

🌀 Airflow matters in sunbed cubicles!

Proper ventilation isn't just a nice-to-have — it's essential. Our MFC sunbed cubicles are designed with deliberate gaps above and below to promote airflow and improve comfort for your clients.

Unlike stud wall cubicles, MFC cubicles are purpose-built, easier to maintain, and allow for better ventilation and heat dispersion. That means a more pleasant experience for your customers and a safer, more effective environment for your equipment.

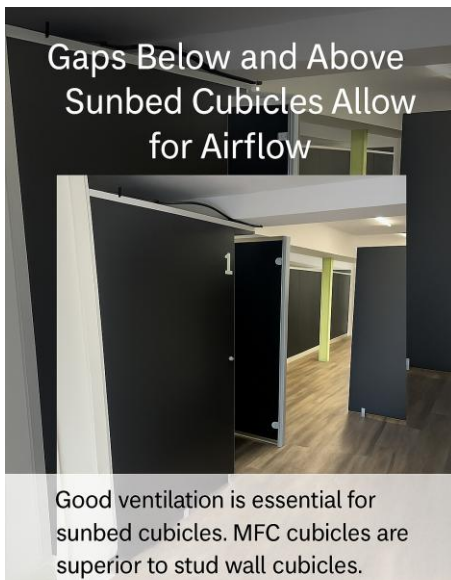

- ✅ Fast nationwide delivery (5–10 working days)
- ✅ Made to measure for tanning salons and leisure spaces
- ✅ Speak to your sunbed supplier for ventilation advice
