

# PSTN SWITCH OFF

BT is modernising the way telephone services are delivered across the UK. The current PSTN is aging and will reach the end of its life Jan 2027. New digital technologies will take its place, meaning over 16 million lines and channels will need to move to alternative products before the network is switched off.

It's never too early to start thinking about how this might affect your business, and we're here to help you every step of the way.

Modern alternatives include:

**VOIP (VOICE OVER INTERNET PROTOCOL)**

**CLOUD-BASED PBX (PRIVATE BRANCH EXCHANGE)**

**MOBILE AND REMOTE SOLUTIONS CONTROL AND MANAGEMENT**

**CONTACT US**

Phone Number:  
**0333 014 6220**
