industrial solutions

Recognised quality for sensitive wastewater applications.

suitable for discharge to a watercourse, **Bio-Bubble** is your biological wastewater solution.

operations has distinctive characteristics cost effective wastewater treatment and capabilities of the process and have is exceptionally low - much lower than that set it apart from common municipal solutions. wastewater managed by public or private Bio-Bubble Industrial Solutions can be Bubble. wastewater plants throughout the world. custom designed from a standard range We have developed a reputation for taking and minimal maintenance requirement, Whether you require removal of solids, oil to suit each individual client's application. on projects where stringent effluent we can offer you low life cycle costs for and grease, or biodegradable organics, or Our individual solutions are supported discharges are stipulated and successfully your assets. whether you require a reliable solution by our strong commitment to after sales proven our systems to meet and surpass. This can be achieved by applying the for the treatment of acids and alkali, with service and maintenance. a Bio-Bubble Industrial Solution you Winner of the 2007 National Energy Bio-Bubble Industrial Solutions do not to your site specific needs. Whether waste required effluent standards.

the art technology developed from years conventional treatment systems by up suitable for discharge to a watercourse solution with low operation, maintenance of research combined with unmatched to 70%. Other wastewater treatment without any further treatment being and power costs.

Commercial Solutions further reduce removal. As with all Bio-Bubble solutions, state of energy consumption compared to All systems produce a high quality effluent Industrial Solutions provide a cost effective

Wastewater generated from industrial design and process experience delivers specialist suppliers recognise the quality applied. The sludge waste production

these requirements.

can ensure that your plant achieves the Efficiency Awards, our custom design require pre-treatment for grease or fat from abattoirs, breweries, food processing

referred difficult applications to Bio- other conventional forms of treatment. Combined with low energy consumption

> Advanced Aeration process custom tailored plants or chemical industries Bio-Bubble

Bio-Bubble | Industrial Solutions

With reduced sludge volumes of 70%, a highly stable effluent

Breweries, Chemical Processing , Dairies, Pharmeceuticals, Textile Factories, Distelleries, Abattoirs, Food Processing Plants

Reduced Carbon Footprint. No Pre-Treatment. Discharge to a watercourse.

We can do it.
