WardStor

1st 4 Storage has been working closely with Kettering General Hospital NHS Foundation Trust, Weardale Hospital trust and other general hospitals as they implement their *Productive Ward- Releasing Time to Care®* Programme*.

We recognise that with limited storage space and the constant need to access vital consumables on-ward, you need a storage system to suit.

WardStor has been designed with the help of Productive Ward Matrons to create tailor made storage facilities to meet the precise needs of medical and nursing staff at ward level, where it matters most.

WardStor features:

- High density, space-saving storage.
- Allows fast access and selection of vital medical supplies.
- Increased efficiency in stock rotation.
- Lockable doors for security.
- Plastic drawers, washable & hygienic.
- Floor spillage access for cleaning.
- Strong steel shelving system.
- Hard-wearing and reliable.
- Unique identification labelling for easy recognition.
- Anti-bacterial coating for the most stringent hygienic environment.

* *Productive Ward – Releasing Time to Care®* is a registered trademark and the property of the NHS Institute for Innovation and Improvement. Our involvement with these projects does not constitute endorsement of our products by the NHS Institute or other NHS body.
