Measured By Performance

MAIN STREAM CONSTRUCTION SERVICES

SERVICES

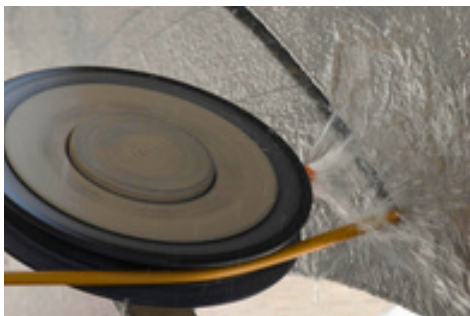

DIAMOND DRILLING

- Holes from 6mm to 1.0m diameter.
- Low noise and vibration reducing impact on day to day activities.
- Link holes in stitch drill pattern to form openings of any size, shape or depth.
- Self-contained Trailer Mounted drilling ideal for remote locations such as airfields and highways.

TRACK/WALL SAWING

- Used to cut reinforced concrete or masonry to form openings and demolition lines.
- Breaks down into component parts so can be used in areas with restricted access.
- Produces a clean and precise cut removing any need for remedial works.
- Can be used on floors slabs where unable to access with floor saw.

DIAMOND WIRE SAWING

- Can be used to cut objects or structures of any shape or size.
- Ideal for cutting deep or thick walls or floors.
- Used to remove sections of bridge decks, cut top off piles/piled walls and remove foundation projections.

HYDRAULIC BURSTING

- Hydraulic crunching or bursting provides a low noise and vibration concrete removal solution.
- Ideal for live locations such as hospitals, offices and residential buildings.
- Combine with concrete cutting techniques to remove specific areas of concrete with minimal disturbance.

FLOOR SAWING

- Quick and efficient method to cut reinforced concrete or asphalt/tarmac.
- Used to form openings, demolition lines and induction cuts in new concrete.
- Using 3-phase powered equipment can be used internally fume free.
- Internal works includes trenches, chases for electrical installation and liftshaft or staircase openings.

ROBOTIC DEMOLITION

- Full range of different sized machine to suit all your project needs.
- Fully electric to allow fume free efficient concrete removal
- Remotely controlled so operator away from direct work area and any potential danger.
- Able to travel up staircases so able to access all levels.

ROCK DRILLING

- Efficient drilling of holes to accept fixings or dowel/starter bars.
- Automated system so avoids restrictive HAV regulations.
- Holes formed with dust extraction avoiding airborne silica dust.
- Fixing or dowel bar supply and installation service available.

FLOOR PREPARATION

- Includes tile/vinyl lifting, paint/adhesive removal and high spot removal.
- Provide key for new coverings or paint systems.
- Completed with dust extraction reducing impact on day to day activities.

SERVICES

VAC-EX

A safe and efficient no-dig excavation solution, our Vac-Ex machines combine compressed air and suction to safely loosen and remove ground material. This enables the exposure of underground services without the need to use traditional excavating techniques eliminating service strikes.

PULL TESTING

We provide pull testing to fixtures and anchors which have been installed in concrete or masonry, to confirm they meet the specification required. Test certificates are provided on the day of the test.

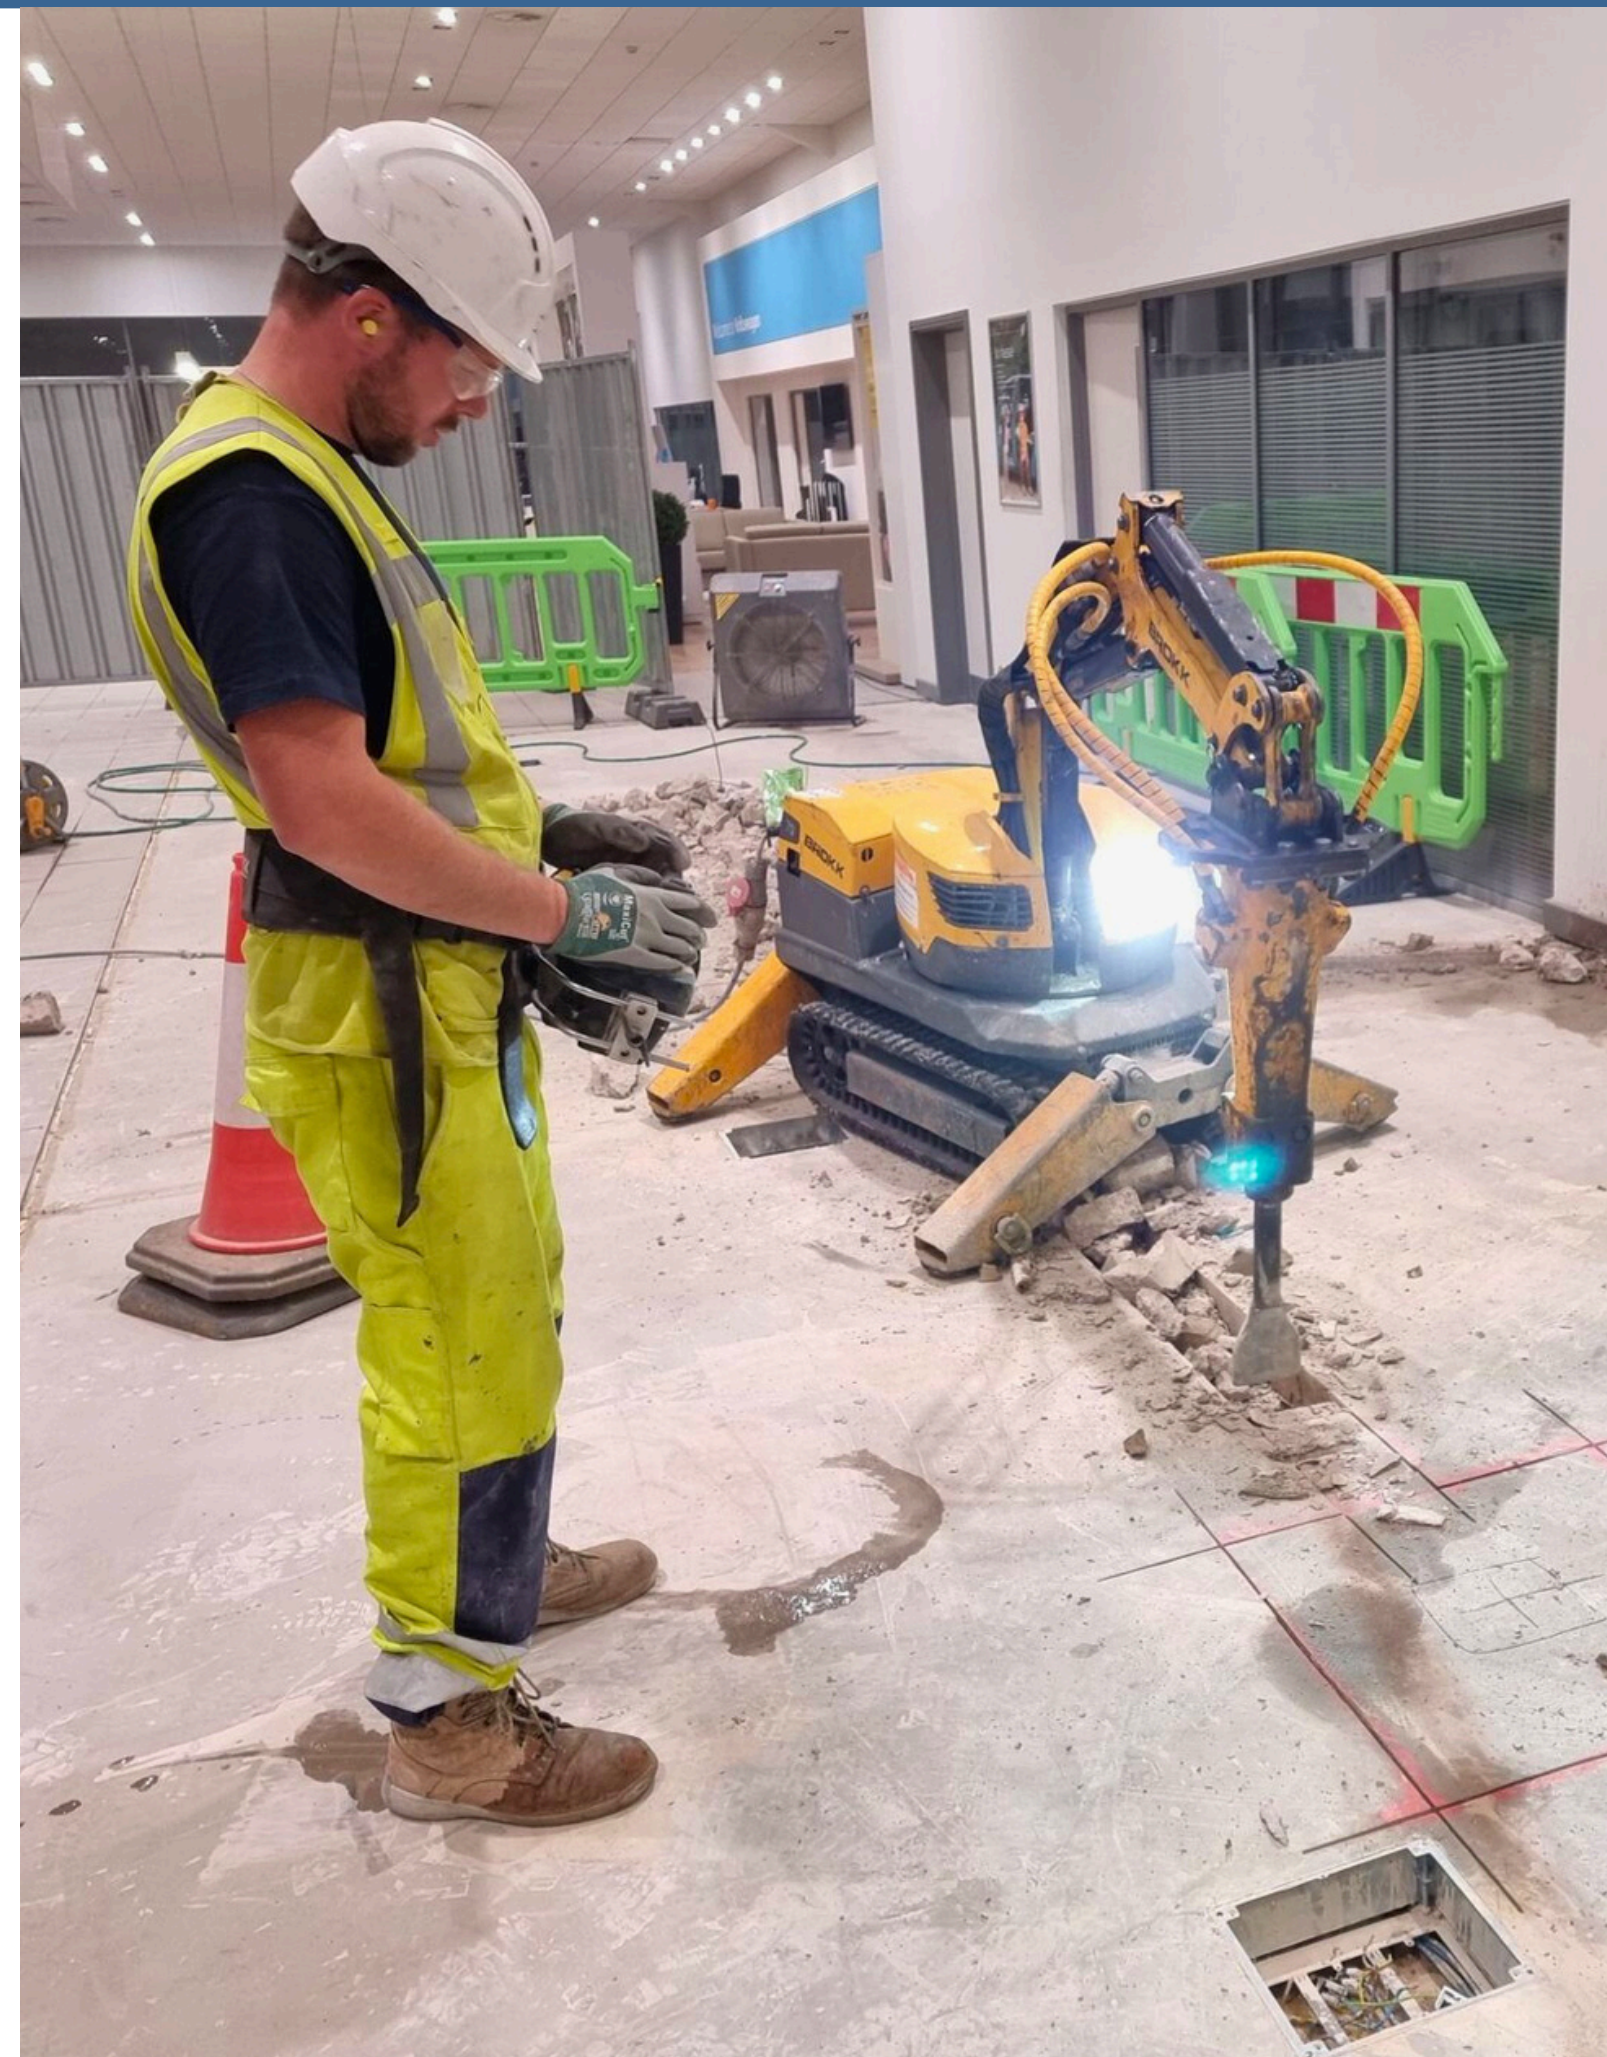

FLOOR & WALL CHASING

This service is where we use the precision technology of diamond cutting to create channels in your floors and walls. These are made for cabling or pipes to run through – keeping them safe, tidy and out of sight.

INDUSTRIAL PRESSURE WASHING

Our 4000psi (275 bar) petrol pressure washer, powered by a 420cc 4-stroke engine, is your solution to industrial sized cleaning tasks. Complete with the large Whirlaway head inc three rapidly-spinning jets achieve a deep, non- streak finish. Industrial pressure washers are much more powerful than residential pressure washers and can handle tougher jobs.
