Performance, quality and style for all settings...

Radline

Welcome

Simply Radiators is a leading UK supplier of traditional, contemporary, designer and feature radiators and we offer our customers a new perspective on radiator style, innovation and design.

We supply a stunning collection of central heating radiators and heated towel rails ranging from traditional brass and cast iron radiators to the more contemporary tubular steel, sectional aluminium, steel panel and stainless steel radiators.

Our product range also includes: Trench, Perimeter and underfloor heating, Radiator Covers, Low Surface Temperature (LST) radiators and guards plus a large selection of radiator valves and accessories.

As a nationwide distributor we supply heating solutions to architects, interior designers, merchants, contractors and local authorities

At Simply Radiators we supply our customers with a wide choice of high quality, cutting-edge products that can be delivered direct to your door. Call our sales office now for expert advice on selection, specification and our highly competitive pricing.

We will help you create a unique, warm and well designed interior.

Victorian

cast iron radiators

Traditional Cast Iron Sectional Radiators

Combine classic style with modern heating efficiency. The sectional column concept gives you convenience and complete flexibility so that all four models can be assembled to meet your individual requirements.

Ideal for contemporary and period properties, perfect for new or existing heating systems.

Four styles, nine heights, six depths and your choice of length. All cast iron radiators are supplied in primer finish suitable for metallic or gloss paint.

aluminium radiators

Opera

Aluminium Sectional Radiators

Available in fourteen heights, three depths and various lengths.

The Opera, Graduate and Highrise from Simply Radiators bring together the high efficiency benefits of aluminium with designer style, to create a highly practical and attractive central heating radiator.

Manufactured from high-grade aluminium and finished in a beautiful white polyester powder coating all three models operate with: low water content, great heat outputs and carry a 10 year manufacturers guarantee.

Tubarad

tubular steel radiators

Tubular Steel Radiators

Available in ten heights, five depths and various colours.

Simply Radiators tubular steel radiators are designed to provide maximum design flexibility. This smart range of elegant, efficient radiators allows the architect or designer to provide highly versatile heating solutions without ever compromising on style.

Equally at home in period-style houses and state-of-the-art apartments, these classically designed radiators move easily from traditional homes to contemporary interiors. A wide range of sizes, shapes and finishes are available to create a unique and stylish heating solution.

bathroom radiators

Bathroom Radiators

The Simply Radiators Bathroom Range contains over 100 different bathroom radiators, towel rails and towel warmers. From Ladder style multi-rail heated towel radiators to traditional ball jointed heated towel warmers.

The majority of models are available in white, chrome or antique gold finishes but most standard colours can be supplied. The range includes freestanding, wall mounted or floor/wall-mounted models, which operate via electric, dual-fuel and hot water systems. You will be sure to find a design that perfectly complements your requirement.

We have brought together some of the most exciting designer radiators on the market.

Throughout this range you will find quality, performance and individuality in perfect harmony.

Planrad

steel panel radiators

Steel Panel Radiators

Manufactured from high-grade mild steel plate and finished as standard with a white polyester powder coating, all our steel panel radiators are ideal for industrial, commercial and domestic applications. All our LST radiators are manufactured to conform with the requirements of the NHS Estates guidance for the provision of safe hot water and surface temperatures. They are ideal in situations where safety is paramount and increasingly are specified for installation into care homes, schools, nurseries and hospitals.
