What is the CES Repacking Service?

CES provide a fully bespoke cleanroom consumable repackaging service, carried out within a certified ISO Class 5 cleanroom environment. This service enables products to be repackaged precisely to customer specifications.

- Creating bespoke pack sizes
- Applying multiple layers of packaging
- Providing your own consumables for repackaging
- Gamma irradiation

The facility ensures consistent, batch-processed production with full traceability. Certificates of irradiation can be supplied as required, supporting regulatory and quality assurance needs.

What can be repacked using this service?

Here's just a snapshot of the wide range of cleanroom consumables that we can repack to meet your specific requirements.

- DuPont Tyvek® garments and accessories
- Gloves, gauntlets and oversleeves
- Cleanroom wipes
- Goggles
- Stationery items, including tapes and labels
- Overshoes and mob caps
- Bespoke requirements
- Isolator cleaning tools, cuff rings and port sleeves

To find out more about our cleanroom repack service and how it can support your processes, please get in touch by emailing us at sales@cesltd.uk.com or visit our website.
