

MHM 40XL SEMI-AUTOMATIC HORIZONTAL

The MHM Powerbale 40XL is the smallest unit in our Semi-Automatic Baler Range. It has proved to be an affordable step up from the more labour intensive vertical mill size Baler. It has the smallest footprint on the market which makes it ideal for site with limited space. The MHM Powerbale 40XL produces bale sizes of 1250mm x 800mm x 1100mm (L x W x H) producing bales between 400-500kg and up to 2 Tonnes per hour depending on the waste stream and the method of loading.

The MHM Powerbale 40XL Semi-Automatic baler is a full bale eject machine with a portcullis door and anti-wire snap technology. Wear plates are fitted as standard in the bale chamber giving the machine unrivalled serviceability. The controls have multi product selection capabilities for various products ensuring maximum bale weights. Ripping teeth are fitted on the MHM Powerbale 40XL Horizontal Baler as standard. 5 Horizontal wire ties with an easy wire feed means no more climbing on a slippery machine to get the wires pulled through. The MHM Powerbale 40XL Semi-Automatic is manufactured in the UK by MHM (UK) LTD.

TECHNICAL SPECIFICATION

Baler Dimensions L x W x H	5130mm x 1360mm x 2570mm
Bale Dimensions L x W x H	1250mm x 800mm x 1100mm
Bale Weight	up to 500kg
Bale Discharge	Full Eject
Bale Chamber End Door	Manual Open, Hydraulic or Manual Clamp
Wire/Tape Tying	5 Horizontal Wire Ties
Loading Aperture L x W	1250mm x 800mm
Power Supply	32 Amp 3P + N + E,D type breaker
Motor Power	11kW
Compaction Force	40 Tonne
