BITLogix's Hybrid Mobile Applications

Building a Sustainable Tech Ecosystem

At BITLogix

We deliver robust, cross-platform mobile experiences that optimize field operations, enhance customer engagement, and enable real-time insights with a single codebase for iOS and Android.

1 **Cross-Platform Mastery**: Deep experience across Flutter, .NET MAUI, Xamarin, and hybrid web stacks.

2 **End-to-End Delivery**: From UX mockups to CI/CD, store certification, and post-launch support.

**3** **Industry Focus**: Retail, healthcare, logistics, finance, and education domains.

TECHNOLOGIES ⌄

.NET MAUI	Flutter	MQTT	Firebase	Supabase
MLKit	MediaPipe	Xamarian	Dart	Syncfusion

FEATURED APPLICATIONS ⌄

1 **EPOS Analytics Platform**

Field teams gain daily sales insights, outlet prioritization, SKU performance analysis, and intervention impact evaluation— all visualized through interactive charts.

2 **ASDA StockWise**

Inventory management for ASDA's Customer Availability Programme, providing real-time stock visibility and operational support.

3 **Queue Management**

Parents request child pick-ups within geofenced zones via mobile; schools view real-time alerts on a web dashboard using lightweight MQTT messaging.

4 **Virtual Try-On**

Live makeup and hair-color overlays using face mesh detection and selfie segmentation for an immersive virtual experience.

5 **DKL Patient & Rider Apps**

Patient App: Lab test booking, pricing, quotations, scheduled and on-demand services.
Rider App: Task assignment, optimized routing, live tracking, sample collection, and deliveries with notifications.
