	Factory assembled rigid galvanised steel frame. Integral rail for wall hung WCs
02	**Flashgaps**	Supplied oversize for on-site adjustment
03	**Panels**	Factory fitted access panels
04	**Panel docking system**	Panels complete with docking system for improved panel alignment
05	**Plumbing**	Pre-plumbed and pressure tested where appropriate
06	**Fittings**	Push fit, lift off or hinged panel fittings
07	**Tiebacks**	Threaded rods lock frame to the building structure
08	**Sanitaryware**	A dedicated range of sanitaryware specifically chosen and tested for Bushboard RPM units
09	**Skirting**	Aluminium skirting, pre-finished in Silver or Charcoal Grey Powder Coat.



Plan of RPM wall system

View our RPM ducting and vanity videos on our website **www.bushboard-washrooms.co.uk**



Step 1:

Preparation 15 mins

- Set out position of skirting, tie brackets and wall channel
- Fix skirting to floor
- Fix brackets to wall

Skirting can be provided at an earlier stage to enable installation of floor finishes.

Step 2:

Fixing the RPM units 30 mins

- Cut and fit first flashgap
- Locate the RPM units onto skirting
- Lock tie bars onto wall mounted brackets

Step 3:

Finishing 15 mins

- Cut and fit horizontal and vertical flashgap panels
- Connect services
- Refit access panels

Save time, save money, guarantee quality with Bushboard's Ready Plumbed Modules

HEALTHCARE

Bushboard Washrooms specialise in HBN 00-10 Part C compliant healthcare units, sanitaryware and brassware for clinical environments. Hundreds of hospitals and doctor's surgeries across the country trust Bushboard with their healthcare sanitary assemblies which are constructed with hygiene and durability at the forefront of the design.

Expertise in the industry
Bushboard Washrooms has developed a leading reputation as a supplier of pre-plumbed healthcare units. Drawing on years of expertise, each project is given the attention it deserves.

Leaders in infection control
Bushboard Washrooms put infection control and durability first. Bushboard's healthcare units, sanitaryware and brassware are precision manufactured and factory assembled, conforming to stringent healthcare standards.

Bushboard healthcare sanitary assemblies are:

- HBN 00-10 Part C compliant
- Available as traditional boxed out units, flush fronted Trust System, aperture and duct wall systems
- Units arrive on site factory pressure tested and ready to install
- Available with a wide selection of HBN-compliant, WRAS approved, TMV3-approved and Doc M approved sanitaryware and brassware
- Available with sanitaryware and brassware specifically designed for mental healthcare applications

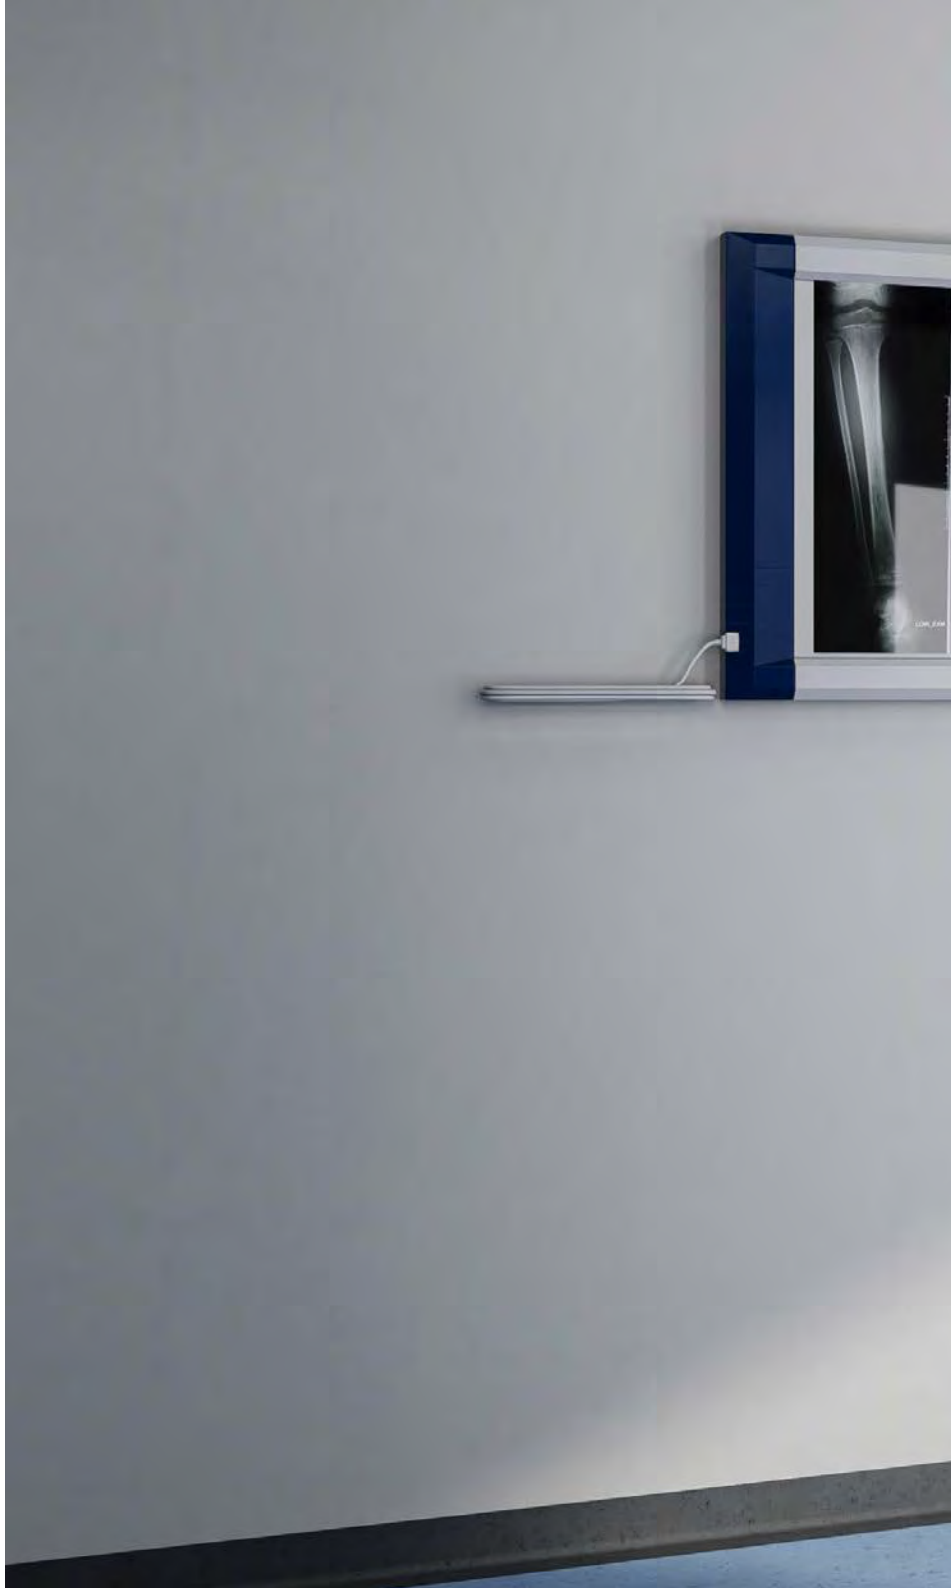
For more information on Bushboard's dedicated healthcare products visit our website **www.bushboard-washrooms.co.uk**



Our Traditional Boxed Out Unit and Trust System are available
pre-plumbed with a wide range of HBN-compliant sanitaryware and brassware.

SANITARYWARE AND BRASSWARE

No matter the industry or application, no washroom is complete without the right sanitaryware and brassware to match. With an unrivalled selection of basins, taps, urinals and WCs, Bushboard Washrooms can deliver a leading, cost-effective pre-plumbed solution.

SanCeram

Working in partnership with SanCeram and a number of leading brands, we have carefully selected our sanitaryware and brassware range with quality, durability and cost in mind.

For a more sustainable washroom, we can also help advise you on best fit products to achieve BREEAM certification. Please contact us for further details.

SOLID SURFACE

Crafted to perfection from our impeccable Solid Surface composite, Bushboard's Solid Surface range offers a flawless finish renowned for its exceptional durability.

Produced with our thermoforming process, the Solid Surface material is heated and shaped, resulting in units with minimal internal joints. This not only enhances structural integrity but also simplifies cleaning, ensuring maintenance is effortless and your space maintains its pristine appearance.

Bushboard's Solid Surface offer has a range of profiles to suit various sectors. Opt for cantilever fittings for a sleek and minimalist aesthetic, perfect for those seeking contemporary elegance. Alternatively, embrace the modern fusion of tradition with underframe and panel options.

With a wide spectrum of colours available, our Solid Surface range offers 12 standard and 10 premium finishes. From timeless classics to contemporary favourites, there's a colour to elevate any space with sophistication and style.

SUPERLOOS

Superloos have emerged as a result to the ever-growing demand for single-user washrooms, offering both enhanced privacy and convenience.

These integrated solutions combine toilet, wash basin and hand drying facilities in a unified, enclosed space, reducing the necessity for separate-gender-specific facilities and offering an alternative to open plan designs.

Superloos can be configurable within cubicles or with partition walls, and cater to diverse sectors, spaces and requirements, ensuring a private, secure and comfortable environment for users.

View our range of superloos on our website **www.bushboard-washrooms.co.uk**

SUPERLOO

The Bushboard Superloo is tailored for projects seeking a flawless finish, showcasing unprecedented style with its seamless solid surface top and integral concealed waste single-user trough*. Duct panels can be pre-plumbed with a selection of sanitaryware or installed with Ezeeduct framing for quick installation.

* Contact your local access control officer.

A step by step guide to selecting your Fast Track washroom packs.

Call our friendly sales team who will help process your order on 01536 533620.

1. Cubicle selection

- **Identify the layout of the cubicles you require from these four options and refer to the table next to it**
- **Identify the number of cubicles you require along the top row of the grid**
- **Read down the column to determine the pack and quantity you require**

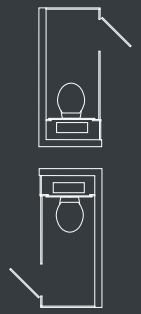
Between walls								
No. Cubicles	1	2	3	4	5	6	7	8
Door Pack	1	2	3	4	5	6	7	8
Fittings Pack	1	2	3	4	5	6	7	8
Partition Pack	0	1	2	3	4	5	6	7
Floor/Ceiling post pack	0	0	0	0	0	0	0	0
Max. Width (mm)	1060	2120	3180	4240	5300	6360	7420	8480

Against walls								
No. Cubicles	1	2	3	4	5	6	7	8
Door Pack	1	2	3	4	5	6	7	8
Fittings Pack	1	2	3	4	5	6	7	8
Partition Pack	1	2	3	4	5	6	7	8
Floor/Ceiling post pack	0	0	0	0	0	0	0	0
Max. Width (mm)	1060	2120	3180	4240	5300	6360	7420	8480

Options

- Children's door instead of standard door pack
- Door packs and in-line packs available with square edge pilaster or postformed pilaster
- Ambulant/enlarged grab rails and door opening bars are available separately

Freestanding								
No. Cubicles	1	2	3	4	5	6	7	8
Door Pack	1	2	3	4	5	6	7	8
Fittings Pack	1	2	3	4	5	6	7	8
Partition Pack	2	3	4	5	6	7	8	9
Floor/Ceiling post pack	2	2	2	2	2	2	2	2
Max. Width (mm)	1060	2120	3180	4240	5300	6360	7420	8480



Inline Cubicles	Between Walls	Against Walls
	1	1
Door Pack	1	1
Fittings Pack	1	1
Partition Pack	0	1
Inline Pack	1	1
Max. Length (mm)	2000	2000

Min. Cubicle Width 750mm.

2. Ducting selection

- **For each range of panels determine how many you want of each type**
- **Check they will fit in the space available**

Please note: Always leave a vertical gap 25mm wide between a panel and a wall. Leave a 25mm wide vertical gap between each panel. For WC panels, leave 50mm for fixing a cubicle partition. Plain panel packs P3 and P4 can be cut down and re-edged on site to cater for ranges that do not accommodate 700mm modules.

For more information on junction details visit our website www.bushboard-washrooms.co.uk
Please note for each panel you will need one flash gap pack.

3. Vanity Selection

- **Determine how many vanity basins you require in each top.**

1500mm long top	Up to 2 basins	Pack V1

- **Check that the vanity top will fit into the available space**
- **The vanity pack includes under panel, return end, flashgap and a fixing kit**
- **Supporting timber framework to be supplied by site**

LOCKERS

Protec® SGL changing room lockers are the durable and robust option when it comes to challenging environments, including leisure facilities, campsites and commercial washrooms. The strong Solid Grade Laminate (SGL) carcass is watertight and corrosion-proof.

Each individual locker has an easy to clean SGL shelf, and anti-finger trap safety hinge to doors. With Protec®, it's simple. Choose your locker style, choose your locking system and select your door colour using our Colour Selector.

You can choose any combination of the locker models to suit your installation, and they are delivered assembled and ready to install. For wet areas, we suggest an additional base.

We offer a range of lock options to suit most environments.

PERFORMANCE & DELIVERY

Melamine Faced Chipboard – MFC

Light to medium use – Dry

High performance Melamine Faced Chipboard 650kg/m^3 density, moisture resistant, suitable for dry environments with light to medium use. Panels supplied square edged with matching 1mm PVC lipping.

High Pressure Laminate – HPL

Medium use – Dry

High Pressure Laminate bonded onto 680kg/m^3 density, moisture resistant chipboard, suitable for dry environments with more intense use. Panels supplied square edged with matching 1mm PVC lipping or postformed vertical edges.

Solid Grade Laminate – SGL

Heavy use – Wet or dry

High density Solid Grade Laminate, 1400kg/m^3 impervious to water, suitable for the most demanding environments where strength and/or water resistance are needed. Polished radiused black edges as standard.

Real Wood Veneer

Light to medium use – Dry

MDF faced both sides with Real Wood Veneer, suitable for dry environments with light to medium use. Panels supplied square edged with 3mm Real Wood Veneer lipping.

ColourCoat™

Light to medium use – Dry

High performance MDF sprayed with 2 coats of liquid primer and finished with 2 coats of ColourCoat™ pigmented lacquer.

Solid Surface

Heavy use – Wet or dry

Solid surface is manufactured from an advanced composition of minerals and acrylic polymer that delivers a seamless finish to vanity tops and is exceptionally hardwearing.

MFC – Melamine Faced Chipboard

HPL – High Pressure Laminate

SGL – Solid Grade Laminate

Solid Surface

- All lipping is applied with PUR adhesive
- Real Wood Veneer, ColourCoat™, MFC and HPL are not suitable for use in wet environments

See our separate Colour Selector for our full range of panel colour options.

Vanity Units

As well as High Pressure Laminate and Solid Grade Laminate, vanity tops are also available in Solid Surface.

Delivery

Here at Bushboard, we are committed to ensuring your order is delivered on time, in full and in perfect condition. With this in mind we have invested in the latest manufacturing technology to ensure the entire process; from order to delivery; is as efficient as possible.

All of our panels are manufactured to your specific site dimensions and full CAD drawings are supplied with delivery. You also have the option to receive drawings for your approval prior to manufacture.

ENVIRONMENTAL

We understand the social and economic importance of protecting the environment and are fully committed to continually improving our environmental performance.

We regularly assess the environmental impact of our business operations and take appropriate action to minimise any adverse impacts. Some of our resulting initiatives include:

Paperless Systems – All of our quotes are emailed and our brochures are available electronically so we only print when absolutely necessary.

Zero Landfill – Here at Bushboard, we are proud of our contribution towards a greener planet. We ensure that all board waste is kept to a minimum and any waste that is produced is used as fuel for our biomass boiler, meaning zero board waste is sent to landfill.

FSC – The Real Wood Veneer used in our products is FSC® certified, meaning the wood we use is from sustainable forests.

Reducing Carbon Emissions – We have installed video conferencing facilities across all of our sites in order to minimise business travel.

ISO 14001 Certified – demonstrating a commitment to responsible environmental management, reduced environmental impact, and continuous improvement in sustainability practices.
