Whether you're refreshing a bathroom, transforming your kitchen, or reimagining your living spaces, our collection offers durable, stylish, and easy-to-install options to suit every room — and every taste. From contemporary textures to classic finishes, our décor products bring lasting beauty and practicality to your home. Explore the best in modern interiors — expertly selected for quality, innovation, and design.

VOX has been one of the most innovative brands involved in designing and manufacturing both internal and external wall panels in Europe for 30 years. VOX wall panelling is designed with attention to detail, quality and with functionality in mind; as a result, you can create a beautiful and complete interior totally suited to your needs, individuality and lifestyle. VOX also manufacture sub-brand Vilo.

SPECIAL ORDER

NON-STOCK FLOORING & WALL PANELS

PanelStone®
GENUINE NATURAL STONE FINISH

Panel Stone wall panels create a strikingly beautiful space with realistic brick, stone, and slate design.

With a moulded real crushed stone surface, you get the natural look and feel of traditional brick and stone materials but with much reduced installation time and cost.

SOLID WATERPROOF T&G WALL TILES - LARGER SIZE

These larger sized tiles offer a stylish and practical solution for walls requiring a spacious, modern aesthetic. They retain the durability and waterproofing Dumawall is known for, but their larger size results in less tiles for a more seamless look. Ideal for creating a streamlined, expansive design in bathrooms, kitchens, and other wet areas. Installation is quick and grout-free due to the unique Dumawall jointing system. Finishing trims to suit are shown on page 29.

VILO SPC SOLID WALL TILES

Beautiful and unique, Vilo Solid Tiles are durable, long-lasting and have a high resistance to impact. These 100% waterproof wall panels are produced using SPC (Stone Polymer Composite) technology.

100% waterproof when correctly installed, these panels protect the wall from moisture and are suitable for showers, bathrooms and other areas exposed to potential water contact.

Easy and intuitive to install without the requirement for grout, they can be applied on a variety of surfaces including over ceramic tiles, so are perfect for new construction or renovation projects.

INSTALLATION
WITH GLUE

DIY, NO NEED FOR A
PROFESSIONAL

CUSTOMISED TECHNOLOGY

SPC
technology

Manufactured using SPC (Stone Polymer Composite) technology these panels are based on a hard composite core, which in turn has been coated with a decorative layer, and protected with a UV-resistant coating. This gives the panel a high resistance to scratches and damage. Thanks to the T&G design, the installation of the panels is simple and intuitive, and the joints are very subtle and do not require grouting.

LINERIO

Slat panelled walls with depth

S, M & L-LINE

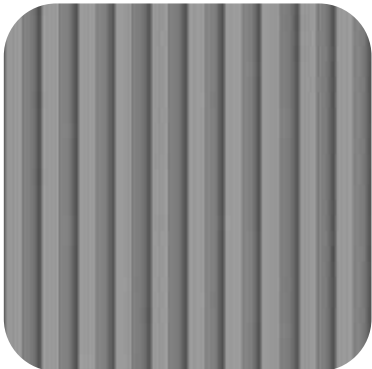

VOX Linerio is a stand out product in our solid panelling range. This decorative interior lining material imitates timber slat panelling and is available in three sizes - small, medium and large, which vary in width and depth of slats. Simple to fit and complimented by matching finishing trims, Linerio adds unique character and a touch of class to any interior. Mount them vertically, horizontally or diagonally – these panels allow you to designate different zones in your interior.

Dumafloor offers a quiet, stylish, and simple solution for any space. With sound reduction up to 21dB and an integrated underlay, it is the ideal choice for both living and working spaces. Thanks to the extra strong click connection, you can install Dumafloor quickly and hassle-free, even without completely leveling the subfloor. Each tile is completely waterproof thanks to the patented RCB® technology. Furthermore, the PVC floor tiles are highly resistant to scratches and stains, easy to maintain, and have a high anti-slip rating. Additionally, Dumafloor floor tiles are finished with a micro V-groove, ensuring clean joints and less maintenance.

SPC (Stone Polymer Composite) vinyl flooring has high moisture and scratch resistance, making it ideal for high traffic areas and areas exposed to water, such as kitchens and bathrooms. Thanks to the use of polymer technology, SPC floors have high rigidity, durability and strength. SPC vinyl flooring is designed to identically replicate traditional, natural flooring materials and add elegance to any interior. SPC floor panels are a complementary product to SPC wall panels shown on pages 12-13. Both use the same patterns, but the entire flooring collection is matt and the panel itself has a stone-like look. This flooring collection creates décors with colours inspired by concrete and marble.

WATERPROOF

The SPC flooring is suitable for installation in kitchens or bathrooms, is completely waterproof and has an R10 anti-slip certification.

UNDERFLOOR HEATING SUITABLE

The product is suitable for rooms with underfloor water heating and its technical parameters make it ideal for use in flats and houses.

HIGH ABRASION RESISTANCE

The panels have a very high abrasion resistance (AC5/33), which makes them suitable for spaces that are used very intensively.

DROP LOCK

The i4F connection (called drop lock) ensures that the assembly provides a tight connection.

Representing something totally different to the UK market.

Panel Stone is as practical as it is beautiful.

PanelStone®
GENUINE NATURAL STONE FINISH

Panel Stone wall panels create a strikingly beautiful space with realistic brick, concrete, and slate design bringing a touch of class to any wall to which they are fitted. With a real stone surface, you get the look and natural feel of traditional materials with colours and textures that need to be seen and touched to be believed.

The innovation of Panel Stone is the unique construction - a natural top layer of moulded real crushed stone applied to a base layer of polyurethane high density foam. This combination creates a highly authentic visual finish which is 100% real to the touch. This method of construction means that Panel Stone is strong and durable but also lightweight and easy to handle and transport resulting in reduced installation time and costs when compared to traditional natural materials.

AVAILABLE TO PURCHASE ON SPECIAL ORDER ONLY

BRICK

Available in this range are four brick effect finish options. Recreate the authentic look of a beautifully restored natural brick wall. Perfectly imperfect for that timeworn visual effect in your home or business premises.
