HAND-TERMINAL

Order data **on page 132**

OKW GEHÄUSE SYSTEME

ROBUST "GRIP"

THE PRODUCT

The HAND-TERMINAL is predestined for electronic components that require a robust hand-held enclosure.

Technical refinements in the design of the unit guarantee pleasant day-to-day work but also allow a firm grip whenever necessary.

A front panel version is available for the installation of complete prefabricated electronics units.

YOUR ADVANTAGE

Robust enclosures made of impact resistant material.

Large, recessed area on the front side for the installation and protection of interfaces, screwed cable glands, plug-in connections etc.

Suitable for emergency stop switches and enable pushbuttons.

Available with or without battery operation.

Optimum weight distribution.

Protection class IP 65
In conjunction with the sealing kits available as accessories (case, front panel)

Max. size of PCB (L x W/W2 in mm)

	bottom or top part
M	206 x 106/93

(PCB either in the top or in bottom part, cutouts for pillars not taken into consideration)
