# Microsoft Fabric Expertise

Empowering Businesses with End-to-End Analytics Solutions

## Microsoft Fabric Services by Data Bear

### Fabric Consulting & Implementation

From strategic roadmaps to hands-on deployments, tailored to your data ecosystem.

### Data Engineering & Warehousing

Scalable dataflows, Lakehouses, and pipelines with Spark and SQL integration.

### Real-Time Analytics

Stream data via Event Streams and KQL. Deliver live dashboards with DirectLake

### Power BI + Fabric Integration

Optimised semantic models with lightning-fast performance.

### Fabric Training & Enablement

Custom sessions for analysts, engineers, and decision-makers.

### Migration & Governance

Migrate from legacy systems and implement robust governance.

## Our Fabric Solutions

Service	Highlights
Lakehouse Architecture	Centralised analytics with unified storage
Spark & Notebooks	Machine learning-ready data exploration
Dataflows Gen2	Automate data ingestion and transformation
DirectLake Models	High-speed Power BI reporting
Event Stream Analytics	Live dashboards and alerts
Governance & Security	Role-based access, lineage, and compliance

Let's build a data culture together

powered by Microsoft Fabric and driven by Data Bear.
