About Renray

Renray Healthcare is an approved NHS supplier with over 50 years' experience of manufacturing and supplying high-quality furniture including hospital patient and visitor chairs, lockers, overbed tables and more to the NHS.

Many products have been designed to meet the requirements of modern healthcare and hospital environments, incorporating design features to address infection control issues, reduce manual handling and pressure sore risks, and enhance patient comfort and wellbeing.

The increasing need for hospital furniture to withstand the stresses and strains of everyday life is imperative within the NHS. With rigorous research and development, we are constantly meeting this demand with our ranges of furniture.

We manufacture and assemble our healthcare furniture in our own purpose built factory in Winsford, Cheshire, as well as in Europe to British Standards. Hence we are able to ensure that your furniture is produced to the highest standards and we work with you to arrange, plan and meet your time schedule and budget.

Whether you are looking for a complete revamp of your hospital ward or looking to add some colour to your waiting area, our experienced sales staff are available to offer comprehensive advice on the most suitable furniture and upholstery fabrics to meet your needs.

High performance fabrics & finishes for a ward environment

Amongst our extensive range of vinyl and impervious fabrics, we offer a number of anti-microbial options that are effective against MRSA as well as E.coli, Listeria, Salmonella, Legionella and other similar bacteria.

*Stocked colourways

Additional colour options available at no extra cost

Non-vinyl options also available.

Please request a sample fabric swatch or a copy of the cleaning & care instructions on your chosen fabrics, from our Sales Office on 01606 593456 or e-mail sales@renrayhealthcare.com

Cleaning Guide

Source: http://www.panaz.com/media/site-downloads/CARE_MAINTENANCE_OF_UPHOLSTERY_updated_.pdf

Provided by Panaz Fabrics

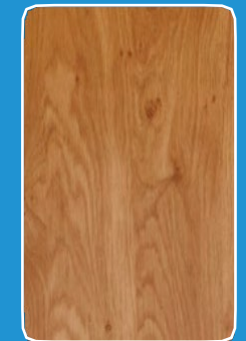

Care and maintenance of vinyl upholstery

01. Wipe clean regularly with a microfibre cloth to remove dust particles and light soiling.
02. Remove spillages promptly with an absorbent dry cloth.
03. For general soiling, use a microfibre cloth (taking care to avoid abrasive damage to surface) and tepid soapy water (non-alkaline).
04. Rinse clean with water and dry with an absorbent cloth.
05. Bodily fluids should be removed promptly within 15 minutes with cold water and then cleaned as above.
06. Extreme soiling/infection control purposes use a 5% sodium hypochlorite bleach solution, Haz Tabs or Chlorclean.
07. Steam cleaning is an effective sanitizer as are Haz Tabs and Chlorclean but is not a good cleaner. A wipe with a cloth, preferably microfibre, and water is more effective for actual cleaning. Steam and heat from steam cleaners actually seal in oily residues from bodily fluids, etc. If steam cleaning is essential, use infrequently for emergency infection control purposes only and in accordance with the machine manufacturer's recommendations. As we are unable to comment on the variety of machines in the marketplace or on the operator's handling, care should be taken for the sake of both the upholstery fabric and the wooden frame and we are unable to guarantee these.
08. Do not machine wash or dry clean.
09. Do not use furniture polish, stain remover or solvents.
10. Remove indigo dye from denim and canvas garments immediately as they will produce permanent staining if not dealt with promptly.
11. Do not use a felt tip or ball-point pen to mark.
