- A less stressful waiting experience for patients
- Reduced congestion improves the waiting experience
- Reduced congestion means less stress
- Patients feel valued
- Reduced congestion in waiting areas creates a better working environment

Patient Confidentiality

- Eliminates the need to call out patients names
- Protects patients identifiable information as defined by the NHS
- Promotes the NHS commitment to deliver a first class confidential service to patients
- Protecting a patients identity contributes to the NHS code of practice in respect of confidentiality

working with the

Saving Staff Time

- Searching for and calling patients can be time consuming, patient paging systems eliminate the need to find a patient
- Issuing a patient pager allows consultants, nursing staff and clinicians to call patients directly at the press of a button
- Once a patient pager is issued patients know they will be called the moment they are due to be seen, this reduces the desire to recheck the appointment status
- Patients are less likely to walkaway from appointments, and once called will promptly attend, reducing the time staff wait or look for patients

Coverage & System Details

- High power transmitter provides extensive range
- Networked site wide coverage
- Allocated frequency for pagers (no interference with other devices)
- Bespoke systems with up to 1,000 pagers
- Simple Operation
- Expandable (add additional pagers as required)
- Antibacterial Plastics to Help with Infection Control
