

CASE STUDIES

Hunderton Nursery - Hereford

The nursery contacted us wanting to renew their playground, which had an old tower on tired surface. We designed a tower for children up to 5yrs with plenty of challenging climbing, sliding and platforms for playing in. We also supplied and installed the wetpour surface, with a fun blue splash at the bottom of the slide.

We offered:

- Challenging vertical rock walls
- Inclined bridge
- Net to a 1.2m platform height
- Staircase with flat steps
- Left-right climber
- HDPE slide
- Wetpour safety surface in green
- Blue splash wetpour graphic

Initial contact by email:

"I'm looking to replace a very old climbing frame within our nursery outdoor play area, see attached photograph, and I was wondering if someone could visit and advise us please?"

Benhall Pre-School

The school was looking to challenge the pupils with plenty of climbing but were not interested in a slide. They discussed their brief with us in our visit, and this is their reply to our proposal.

"The piece of equipment in the drawing is exactly what I have been searching for, I really appreciate you taking our ideas on board and listening, so thank you."

"the play frame is in already, it looks absolutely fantastic! I would like to thank Adam for listening to what I wanted, the children will be delighted and the equipment will be a fun challenge for them. I will definitely recommend Active Garden, and I will be in touch if we develop anymore of the outdoor area. Thank you, Kind Regards, Linda Bennett- Benhall Pre-School"
