

43% of UK businesses were hacked last year.

That's almost half of all businesses... including small ones.

Most didn't even realise they were at risk... until it was too late.

Cyber Securing Your Business

88% of UK businesses have never heard of Cyber Essentials.

That's millions of businesses left potentially vulnerable, unaware and unprotected.

Cyber attacks don't just target big companies. Small businesses are hit every day, and often suffer the most damage. From financial loss to reputational harm, even a minor breach can derail your operations.

We're a Cyber Essentials Certification Body. We've helped many business owners just like you protect what they've built.

Getting protected is easier than you think:

1. Book a FREE Consultation
2. Get Assessed
3. Get Certified

Don't wait until something goes wrong.
Protect your business before a hacker gets there first.
