

# USB jog

USB cable tester with automatic testing against memory.

## features:

There are 2 rows of 6 LED's corresponding to each of the possible connector pins. No 6 is for the screen or ground in mini and micro connection. As each pin is activated, the LED's indicate all connections associated with that pin, so that short, open and crossed circuits can be easily found. The LED's also show the possibility of high resistance or leakage connections.

## CONNECTORS:

- USB A
- USB B
- USB A mini
- USB B mini
- USB AB mini
- USB B micro
- USB AB micro

## memory:

- There are 4 LED's indicating the state of the MEMORY option.
- If the MEMORY LED is on, then USB jog automatically scans all the connections and compares against information held with just one press of the test button.
- MEMORY works in single and double ended test modes.

## test modes:

- Manual Double ended - both ends of the cable under test are plugged into the USB jog
- Automatic Double ended - as above but the USB jog automatically scans all the connections and compares against information held with just one press of the test button.

## Specification:

- Continuity and Short Circuits, less than 47K ohms
- Open Circuits (end to end and between connected pins), greater than 47K ohms
- Less than 1 second test time
- Compact plastic box construction
- L 130mm W 100mm D 30mm
- Uses 9v PP3 battery

### LEFT

- ON/OFF switch
- USB A
- USB A mini
- USB AB mini
- USB AB micro

### RIGHT

- USB B
- USB B mini
- USB AB mini
- USB B micro
