VAC-EX SAFE EXCAVATION WITH A HELPING HAND

We were tasked by our client to create a 30.0m x 2.4m x 1m deep trench at Hampton Water Treatment Works.

Normally an operative would control the suction hose of the Vac-Ex, but on this occasion, we needed to be a minimum of 1.5mts away from the edge of the trench we were creating. To achieve this, we fabricated a special attachment for the Brokk 160 robot, which enabled us to have complete control of the suction hose remotely whilst maintaining a safe distance.

CASTLE & PRYOR IN ACTION

We have re-visited a project we worked on in 2021, helping restoration of Blunder Lock on the Stroud Valley Canal.

Using track and wire sawing we created a recess for an additional ladder.
