Height	671mm	565mm	830mm

A large unit ideal for high volumes of waste.

We've been supplying to the NHS since 1998

It's a partnership we're extremely proud of. And you can find plenty of our Capsule bins in most hospitals up and down the country.

The NHS change lives. And when we're able to give back, we do. Here are some of our most memorable NHS projects:

- During the first Covid-19 lockdown, we focused all our efforts on providing the NHS with PPE bins. From 16th March to the 10th of July, we delivered around 13,000 of our capsule units and 16,000 RFG products.
- We delivered over 3000 bins in just five weeks to the new Royal Liverpool University Hospital.
- In 2011, we delivered over 8,000 bins to The Royal London Hospital.
- We supplied 1,100 sackholders to Balfour Hospital in 2019 during its construction. This hospital is Scotland's first net-zero hospital.

Capsule Sackholders

The Capsule Sackholder is a plastic clinical waste bin with a hands free frame, removable body and foot pedal operation.

Manufactured from a combination of aerospace grade ABS plastic and impact & corrosion resistant plastisol, these sackholders are built to last!

Available in a variety of standard waste segregation colours, supporting the safe management of healthcare waste and adherence to infection control guidelines.

The Capsule offers a lightweight, slimline waste solution for clinical settings, including sensitive areas such as operating theatres and treatment rooms.

The newly designed hands-free sack holder is manufactured using high impact plastic components and features rounded corners with no sharp edges.

80
LITRES

This fully plastic sackholder is available in 28, 42 and 80 litre sack sizes to suit any healthcare environment and offers easy maintenance, in your choice of lid and frame colour to segregate your healthcare waste correctly.

The Capsule incorporates an easy clean frame and removable body to prevent the spread of bacteria.

This unit has been developed with a lid-stay, to keep the lid open when emptying and cleaning.

An integrated plastic damper allows the lid to close slowly in a controlled and quiet manner.
