

New Ecotile anti-fatigue tiles.

Game changing simplicity.

Simply insert into Ecotile original E500/7 flooring to create more comfortable workstations for your team.

- Use within an Ecotile modular floor to create an uninterrupted no-trip floor finish
- Choose original Ecotile for heavy-wear areas used by forklifts etc, and integrate anti-fatigue floor tiles around workstations and where your employees need them the most
- Can be used for unusual non-standard layouts around machinery
- No more need for loose anti-fatigue matting
- Heavy-wheeled equipment won't curl or move Ecotile anti-fatigue tiles
- Easily lift and move to other areas of your Ecotile floor system should you need to change your operational layout
- Shore rating of 62 Standard ISO Shore A (soft) for a more comfortable performance (vs 92 for Original Ecotile floor tiles)
- Connects with all original E500 Ecotile industrial floor tiles, ramps & accessories
- No glue or adhesives are required, simply lay-and-use
- Available in a 7mm black ergonomic raised disc surface finish
- Can also be used to create a standalone anti-fatigue area on top of an existing subfloor. Simply add yellow ramps around the anti-fatigue tiles to provide a safe, no-trip, highly visible yet more comfortable workspace for your colleagues

Using anti-fatigue flooring is an investment in the well-being and productivity of employees, and it can contribute to creating a safer and more comfortable workplace.
