About Centurion Tanks

We have 75+ years history in the manufacture and supply of Oil Tanks and Fuel Stations designed and made in the UK. Our tanks are made from high grade, virgin Medium Density Polyethylene ensuring that our products are durable and long lasting.

All of our products conform to the BS EN 13341 & OFS T100 standard which is the highest standard possible and come with industry leading warranties. Our single skin oil tanks come with a 5-year warranty, bunded tanks come with a 12-year warranty and both of which come with UV stabilisation

All products are manufactured in our factory in Worksop, Nottinghamshire keeping transportation costs down and allows us to be ultra competitive on pricing. Before any product leaves the factory, it goes through a rigorous testing and quality control process. Being based in the Midlands also ensures fast nationwide delivery or collection from our pick up points around the UK.

Bunded Oil Tanks

With over 75 years of combined industry experience, you know you are in safe hands when you entrust our centurion brand to handle your customer base needs. We have worked with thousands of end consumers and tank installers all around the country and we have listened to all their feedback. This has allowed us to refine our process over decades to ensure that what we deliver to you is the best you will find on the market. Practically speaking, this means tanks which are easy to install as well as reliable to stand the test of time for more than a decade themselves. This is why our bunded oil tanks are covered by a market leading 12-year warranty, if they are inspected annually by a Centurion Tank approved operative.

ACCESSORIES

Centurion can provide fixtures and fittings to accompany your tank or as stand alone products. We aim to give our customers the choice so our tanks can come with full electronic gauge and fittings pack, clock style gauge and fittings pack or are available as tank only with appropriate provision provided for customers to fit their own gauges if required.

FITTINGS KIT

This installation fittings kit comes with filter bowl and lever valve, a roll of PTFE tape and a reducer.

FLOAT CLOCK GAUGE

This easy-to-use float clock gauge helps you monitor the level of liquid within your heating tank, so you know when to book a delivery to top up and don't get caught short.

APOLLO ULTRASONIC STANDARD ELECTRONIC OIL TANK GAUGE

Uses a transmitter on top of the tank and ultrasonic level measurement technology to measure continually the level of the oil tank.
