The Blayson Group Ltd

What Do They Do

Blayson is a leading specialist in the manufacture and supply of a complete range of investment casting wax materials and technical services to foundries worldwide, serving the aerospace, industrial gas turbine, medical, automotive and commercial markets from specialist wax manufacturing and laboratory facilities in the UK and Japan.

How Did We Help

The project brief was to reverse engineer a Filter Press Plate that our customer could no longer purchase a replacement for because of its age. The customer shipped the part to our offices, where our design team measured and recreated the part using 3D CAD software. We then produced the necessary 2D drawings to facilitate the manufacturing of a new replacement part.

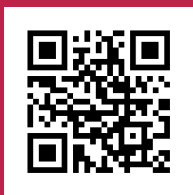

First time using A4 Plus and I will be a returning customer. Steve and his team did a fantastic job CADing a filter press plate for me and my company. Great communication throughout and a pleasure to work with. I would highly recommend A4 Plus.
