- What is the OH4 Heat Transfer System?
- How the OH4 Heat Transfer System works.
- Success stories.
- What do we need from you?
- The mission, the vision and the passion.

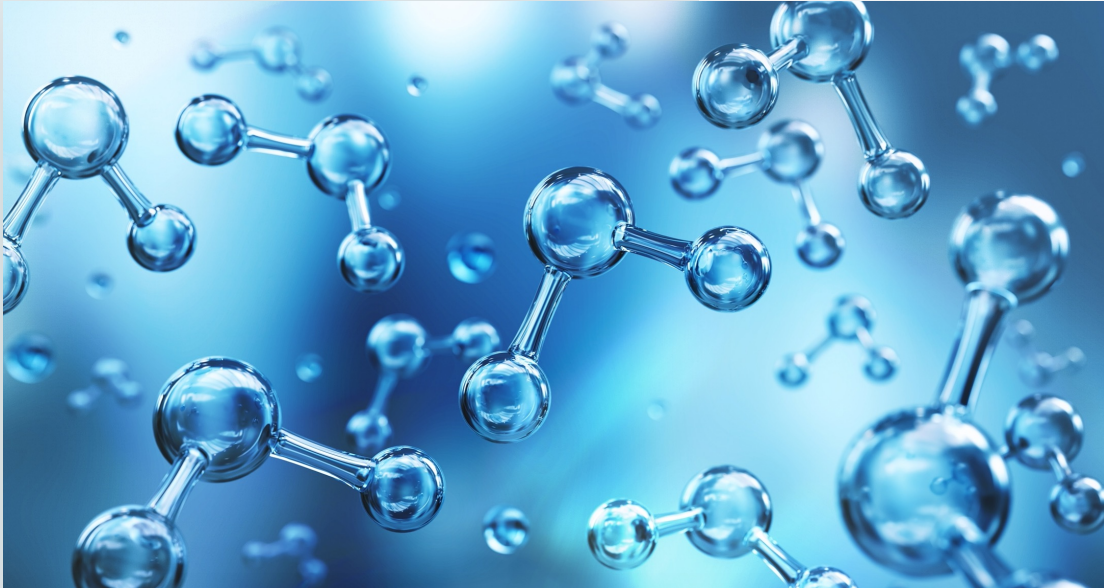

# What is the OH4 Heat Transfer System?

- OH4 works with existing heating/cooling systems and has a non-invasive installation procedure.
- OH4 reorganises water molecules by using the unique preprogrammed magnetic Heat Transfer System.
- OH4 makes heating/cooling systems more efficient by reaching the desired temperatures more effectively.
- OH4 guarantees to reduce energy costs and reduces environmental impact.

## How the OH4 Heat Transfer System works.

These pictures are representations of water molecules.

The top image shows the water molecules moving around in a disorganised manner with the molecules 'bumping' off each other and with no element of control.

The bottom image shows the water molecules linked together in an organised manner.

OH4 uses magnetic frequencies to link the water molecules together to allow them to flow more efficiently through the pipe system.

Organising the molecules in this way increases the number of Hydrogen/Oxygen bonds.

It is the vibration of Hydrogen/Oxygen bonds that gives water its amazing heat transfer properties and by organising the bonds in this way the OH4 Heat Transfer System improves the heat transfer properties of the fluid.

# Success stories

- Headland Hotel
- This iconic location had a need to reduce energy costs and reduce their carbon footprint.
- After 6 months the savings were approaching £16,000
- Based on the current figures OH4 will save them in excess of £300,000 over 10 years.

# Success stories

Follaton House, C.H.A. Guest House, Totnes

- Follaton House
- Follaton House is a location with an oil-fired boiler.
- In the first year OH4 saved them in excess of £600
- Based on the current figures OH4 will save them in excess of £6,000 over 3 years.

# The mission, the Vision, the Passion

## **The mission**

- The mission OH4 has is to reduce the impact water-based heating and cooling systems have on the environment whilst also providing guaranteed savings for our clients.

## **The vision**

- Steve had a vision that with small changes amazing things can happen.

## **The passion**

- The whole team at OH4 have a passion to put OH4 on every heating/cooling system in the UK (and potentially beyond) and prove that the vision Steve had is more than achievable.

What do we  
need from  
you?

Information required	Information provided
Number of locations	
Number of boilers per location	
Oli, gas or other	
Boiler Kw size	
Pipe diameter	
Boiler room location	
Do you have a heat source pump	
12 months' gas bills
