Roof Lanterns & Rooflights

Transforming the way families
enjoy their home

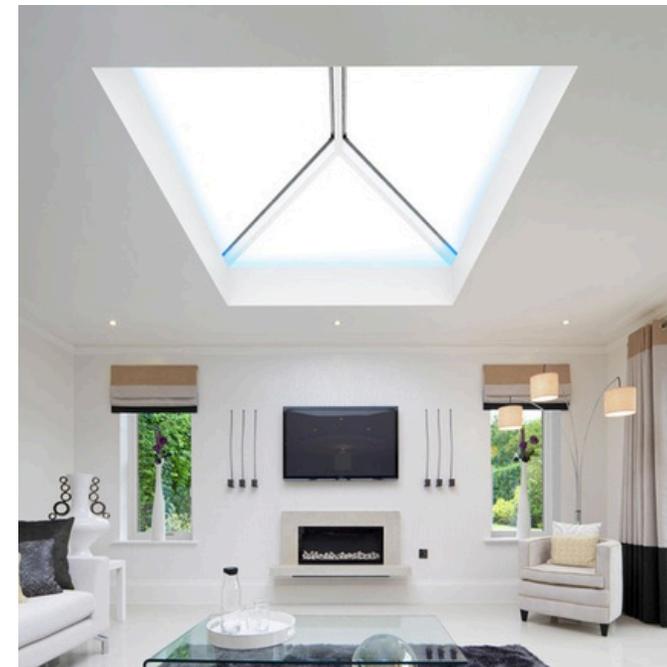

Sheerline S1 Roof Lantern

The UK's most secure, sustainable & stylish roof lantern

The Sheerline S1 Roof Lantern incorporates innovative features to create a warmer, slimmer and secure roof lantern that allows in the maximum amount of light and that offers amazing day and night time views.

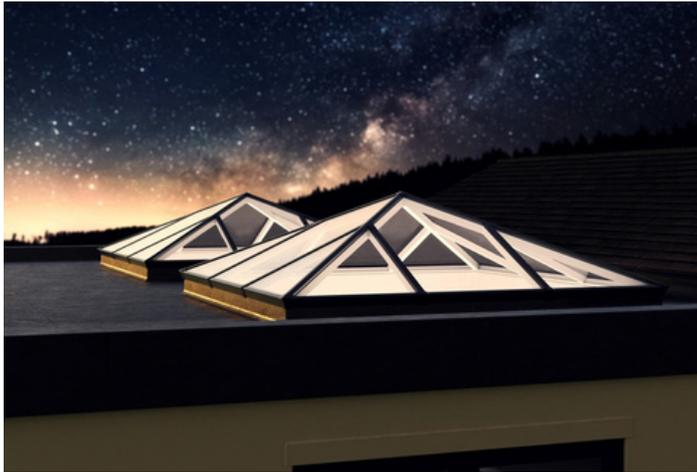

The S1 combines slimmer sightlines, with exceptional thermal efficiency and is the UK's most secure roof lantern.

Understated refinement, contemporary looks and exacting standards

The S1 features ultra slim sightlines and low line aesthetics so rafter and hip top caps sit close to the glazing level on the exterior, creating a sleek modern look.

S1 Lanterns also feature an integral LED light channel around the perimeter of the roof lantern giving you an easy way to add mood lighting and create that finishing touch for your interior.

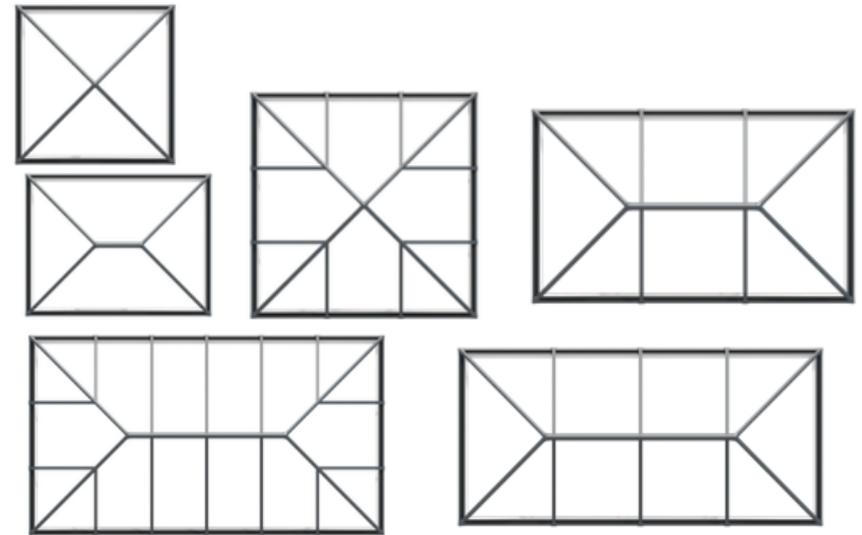

Wide range of styles and sizes to suit every project

Available in a choice of 13 styles, from square pyramid, to grand rectangular options suitable for larger 'orangery' style installations.

Maximum size up to 3.2m wide by an impressive 6m long, with a 25° pitch and all weather rated for the whole of the UK.

A 3 way option allows for larger spans to be catered for without the need for jack rafters.

Colour range

S1 Lanterns are available in three standard powder coated colours, with the option to choose a different colour for the interior. Other bespoke colours are available.

BESPOKE

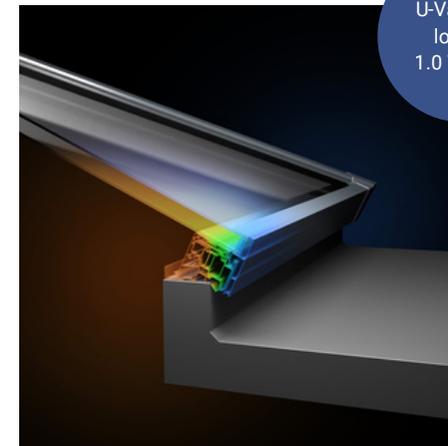

Keeping heating bills lower with Thermlock® technology

The S1 lantern combines sleek aluminium design with outstanding thermal efficiency, thanks to the Thermlock® multi-chamber design.

Engineered to withstand even the harshest UK weather, it keeps your home warm and well-insulated.

Combined with high-performance 28mm glazing, the S1 delivers superior thermal performance—far exceeding that of traditional polyamide systems using 24mm glazing. A unique co-extruded perimeter seal further enhances protection by keeping out draughts and rain. 28mm glazing also allows acoustic dampening glass to be fitted if required.

U-Value as
low as
1.0 W/m²K

SheerVent - reimaged, intelligent ventilation

SheerVent with its sleek minimalist design sits perfectly flush with the S1's discreet rafter bars and with powered actuators that are intelligently automated, SheerVent offers reliable ventilation without the risk of leaks.

Fully thermally broken and using the same high-performance 28mm glazing, it offers the perfect option to ventilate a room and prevent excessive heat build up.

Choosing an optional rain sensor can automate the closing of your roof vent for added peace of mind.

Security - the UK's most secure roof lantern

The S1 features

- Anti-tamper screws
- Enclosed anti-tamper glazing
- Security tape
- Patent pending glass lock
- High security ridge end

The S1 is already one of the most secure roof lanterns in the UK and now comes with an optional Secured by Design (SBD) upgrade. SBD is a police-backed initiative that identifies products that offer increased levels of security. This upgrade adds an extra layer of defence, providing extra peace of mind that your S1 aluminium roof lantern is secure enough to withstand opportunist criminals.

This optional security upgrade is invisible on finished roofs and doesn't compromise the stylish design or thermal performance that Sheerline products are known for.

Eurocell Skypod

Creating inspiring interiors with styles to suit every home

Transform your home with a Skypod roof lantern – the perfect way to flood your space with natural light and elevate interiors.

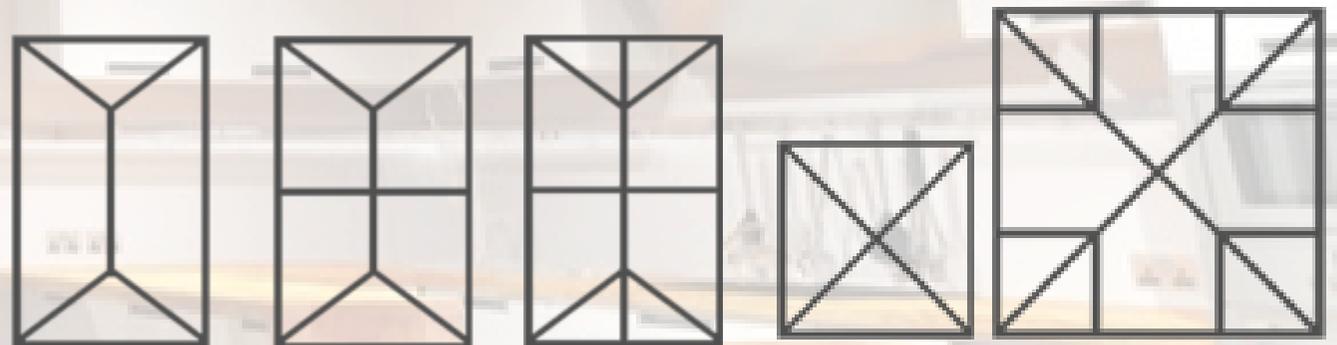

Available in a wide variety of sizes and styles, a Skypod lantern lets you design a roof feature that reflects your home's unique character. Whether you're working on a flat-roofed extension, orangery, new build, kitchen-diner, or garage conversion, a Skypod is a stylish and versatile solution that brings light and life to any project.

With its clean lines and sleek looks, a Skypod will add real height and volume to your room. You can also enjoy unimpeded views with a no side rafter option.

Wide range of styles and sizes

Whether you're looking for a small rooflight or a large gazebo-style lantern roof, there's a solution for you.

An energy efficient solution

Skypods can achieve exceptional U-values as low as 1.0 W/m²K, offering outstanding thermal efficiency. This significantly reduces heat loss through the rooflight, helping to maintain a comfortable indoor temperature year-round—and ultimately saving you money on your heating bills.

U-Value as low as 1.0 W/m²K

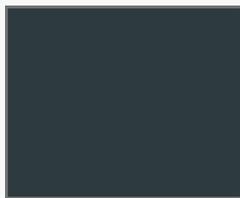

Style your space with colour

Create a look that complements the individuality of your home, choose from a range of colours from single, dual colour and wood effect finishes.

Eurocell Luma Rooflight

Illuminate your world - creating vibrant living spaces

Luma flat rooflights are elevated, fixed shut, flat roof windows with a sleek and contemporary look.

Unlike roof lanterns, there are no bars across the glass to interrupt your view of the sky or cast shadows across your room.

They're the perfect way to flood your home with natural light. So, whether you're planning a new flat roof extension or want to breathe life into an existing one, adding Luma flat rooflights will totally transform the space.

Better by design

Engineered with exclusive, market-leading features built in as standard, delivering a premium-quality product that sets the benchmark for performance.

All Luma rooflights are made to measure, allowing you to create a solution that perfectly fits your space and style.

From 500 x 500mm
up to 1400 x 3000mm

An energy efficient solution

Luma's aluminium frame has an integrated thermal break, which reduces heat transfer. So you'll stay cool in summer, warm in winter and save money on your energy bills.

Available with double or triple glazing, Luma can achieve exceptional U-values, as low as 0.92W/m²K.

U-Value as
low as
0.92 W/m²K

Secured from the inside

Luma is the only flat rooflight designed to be fixed from the inside, offering enhanced security and peace of mind.

Integral drainage system

The outer frame includes a unique drainage system that allows moisture to drain away outside.

Slimline, sleek looks

Luma's sleek aluminium frame and unique glazing tape mean there are no chunky frames or painted borders.

The inside is beautifully finished with a PVC plasterboard trim and there are no bars across the glass to impede your view. The result is minimal framework and maximum daylight.

Weather-resistant powder-coated frame

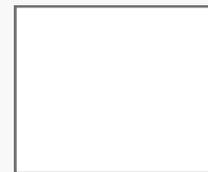

Luma is built to withstand everything the British weather can throw at it. Its aluminium frame is powder coated for durability and has a UV resistant, weather-tight seal.

High performance self-cleaning glass

Luma features self-cleaning glass. It has a special coating that uses UV rays to break down organic matter on the surface, which then washes away when it rains. As a result, the glass stays cleaner for longer, greatly reducing the need for frequent cleaning.

High performance, self cleaning, glass is included as standard. Tinted glass still allows the light to flood in but reduces uncomfortable glare when the sun hits the glass.

Conservatory Roofs

Eurocell Conservatory Roof System

From classic to contemporary

Whether you are installing a new conservatory or upgrading an existing one, they are the ideal way to extend any home, providing a bright, airy room that connects the house and garden, giving homeowners valuable extra space.

The Eurocell Conservatory Roof System combines outstanding aesthetics with durable, low-maintenance performance—expertly engineered for long-lasting reliability and designed to ensure faster, more efficient installation

Whether your style is traditional or modern, there's a design to suit every home and personal taste—from timeless classics like Victorian, Edwardian, gable-end, and lean-to styles, to sleek, contemporary options

Extra finishing touches

Ornamental features like Jacobean or Regency finials and crests are a great way to add an extra flourish. Even structural components like box gutter supports can add to the ambience when combined with decorative gallows brackets.

Roof vents

Manual or electric roof vents can be incorporated, with optional automatic climate control systems.

Benefits

- Range of styles – lean-to, Victorian, Edwardian, P-shaped or Gable-ended
- Faux orangery style option
- Energy efficient U-values as low as $1.0\text{W}/(\text{m}^2\text{K})$
- Variable pitches $2.5^\circ - 45^\circ$
- Quick and easy to install
- 10 year guarantee

U-Value as
low as
 $1.0\text{W}/\text{m}^2\text{K}$

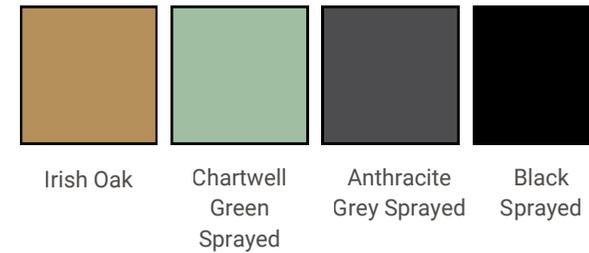

Profile colours to frame the view

Along with the standard colour range of brilliant White, Cream, Rosewood, and Golden Oak, the traditional conservatory system also offers the option of four special colour specifications – Irish Oak, Black, Anthracite Grey and Chartwell Green.

Standard colours

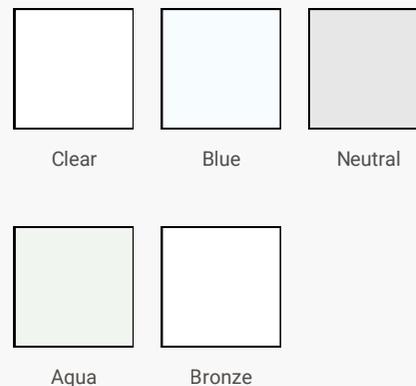

Made to order

Glazing

Glazing options include standard toughened glass, Perfect Day glass or polycarbonate. Perfect Day glass range features a revolutionary dual action self-clean coating as standard. Activated by sunlight and rain, the self-cleaning coat lasts the lifetime of the glass.

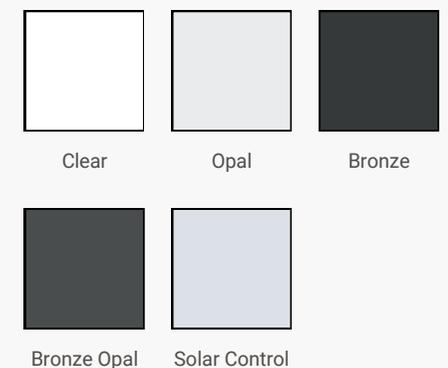

A solar control option is also available, which reduces heat build up without costly air conditioning.

Polycarbonate colours

A popular alternative to glass, multi-wall polycarbonate is available in a choice of colours and thicknesses, providing different levels of thermal efficiency to a conservatory roof.

This lightweight material offers extra heat and noise insulation, as well as preventing glare.

SupaLite Tiled Conservatory Roof System

Creating all year round living spaces

The SupaLite Tiled Roof Systems is an easy to install market leading, lightweight roof system. It's the ideal choice for replacement conservatory roofs, extensions or new build applications, turning conservatories into comfortable all year round living spaces.

SupaLite uses a lightweight, aluminium frame, 185mm of humidity-proof insulation, a waterproof membrane and sturdy tiles to create a resilient conservatory that can withstand the UK weather!

Benefits of a SupaLite Roof

- Creates a year round living or entertaining space
- Maintains a comfortable temperature in summer and winter
- Saves money on heating costs
- Meets all building regulation requirements
- Transforms a conservatory into an extension
- Adds significant value to your home

Ultra-Modern or Traditional

Choose from different roof styles and tile colours to complement a period home or contemporary property. The lightweight slate roof is authentically shaped with textured surfaces and edges moulded from traditional slates, making it almost indistinguishable from the real thing!

This lightweight slate will not crack, break or delaminate – offering durability, performance and longevity.

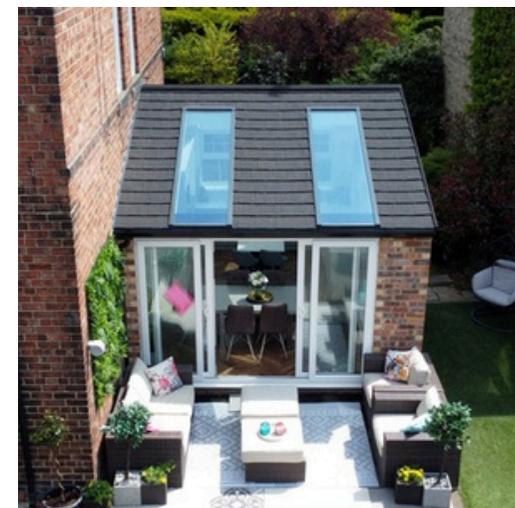

SkyVista

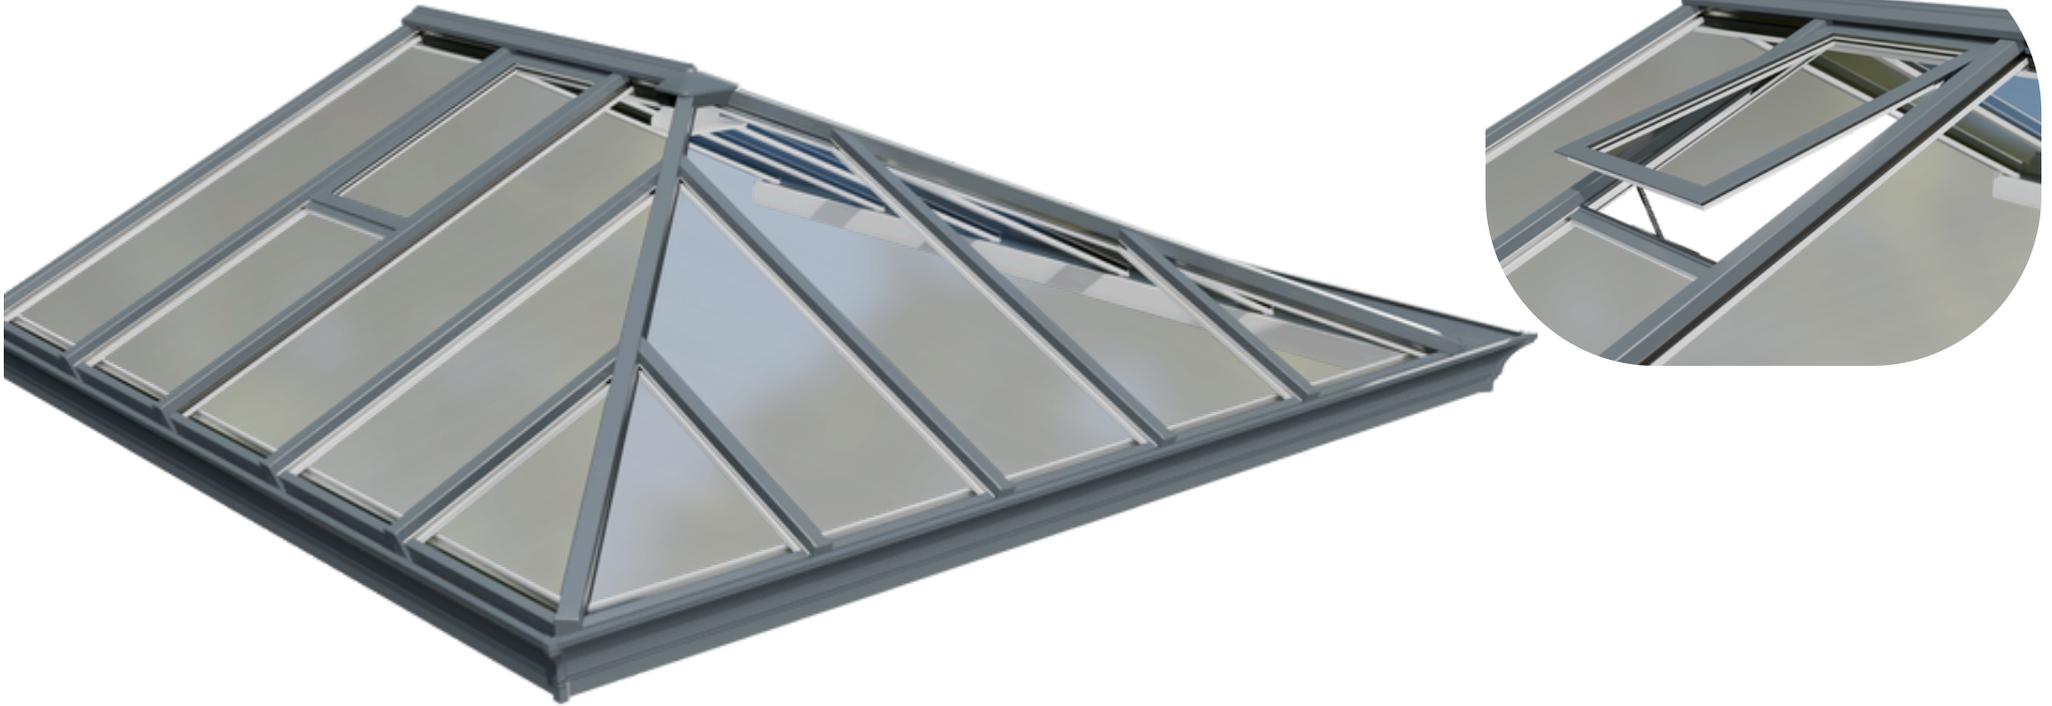

A practical blend of lightweight tiles and glass panels - controlling the temperature whilst making the most of the natural light.

The ultra-chic SkyVista offers a practical combination of lightweight tiles or slate finishes and glass panels, offering you the best of both worlds. It allows you to transform your space without losing overhead natural light and boasts excellent aesthetics along with great solar control.

SkyVista glass panels are self-cleaning and can be configured for a variety of conservatory roof styles they come in two colour options, blue and neutral. With a 60% solar heat reflection, that still allows 45% of natural light into the building!

Sheerline S2 Conservatory Roof

The S2 Conservatory Roof with its modern design has been designed to provide a 'best in class' glazed roof solution for conservatories, glazed sunrooms, orangeries, extensions and larger spaces. Its squared aesthetics offer an up-to-date appearance, plus Georgian, Victorian and Lean-to styles can be combined with valleys and box gutters to form a variety of designs.

The S2 is an ideal solution for creating Victorian inspired garden rooms with authentic period styling, adding a sense of grandeur but with modern performance and low maintenance.

Integrated eaves beam bolsters provide enhanced support for wider openings, making them ideal for spaces featuring bifold or sliding doors.

Colours

As standard the S2 is available in white, rosewood and a grey grained foil, other bespoke colours are also available.

ROSEWOOD

GREY GRAINED
FOIL

BESPOKE

Gutter Shroud

The S2 gutter shroud has been designed to provide a premium 'orangery' style gutter line with a stylish superior finish. The gutter shroud can be coated in any RAL colour to match the frame.

Internal Pelmet

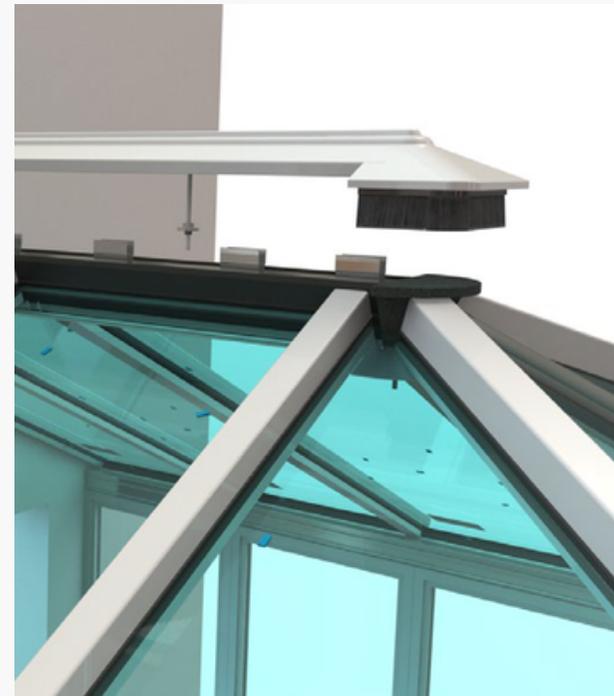

The internal pelmet creates an orangery style feel with premium looks and is the perfect way to add perimeter light to a conservatory.

Ridge & Wall Plates

The sleek yet strong S2 ridge system captures all the design principles of the new S2 roof.

A low profile ridge capping ensures the top line of the ridge is clean and modern for the contemporary design, but this can be upgraded to a more traditional feel with a selection of cresting's and finials.
