- Backfitting Units with Optic Display Rail (P.O.A.)

### **Free delivery on U.K. Mainland**

*Offshore or Scottish Highlands may attract additional carriage charges*

**MOVERBars have been a perfect solution for our venues where we required semi-permanent and professional looking builds that can easily be moved. Using a combination of front and back units we have constructed temporary bars that are solid, robust and easy to work with but are easy to move when required. A variety of different units with optic rails, cocktail stations and even draught pours enabled us to construct the perfect bar for each of our venues. Servaclean were great to work with, they visited our site to help us make the right decisions and were flexible with all our requested changes right up until the delivery day.**
