EMPEROR 369M - ELITE

CARCASSONNE 472M - EVASION

At Beauflor, we believe that everyone should be able to benefit from **quality floors at affordable prices**. That's why we have inhouse R&D teams, participate in open innovation, learn from sectoral organisations and keep a close eye on market trends. The result: we are able to offer you a **wide variety of stylish floors** that are suitable for different rooms and easy to install and maintain. Moreover, they are water and stain resistant, absorb sound extremely well and maintain indoor air quality.

Let's go vinyl!

DISCOVER OUR 3 RANGES

Introducing our 2025 residential collections of luxury vinyl flooring with quality, durability and performance guaranteed.

ULTRA

The Ultra range brings style, beauty and strength to your interior in any area you choose. Drawing inspiration from the world's colour patterns and trends, these collections have been thoughtfully crafted to create an impact in any interior. When extra durability is needed, selecting a product of the Ultra range is the perfect choice.

OPTIMA

The Optima range features stunning wood and stone designs with the highest attention to detail displaying a level of realism rarely seen. You will find a range of styles and tones to perfectly complement any room you desire, traditional or contemporary. Easy maintenance and strong durability come as standard.

PRIMA

Our Prima range offers our widest selection of vinyl flooring suitable for the home. With a beautiful pallet of wood and tile designs, this range offers very diverse collections that help create the perfect fit for any interior.

CLASSIFICATION OF USE

Our 3 ranges Ultra, Optima and Prima have been compiled, based on the usage classifications for the flooring industry. This standard classification indicates the type of area a specific floor can be used for.

QUICK GUIDE

The first number gives an idea of the environment:

- 2: Domestic
- 3: Commercial
- 4: Industrial

The second number indicates the usage:

- 1: Moderate
- 2: General
- 3: Heavy
- 4: Very Heavy

OUR ICONS EXPLAINED

Below icons explain the features and benefits of our products. You'll find them throughout our catalogue in our different collections. They will help you in choosing the right product.

PRIMA

Usage Classification 21 - 22

21 | Domestic Moderate

Suitable for areas of the home with a reduced use, such as bedrooms and bathrooms.

22 | Domestic General

The floor is perfect for domestic spaces with medium use. Ideal for the family home, including children's rooms, bathrooms, dining rooms and hallways.

OPTIMA

Usage Classification 23 - 31

23 | Domestic Heavy

The floor is suitable for intensive use in any home. It's perfect for kitchens, playrooms or any other space with a high frequency of traffic.

31 | Commercial Moderate

Suitable for moderate use in commercial applications such as private offices, hotel rooms or flats.

32 | Commercial General

A floor of absolute quality for domestic use but also of high quality for public, administrative or commercial places with intermediate use such as waiting rooms, hotel lobbies, exhibition halls, shops, collective offices, libraries or classrooms.

41 | Industrial Moderate

The floor is ideal for industrial spaces with a moderate use such as restaurant chains or those with a high frequency of traffic, medium-sized commercial areas or small light equipment workshops.

Backing Features

Comfort Bac: A polymer foam backing with excellent sound absorbing qualities providing warmth and comfort underfoot.

Power Bac: A resilient foam backing with "bouncebackability" ensuring appearance retention.

Waffle Bac: A foam backing with a waffle structure. This allows you to install your floor even faster and cover imperfections on the subfloor more easily.

Tex Bac: Our textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Silver Tex Bac: Our silver textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Black Tex Bac: Our trendy black textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Surface Features

Slip resistant: Our innovative slip retardant enhancement - your safest choice for kitchens and bathrooms.

Natural look: Combined thermal and mechanical embossing on top of advanced printing technologies results in the natural look of real wooden or tile floor.

Floor heating: Compatible with underfloor heating. Vinyl floors have a low thermal resistance and are therefore ideal for underfloor heating.

Premium coating: The protective topcoat prevents scuffing and staining, making your floor easy to clean.

Pro Tech coating: A high-performance coating that enhances the durability of our vinyl floors by making them resistant to dirt, scratches, and bacteria. With its advanced formula, it also ensures a cleaner, safer environment while keeping VOC emissions low.

Anti-Slip coating: Ideal for when you need extra safety and protection. Our Anti-Slip coating gives added peace of mind for areas like a toilet, kitchen or care home.

Flextreme: A revolutionary interlayer giving increased tear and crease resistance.

R10: Perfect for domestic areas where an increased slip risk may occur, like kitchens, washrooms and even bathrooms (when using a bathmat). It's easy to clean while still possessing decent anti-slip properties.

R11: Superior slip resistance for both dry and wet environments, which makes this perfect for use in home environments varying from damper areas such as bathrooms and kitchens, wet rooms to hallways and even living rooms.

Ready to go vinyl?

PURE AND SIMPLE...

Unroll it and it's done

Laying our vinyl floors is child's play. Simply because this product has been designed to make your life easier. Supple, and available in a variety of widths (up to 5 meters), it can be cut with a utility knife. This practical characteristic is very much appreciated when you want to change the design of your home. It can be glued or loose laid. The extra benefit: whichever design you choose it will look awesome.

Low maintenance

Our cushion vinyl rolls are very low-maintenance. Thanks to an optional PUR protective polyurethane lacquer, the floor is easy to clean and it is protected against daily wear and tear. All it needs is an occasional sweep with a wet mop and standard cleaning products.

Seamless

Beauflor is the only company in the world to offer cushion vinyl rolls in 5 meter width, allowing you to easily install your flooring without any joints to achieve the perfect finish your home deserves.

Cost saving

Cushion vinyl rolls are a budget-friendly flooring solution allowing you to create the stylish interior you deserve.

Super silent floor

Whether you are walking around in your high-heels or feel like having a lazy day in your slippers, our cushion vinyl absorbs noise so well that it is up to 50% more silent than comparable floors!

Comfort & warm touch

Cushion vinyl floors are soft and warm to the touch, which makes them the ideal floor to walk on barefoot. Moreover, they conduct heat easily which means that they work well with underfloor heating.

100% water resistant top layer

Looking for a floor that can stand up to wet and dirty shoes or paws? Or do your children sometimes turn your bathroom into a swimming pool? Then our cushion vinyl rolls, with a 100% water resistant top layer, are just what you need.

Durability

Cushion vinyl floors are protected by a hard pvc wearlayer. The resistance of vinyl to staining and general domestic use is one of the key benefits of vinyl floors.

It's a safe choice

All our vinyl sheet products are produced without plasticisers that contain significant impurities. We produce with known virgin raw materials from trustworthy vendors throughout the world and therefore we guarantee a 100% ortho-phthalate-free flooring worldwide.

Furthermore, almost every vinyl floor we offer have acquired the certificate for fire resistance class Bfl-s1, the highest possible classification for a burnable flooring product.

Made in Europe

By manufacturing in Europe we are closer to our markets, which means that our products have less miles to travel to reach the consumer. This helps us to control our carbon footprint and helps reduce the impact of climate change for future generations. Also, the components of our PVC meet the highest standard and comply with the European legislation concerning the use of chemicals (REACH).

DESIGN MOODS

**Stay
inspired**

The world is full of inspiration

Nature, architecture, fashion and seasonal colours and shapes all effect our environment and how we live. At Beauflor we aim to transfer this into our collections giving us the freedom to create some striking designs that stand the test of time.

We believe the textures and colours we see around us can be translated in so many ways to make our homes such a welcoming place to be. We have been inspired and hope you will be too...

SUSTAINABILITY

LET'S GO GREEN!

BECAUSE WE CAN

We firmly believe that doing business responsibly and innovating with sustainable solutions is a must to stay on top of our field. But as one of the global industry leaders for cushion vinyl flooring, we also feel that it's our moral duty to contribute to a more sustainable world. Especially because we are in the position to make a big difference.

Uncountable square meters of flooring pass under our feet on a weekly basis. Strolling around the house, navigating the office, shopping in town ... we encounter floors everywhere. And Beauflor has a big piece of the pie, designing, producing and distributing large volumes of vinyl flooring to all corners of the world every year.

Well aware of our enormous social and environmental responsibility, we've integrated a sustainable approach into all aspects of our business – from deeply caring for our employees to offering a growing number of eco-friendly flooring solutions.

Be part of the change!

A TAILORED SUSTAINABILITY MODEL

Sustainability is an integral part of Beauflor and will gain even more importance in the years to come.

To continuously improve our performance when it comes to environmental, social, ethical and economical matters, we created our very own sustainability model. Why? Because we felt that a general framework, such as the UN's 17 Sustainable Development Goals, falls somewhat short of our own unique aspirations.

After carefully capturing the vision of our people, we translated their concerns and ambitions into 5 focus points, which are closely intertwined with our company DNA.

#1 We take responsibility for the environmental impacts generated in our operations.

water

energy

waste

#2 We value our employees and the people around us.

our
workforce

local
communities

safety

#3 We work towards a circular economy with the whole supply chain in mind.

Together for a human, collaborative and sincere future

ROLLING INTO A LIFECYCLE APPROACH

TURNING GREENISH INTO BRIGHT GREEN

We want to help consumers to reduce their ecological footprints, whether it's a family wanting to refurbish their home, a businessman planning to build new offices or a retail store looking to find an ideal mix between usability and sustainability. All our products aim to be green. But what exactly makes a product truly 'green'? The answer lies in lifecycle assessment.

Lifecycle assessment implies that everyone in the whole chain of a product's lifecycle, from cradle to grave, has a responsibility and a role to play. From the sourcing of raw materials to end-of-life solutions: every phase of our supply chain offers opportunities to protect the planet. It is our ambition to seize those opportunities to the fullest.

Full transparency

With EPD and FDES certificates, we provide independently verified and comparable data about the environmental impact of our products. This allows people to objectively evaluate the science-based results of our sustainability efforts. Water consumption, CO² emissions, waste management ... numerous key environmental issues are addressed throughout the whole lifecycle.

A new
opportunity
with every
step

BEAUFLO IN CERTIFICATES

REACH

Reach is a European Union regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals. The position of BIG floorcoverings, division cushion vinyl is clear; for all of our European legal entities and divisions, all measures are in place in order to ensure REACH compliancy. No harmful substances added, such as formaldehyde; lead; cadmium; mercury or hexavalent chromium.

AgBB

AgBB (Ausschuss zur gesundheitlichen Bewertung von Bauprodukten) is a committee for health-related evaluation of building products. Beauflor's vinyl products satisfy the stringent emission criteria as stipulated by the renowned DIBt Institute in Berlin.

FloorScore®

The most recognized indoor air quality (IAQ) certification standard for hard surface flooring materials, adhesives, and underlayments. Developed by SCS with the Resilient Floor Covering Institute (RFCI), a leading industry trade association of flooring manufacturers and suppliers, it qualifies for many green building schemes including LEED v4, WELL, BREEAM, and CHPS.

E1

E1 means that the level of formaldehyde is inferior to 0.1ppm (= 0.12 mg/m³ of air)

ERFMI

ERFMI (European Resilient Flooring Manufacturer Institute) has prepared EU wide Life Cycle Assessment of a broad range of flooring types and specifications. From this study, a series of Life Cycle Analysis data sheets have been produced, called EPD's (Environment Product Declaration). Beauflor is an active member of ERFMI.

Ortho-phthalates free

Ortho-phthalates free

All our vinyl sheet products are produced without plasticizers that contain significant impurities. This means that we only use other non-phthalate plasticizers, such as DOTP. We produce with known virgin raw materials from trustworthy vendors throughout the world and therefore we guarantee a 100% ortho-phthalate-free flooring worldwide.

EcoVadis

The EcoVadis rating covers a wide range of non-financial management systems, including environmental, labor & human rights, ethics and sustainable procurement impacts. EcoVadis, the world's most trusted provider of corporate sustainability ratings, assesses a company's commitments, policies, actions, and results on these 4 topics. Beaulieu International Group, the group to which Beauflor belongs, has achieved a bronze EcoVadis medal for its global operations and 29 factories. This reward underlines our group's valued actions and reliability in the field of sustainable business operations.

BREEAM

BREEAM is one of the world's leading rating systems to measure sustainability and environmental performance of new and existing buildings. Beauflor products, which hold high ratings, positively contribute to a building's overall score.

Green A+ label

All our Beauflor products carry the green A+ label, the highest accolade awarded by the French authorities.

VinylPlus®

VinylPlus® is the voluntary commitment to sustainable development of the European PVC industry, working to improve the sustainability performance of PVC. PVC can be recycled multiple times, and VinylPlus® works to do just this! Beauflor is an active member of Vinylplus®.

FDES

An FDES (Fiche de Déclaration Environnementale et Sanitaire) is a standardized document that shows the results of a product's life cycle analysis as well as health information, used to calculate the environmental and health performance of an eco-designbuilding. This is also known as an EPD (Environmental Product Declaration). All our ranges are covered by an FDES - or EPD - which enables our customers to assess the environmental impact of our products and to our engineers, to set eco-design targets according to objective criteria.

ISO 14001

ISO 14001 certification means that the industrial site complies with all the environmental standards, measures all environmental impacts and is committed to continuously improve its environmental performance. Beauflor's Belgian and Slovenian plants are ISO 14001 certified.

ISO 9001

The most widely used standard for quality control worldwide. The goal of the quality management system is to keep the organization focused on continuous improvement in order to increase customer satisfaction. Beauflor's Belgian and Slovenian plants are ISO 9001 certified.

ISO 45001

ISO 45001 sets guidelines for establishing and improving a management system for workplace health and safety. The standard focuses on the continuous improvement of safety and health performance, meeting legal and other requirements and achieving safety and health objectives. Beauflor's Belgian plant is ISO 45001 certified.

INSTALLATION INSTRUCTIONS

GLUED DOWN CUSHION VINYL

BEFORE THE INSTALLATION

Before installation, always check if the product is the one you ordered in terms of specifications, design and colour. At the same time carefully inspect the material for any visible damages and defects.

RECOMMENDED TOOLS

A sharp knife with a straight blade for long cuts

A long metal ruler or straight edge

A tape measure

Adhesive trowel: type A2

Smoothing press

INSTALLATION CONDITIONS

Planarity	< 7 mm under the 2 m rule
Storage	≤ 2 m store upright / > 2 m store horizontally
Temperature	Minimum 18°C for a period of 24h before installation
Humidity	Concrete ≤ 4% / Anhydrite ≤ 0.5%

CONDITIONS FOR THE SUBFLOOR

Subfloors must be absolutely level, clean and free from grit, dust, grease, oil, polish & old adhesive. It is also essential that the subfloor is dry because dampness can cause discolouration to the floor.

Subfloor	Preliminary work
Screeds	Permitted after sanding and application of primer
Parquet / Carpets	Must be removed
Ceramic	Permitted after levelling compound
Asbestos tiles	Glued installation not allowed

Pay attention that the underfloor heating and cooling is switched off 48 hours before and 48 hours after the installation.

INSTALLATION

LAYING DIRECTION

For plank and tiles designs, sheets should be installed in the same direction.

For most all-over designs, alternate sheets should be installed in opposite directions. Check design specifications before you start.

- Take care to always have the same batch in the same room.
- Cut and flatten the rolls 24 hours before installation.
- When you do a multiple piece installation, make sure the seams between rolls are positioned away from areas of heavy traffic and lots of light.
- If you want to glue the vinyl floor to the subfloor, please use acrylic glue. For textile backing you can also use double sided tape.
- Cold welding; after the installation overlap the strips to make a double cut.

ADHERING VINYL TO SUBFLOOR

1. Turn back the first piece of flooring to expose about half of the subfloor.

2. Apply the adhesive to the subfloor in accordance with the adhesive manufacturer's instructions.

3. Allow the recommended drying time and then reposition the flooring material over the prepared subfloor.

4. Roll out with smoothing press.

5. Do the same with the other pieces of flooring, take care to not overlap the glue.

6. With the material now lying flat around the fittings and corners, the final cutting along the wall lengths can be carried out.

CORNER CUTTING INSTALLATION

1. Fold your product twice on itself, looking for the inside corner.

2. Place your blade point in the corner and cut until outside.

3. Pull out this part

4. Cut section as shown, once completed open up to see perfect corner shape cut - trim edges.

AFTER INSTALLATION

First 48h:
Keep traffic to a minimum.

First 72h:
Do not move heavy objects back into place.
