Impact
Solutions

Why our customers trust us

"We have a strong and open relationship with Impact IT Solutions, who have been our IT provider for some years across our computer, Wi-Fi and phone network. Day to day we appreciate their understanding of our operations, responsive technical support and the can-do flexibility of their field engineer. More strategically, I value their honest appraisal of potential system or hardware upgrade options, and the benefits/costs/extent of change involved."

David Halsey

Head of Business at Lee Abbey, Devon
