Specialists in High-Performance Aluminium Solutions

DRS are manufacturers and suppliers of high-performance, innovative commercial doors and shopfronts, designed to meet the demands of modern high-usage environments.

Our mission is to deliver high quality products that are functional, secure, energy-efficient, and visually appealing.

At DRS our commitment to exceptional customer service means that from the moment you place your order, you'll receive support and clear communication at every step. We're here to make sure your experience with us is smooth and hassle-free, from your initial inquiry through to delivery and support.

We are proud to offer reliable delivery to most areas across the UK, ensuring your products arrive safely and on time. We care about our customers and our planet; and promise to make the most efficient journeys we can in the most effective way to help reduce our carbon footprint.

JD47 Non-Thermal Door & Shopfront

The JD47 Non-Thermal Shopfront and Commercial Door System offers the ideal non-thermal solution for a wide range of commercial applications.

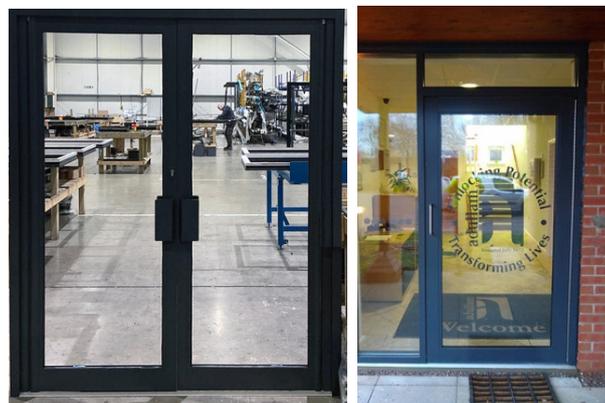

Robust and secure, JD47 is well suited for high-traffic commercial and public-sector buildings such as shops, car showrooms, leisure facilities and schools.

Specially designed to offer top levels of security, a 22mm glazing height on the beads means a greater glass coverage and higher resistance to attacks on the glazing units.

A proven high-performance system, JD47 remains one of our most popular ranges for commercial applications where non-thermal partitioning is required. The system has a large range of design options available, including 4 header bar solutions for standard and automatic doors, single or double door configurations and a range of shopfront and internal partitioning options.

The JD47 Non-Thermal Shopfront and Commercial Door System has been specially designed to offer fast fabrication and fast fitting on site. A superior punch tool facility is also available for door preparation.

- > Wide range of design solutions
- > Improved security with integral external beading
- > 50mm sightlines for both single and double glazed doors
- > Extensive range of thresholds available
- > Superior punch tool facility available for door preparation

- > Cut length service on door stiles
- > Single or double glazed
- > Glazing options 6-28mm,
- > Frame depth 47mm
- > RAL colours, optional dual colour

Applications

- > Commercial
- > Schools
- > Leisure Facilities
- > Retail Premises
- > Offices
- > Car Showrooms

TD68 Thermal Door & Shopfront

The Jack Aluminium TD68 Thermal Door and Shopfront System is one of the most thermally efficient, high usage commercial systems on the market.

This durable system is an ideal choice for high-traffic areas such as retail spaces, schools, medical facilities, sports and leisure, local authority buildings, and commercial facilities that require thermally efficient door sets and shopfront façades. It provides excellent thermal performance and security features, along with versatile design options, making it suitable for both retrofit and new-build projects.

Emergency Exit Option (Single and Double Doors)

Emergency exit doors are notoriously difficult to secure from the outside, but the TD68 door offers a safe, highly secure and cost-effective solution, with a unique rebated low threshold, rebated door stile option as well as anti-snap security cylinders.

Remote Access Option (Single and Double Doors)

Commonly door entrances that are required to be secured at all times are vulnerable to security tampering. To solve the problem of lock tampering on commercial doors we developed highly secure and cost-effective solutions for social housing, schools, hospitals and offices. Our remote access doors achieve SBD compliance and this can be achieved with a motorised multipoint lock or with two electromagnetic locking mechanisms.

- > Durable to withstand harsh, heavy use environments
- > Tested hardware for both single and double doors
- > RAL colours, optional dual colour
- > Exova BM TradaQ marked product, certification available upon request
- > Door and shopfront tested to PAS 24 and BS:EN 6375, parts I, II and III

- > Emergency exit and remote access options
- > U-Values as low as 1.7 W/m²K
- > Curved finger guard
- > Unique design for concealed panic bars
- > Cut length service on door stiles
- > Side lights and fan lights tested to PAS24

Applications

- > Housing
- > Retail
- > Sports & Leisure Facilities
- > Medical Facilities
- > Schools & Educational Buildings
