

OUR HISTORY

1985: Hinderclay. Focusing on sub contract work for poultry modules. Facility houses welding tools, guillotine and press brake.

1989: Moves to Redgrave, marking period of growth and expansion.

1989-2000: Company acquires assets from Wrightfield Engineering, expanding workforce and capabilities, establishing a foothold in the food sector.

2000: Company moves to Eye, Suffolk, purchasing the site and constructing the main framework of the building.

2005: Wrightform is established as a separate entity.

2000: Wrightfield has grown substantially and has diversified their offerings. Along with office space there are also dedicated manufacturing workshops for stainless and mild steel.

2023: Facility is extended to 24,000 Sq Ft to house additional fabrication and profiling machinery.

MANUFACTURING & SERVICE CAPABILITY

With over 40,000 Sq Ft of office and development space, we are well served to offer our customers the best possible design and build services.

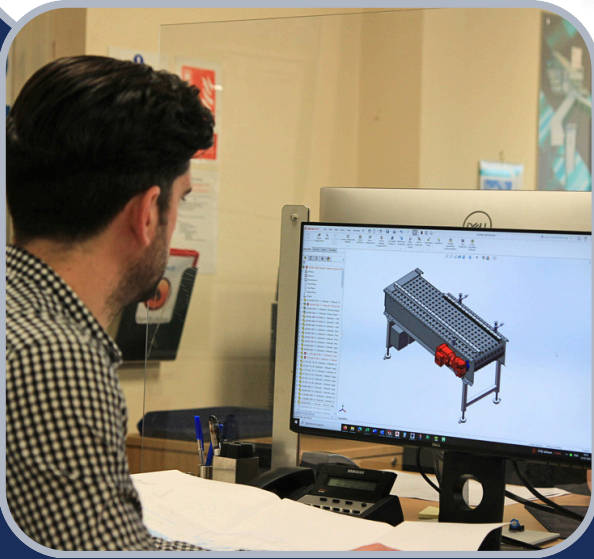

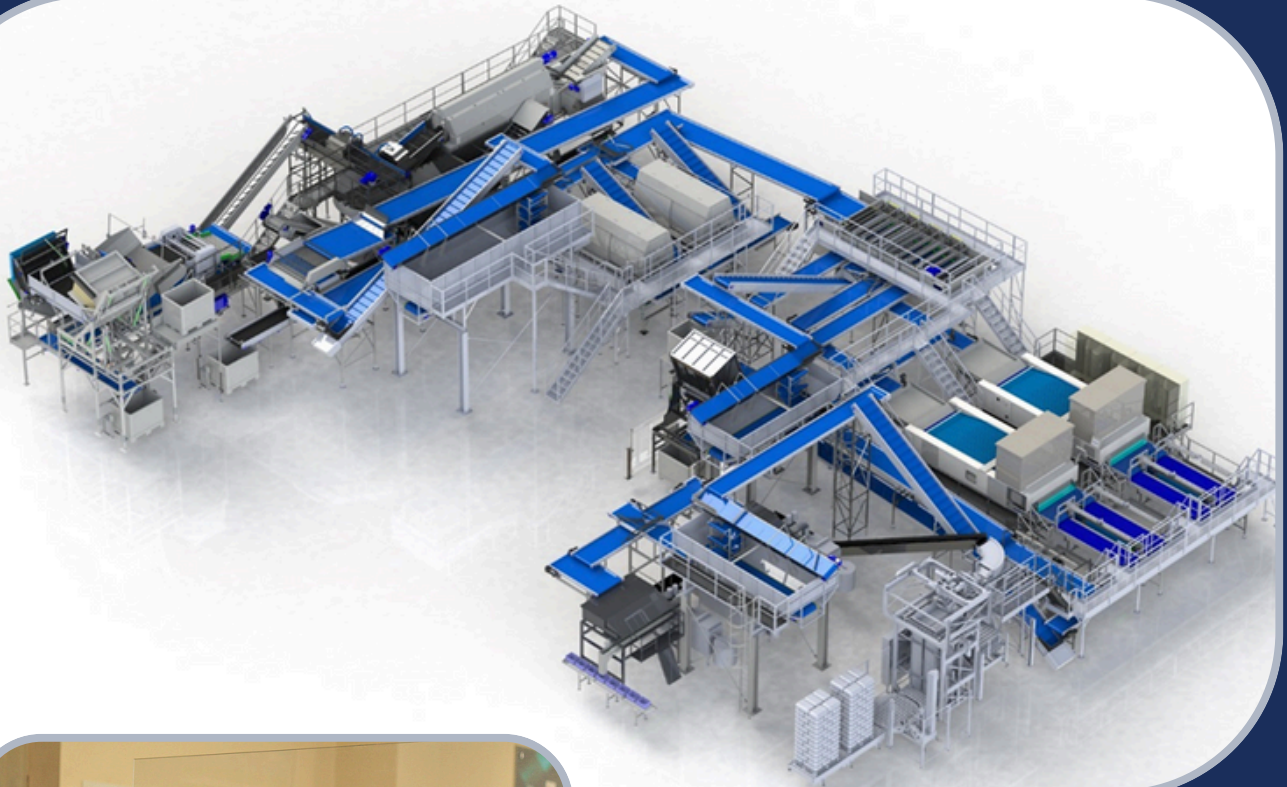

- Consultancy / Design / Planning
- Process Conveyors
- Architectural
- Platforms & Mezzanines
- CNC Machining
- Process & Agricultural Machinery
- Spares and Servicing Support
- Finishing Services
- LAPS
- Pro Load
- Vision Systems

DESIGN & PLANNING

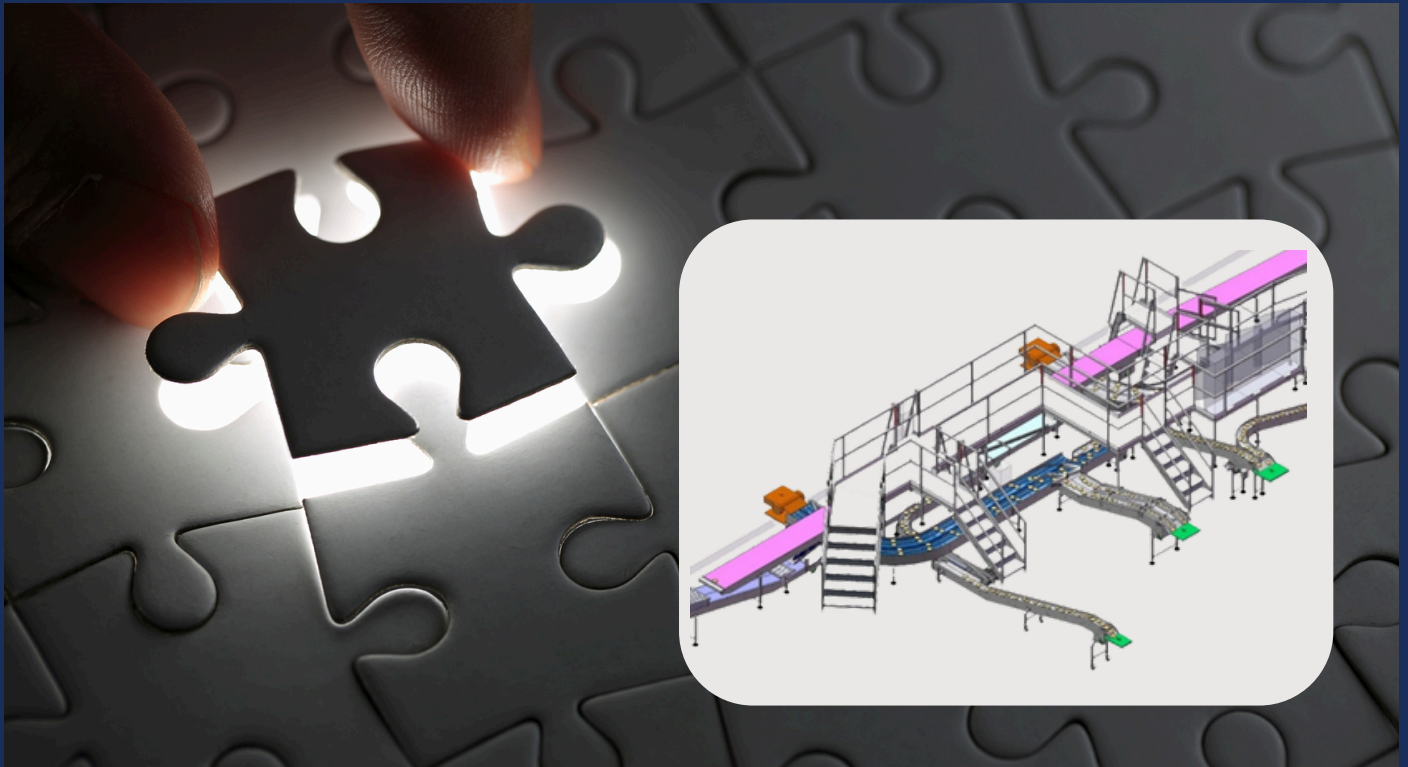

- **Qualified Engineers:** Certified professionals with deep expertise.
- **Experienced Designers:** Crafting practical and appealing solutions.
- **Automation Experts:** To improve quality, efficiency and productivity of connected components and processes.
- **Comprehensive Consultancy Services:** Delivering plant layout optimisation and product flow analysis to enhance production and to support your operational success.

CUSTOM SOLUTIONS

With decades of expertise in process conveyors, structural steelwork, and bespoke machinery, we can provide custom solutions to meet exact customer requirements.

- Custom conveyor layouts and configurations to streamline the movement of products between different stages of processing.
- Integration sensors and automated mechanisms to ensure precise handling.
- Custom add-ons and design elements to allow seamless integration and to enhance existing systems.
- Design and manufacture of bespoke machinery tailored to meet unique processing challenges.
- Customised industrial steel frameworks designed to fit within new or existing facility constraints.

PROCESS CONVEYORS

At Wrightfield, we specialise in designing and manufacturing custom process conveyors that optimize efficiency and reliability for diverse industries

- Flat Belt Conveyor
- Inclined Belt Conveyor
- Decline Belt Conveyor
- Roller conveyor

- Slat Chain Conveyor
- Spiral Conveyor
- Shuttle Conveyor

- Bi-Directional Conveyor
- Multi-Lane Conveyor
- Radius Conveyor

From belt conveyors to complex modular systems and integrated vision systems, our tailored solutions are designed to streamline operations and enhance productivity in any processing environment.

EXCLUSIVE MANUFACTURING PARTNERSHIPS

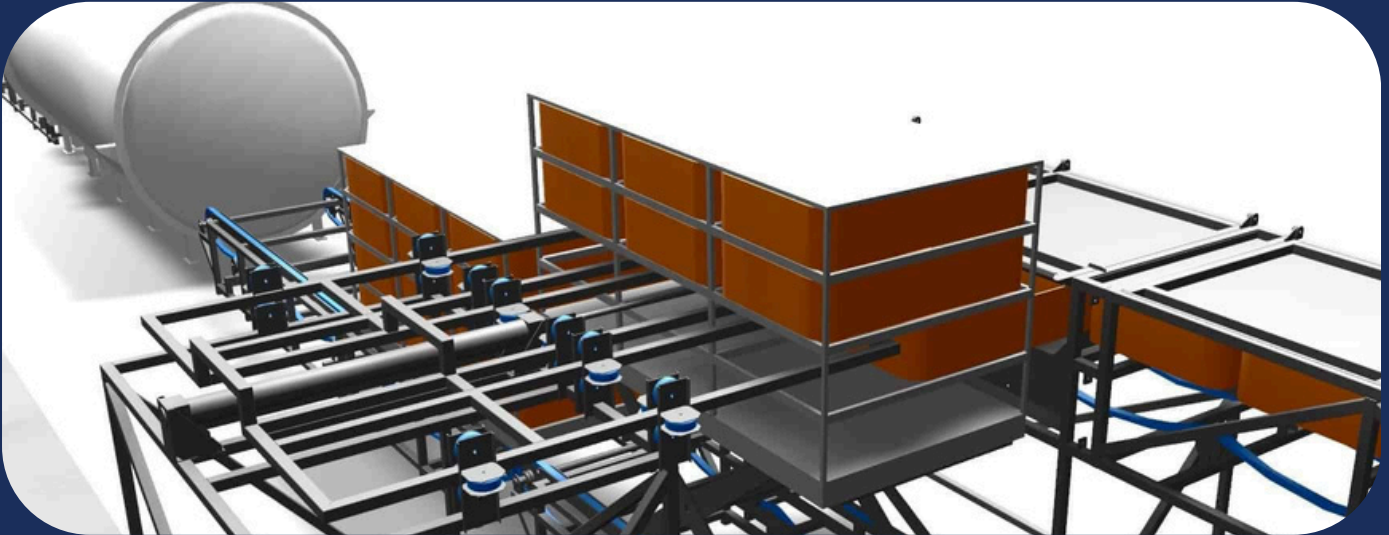

At Wrightfield, we specialise in exclusive partnerships, manufacturing complete products and systems for companies like FAM and Tramspread

- **Food Equipment Manufacturing:** Complete food dicers for FAM, tailored for superior cutting performance.
- **Seamless Integration:** Ensuring products integrate smoothly into their operations.

- **Agricultural Machinery:** Hose reeling and slurry spreading equipment for Tramspread.
- **Bespoke Solutions:** Delivering custom-engineered systems to meet specific requirements.

Pro Load - An advanced system designed for the efficient and humane loading of live birds, reducing stress and improving handling during transport.

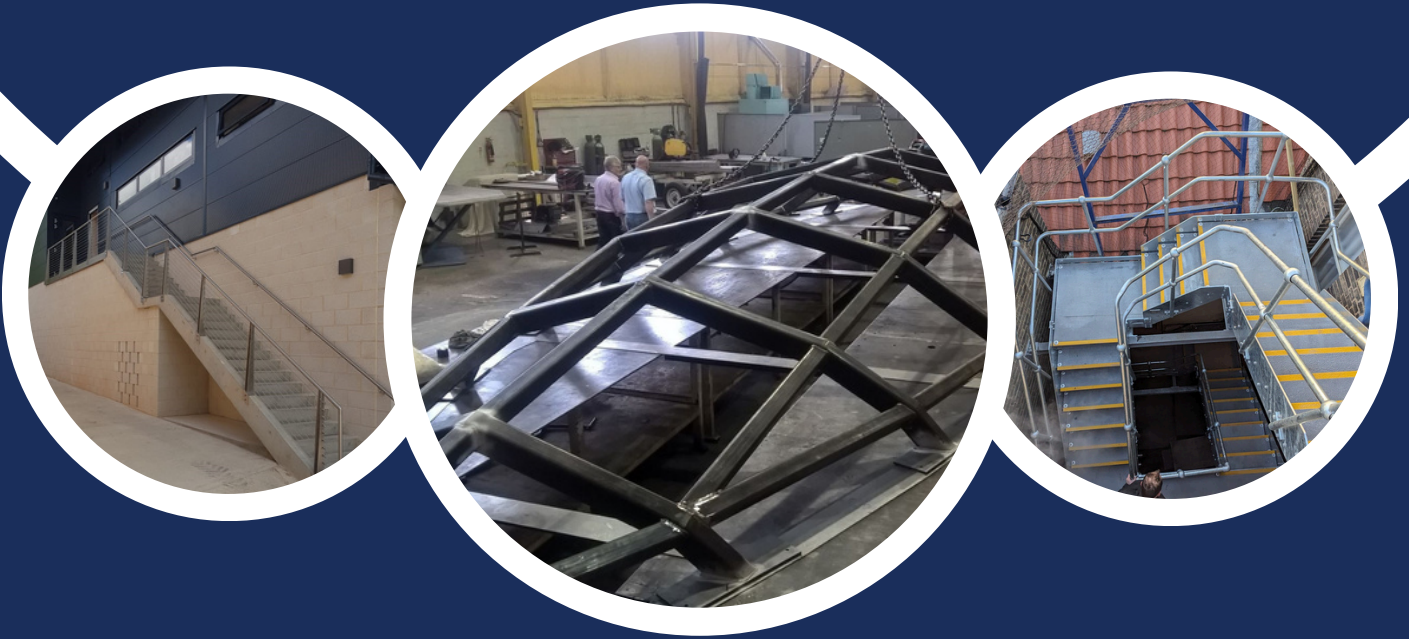

LAPS (Low Atmospheric Pressure Stunning): LAPS is a humane stunning system with the lowest hazard ranking of any stunning method.

Pro Load and LAPS can be integrated to create a seamless live bird handling process, ensuring both efficient loading and humane stunning, enhancing overall welfare and operational efficiency.

EN-1090 STRUCTURAL ACCREDITATION

The EN 1090 certification ensures our steel and aluminum structures meet strict European safety and quality standards.

- ✓ Mezzanine Floors
- ✓ Balustrades
- ✓ Handrails
- ✓ Staircases
- ✓ Fire Escapes
- ✓ Walkways & Platforms
- ✓ Canopies
- ✓ Facade Supports

Wrightfield offer structural steelwork, either fabricating products from customer's detailed drawings or working with the customer to design and manufacture a bespoke solution.

Products are manufactured to the highest quality and to exact customer specifications.

MAINTENANCE, SPARES & SERVICING

Comprehensive Servicing, Spares, and Maintenance Solutions for Optimal Performance.
