- Service and system reports to better plan service and reduce downtime
- Push notification of events to mobile devices to alert specific staff
- Less disruption and time on site from testing and maintenance,
- Increased technician first time fix rates
- Timely compliance and audit records
- Log of all devices tested and service progress for undisputable compliance
- Digital record of all events and activities in support of any insurance claim
- Cybersecure solution using encrypted communication
- GDPR regulatory compliance with protected personal data

Honeywell Connected Life Safety Services (CLSS) is an innovative, all-in-one cloud platform that enables facilities owners to maximize the performance and uptime offered by Honeywells trusted detection and alarm systems

FIRE EXTINGUISHERS

Our team conducts thorough inspections, servicing, and testing to guarantee effective performance when you need it most. This also ensures you are compliant with the British fire safety regulations.

OUR SERVICES

DESIGN

Whether it's a small office fire or a potential disaster in a large commercial setting, having strategically placed and properly maintained fire extinguishers can mean the difference between minor and significant damage

INSTALLATION

Our range of fire extinguisher services encompasses every aspect of ensuring that your fire safety equipment is always reliable and compliant with BS5306-3 Standards.

SERVICING

Regular maintenance is vital to ensure that your fire extinguishers are in proper and working condition, and a requirement that is outlined by the fire safety order.

Fire extinguishers are vital tools to slow or stop the spread of fire

ELECTRICAL SERVICES

TF Installations can work on all your electrical needs in Nursing homes, Hotels, Public houses, Retail units and Medium and Large dwellings.

WHAT WE OFFER

- Design and installation of electrical systems to comply with current standards
- Fixed wire testing
- PAT Testing
- Investigation and fault repair of electrical issues
- Full electrical re-wire
- Full installation of all wiring required in new builds
- Update current fuse boards
- Supply and install new dimmer systems
- Update old dimmer systems
- CCTV installation and supply of systems
- Supply and install new door entry systems
- New intruder alarms
- Fault finding

LED AND EMERGENCY LIGHTING

Emergency lighting is required for an emergency when the mains power supply is cut, and any normal illumination fails. The loss of mains electricity could be the result of a fire or power cut; this can lead to sudden darkness and possible danger to occupants in the building. Emergency lighting is required to operate automatically and give illumination to a significant level to ensure safe and quick escape for the building.

OVER 10 YEARS EXPERTISE

SURVEY

TF Installations Ltd can conduct a site survey to attain what emergency lighting is needed to comply with the current regulations

KNOWLEDGE

LED lights have been hailed as the future of lighting, as they use very little energy, last a long time

We have helped a number of clients make the transition to LED for a more efficient system

EXPERIENCE

We can offer a wide range of emergency and LED lighting. TFI currently maintain many lighting systems throughout London and the surrounding area's. Having experience and knowledge to ensure we only use top quality brands has ensured constant customer satisfaction.

Did you know it is a legal requirement to provide adequate emergency lighting for emergency escape routes and exits?

We follow the clear guidelines set by BS5226 to ensure all systems are compliant within your premises, and you have the highest safety system in place.

To ensure peace of mind, we create up-to-date building information and zone charts that adhere to this industry standard.

With our state-of-the-art computer-aided design (CAD) Services, we give you complete confidence in your fire safety.

Our fire safety experts use CAD to support your business in any way necessary to create a truly safe environment. This includes:

- Integration of Emergency Lighting systems and fire extinguishers into drawings and charts.
- Printable charts and drawings up to size A0 and laminated up to A2
- Digital CAD copies and PDFs.
- Conversion of old paper drawings into CAD/Digital charts.

COMPLIANCE WITH BS5839
YOUR SAFETY GUARANTEED

CAD DESIGN SERVICES

Prompt, reliable and courteous to clients and staff alike...
Their installation work is always carried out to a very high standard

We hold TFI as a trusted partner of The Egerton House Hotel.

Always a pleasure to deal with anyone at TFI. Quick, reliable, professional, and friendly team. Nothing seems too much to ask" Travcorp management services.

TESTAMONIALS

We have always found TF Installations to be reliable and are more than happy with the service (Fire alarm installation and maintenance) they provide us with.

Were able to assist at short notice which really helped me out – along with the delivery of my project!

Will use again for sure 😊

Easy to deal with; Engineer was responsive to site issues, even though did not form part of his brief (some companies just walk away). This helped us resolve everything on site with a happy client at the end. Thank you
