

BRUSHED

Metal make-up for plastic bodies

The surface makes the difference: Whether it be coarse or fine brushed, matt, semi-matt or gloss, high-grade steel, aluminum or titanium appearance - the various lines in the BRUSHED product range can be stamped onto either general plastics (PVC, ABS, PS, PMMA) or polyolefins (PP, PE) with the same high edge definition and durability.

BRUSHED

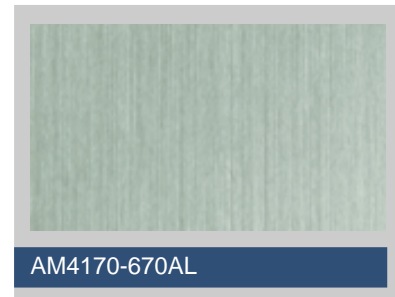

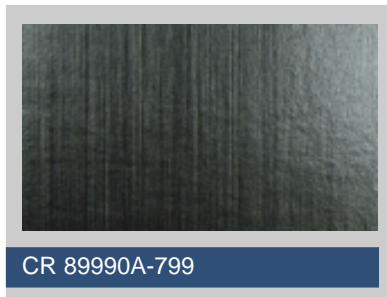

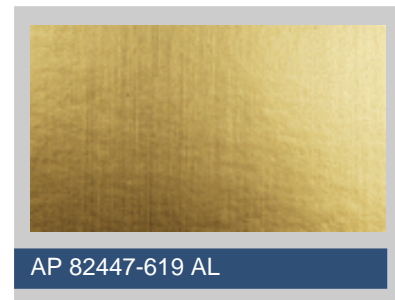

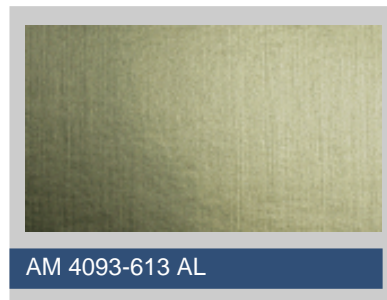

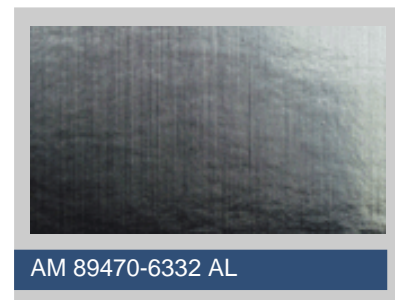

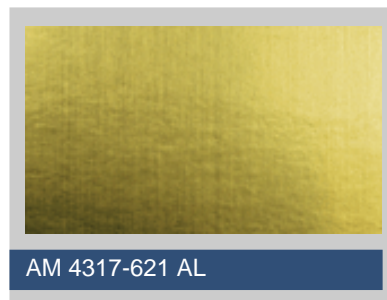

Stamping foils with an authentic brushed structure you can feel
