Call Point

Tablet Based Messaging Solution

Call Point is a customisable messaging platform which can be configured to provide instant messaging to staff throughout the site.

Call Point can be configured with one to six on screen call buttons each one carrying it own label and colour option.

Call Point provides clear visual information displaying Called when any button is activated.

Each on screen button can be configured to send specific messages to individual pagers or groups of pagers.

Call Point offers options to operate as a stand alone system or can be part of a network offering extensive range and site coverage.

Call Points smart rechargeable pagers provide the ultimate in message reception with a clear bright OLED display and are rated IP68 waterproof.

Whatever your messaging requirements Call Point offers the flexibility and customisable options to fit your specific needs.

Call Point has no limit on range, with Call Points unique RF technology even the largest sites can receive full coverage.
