Lincolnshire County Council improve efficiency with Kelio's Workforce Management System!
Commentary by Ellie Baker, Senior Project Leader of Lincolnshire County Council

After seeing the huge benefits that Kelio brought to one section of their workforce, Lincolnshire County Council highways decided to, not only upgrade the system, but set up all 400 members of staff on it. Ellie, Senior Project leader, comments that the system is, "fit for purpose, user friendly and provides the reports and outcomes needed to manage staff attendance and leave."

Replacing their old laborious database, LCC has installed Kelio's Time and Attendance System for staff clocking in and out and tracking attendance and annual leave. Ellie reviews, "we are saving a lot of time for all staff. In the past, we were using various different Excel and Word spreadsheets to record annual and flexible leave and record working hours". The benefits of Kelio's software has improved their efficiency and supported the whole team; "Managers are impressed with the time savings it creates for them, having all the information in one place," Ellie reports.

The new system solves many issues, including making absence requests for annual leave. Ellie comments, "Staff can access their leave information and see when other staff in their teams are going to be off work, which allows them to plan their staffing and workloads more effectively."

To fit in with the requirements of the team, Lincolnshire County Council have opted to use mobiles, rather than a clocking-in terminal. This easy to use solution means that working on and off-site as well as flexible working are options available for the staff. Kelio's dashboard and alert system also provide clear visibility in a simple to use format, keeping everyone up-to-date in real time.

"Bodet's Kelio is an effective and efficient system, and user friendly providing all information in one place," Ellie concludes.
