

Looking for world-class
metal component solutions
that don't cost the earth?

Then take
a closer
look inside...

For more than three decades we have been providing customers all over the world with high quality, innovative and bespoke photo etching for metal components. From telecommunications and aerospace industries to automotive and electronics, our particular depth of expertise is within highly-regulated industries or those with critical high-tolerance requirements, and by combining the latest technology with quality processes, we're able to deliver an unbeatable combination of fast turnaround, exceptional service and genuine value for money.

Your total metal component
solution for materials
13 microns thick and upwards.

- Photo-etching
- FREE photo-tooling
- Component forming
- Wire erosion
- Burr and stress free processing
- Finishing
- CNC machining
- Shimpacks
- Dampershims
- Metal stamping

An appetite to stand out for all the right reasons.

Quality

We believe that great quality shouldn't have to cost the earth. We have unrivalled quality management systems in place to guarantee exceptional quality for every project, no matter the size or complexity.

Added value

Our on-going commitment to excellence makes us leaders in our field. Our approach is based on innovation, reliability and partnership – working to provide complete metal component solutions, whatever the client challenge.

Reliability

We understand the importance of a 'right first time' approach. We always keep our promises and importantly, our lead times, delivering exceptional service and genuine value for money.

Client focused

Our approach isn't 'standard' or off-the-shelf. We pride ourselves on our ability to innovate and pioneer new ways of doing things.

Don't just take our word for it...

"A pleasure
to deal with,
our best
supplier "

"I wish all
our suppliers
communicated
as efficiently as
Qualitetch "

"Excellent
quality and
responsive to
our needs "

"The technical
development
and support
supplied is
excellent "
