

SPECIFICATIONS: HERITAGE MEADOWMAT®

- **PRODUCT ORDER CODE** MEAD-ROOF
- **STANDARD SIZE** 0.5m² Slabs
500mm wide (19.6")
1000mm long (39.3")
- **ALSO AVAILABLE** 1.0m² Rolls
500mm wide (19.6")
2000mm long (78.7")
- **SOIL THICKNESS** 20mm (0.78")
- **WEIGHT PER M²** 20kg – saturated weight may be up to 25kg
- **GRASS HEIGHT ON DESPATCH**

Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

All measurements are approximate and taken when harvested.

- **GROWTH** Harrowden Heritage Meadowmat® is a blend of a slow growing grass and 21 native wildflowers that have been selected for their ability to grow in shallow, poor nutrient soils. Most of the species are perennial which means they will flower every year if the conditions are suitable. The specially selected grass ensures year-round coverage. Harrowden Heritage Meadowmat® was originally designed as a quick-to-install green roofing material but is just as happy when installed on the ground. Harrowden Heritage Meadowmat® will contain mature plants, root fibre and enough soil to maintain the plants during establishment.
- **TYPICAL SEED MIXTURE*** 10% Native Grasses
90% Native Wildflowers
- **SOIL CLASSIFICATION** Grown on bespoke extensive substrate.

HERITAGE MEADOWMAT® WAS ORIGINALLY DEVELOPED AS A QUICK-TO-INSTALL GREEN ROOFING MATERIAL WITH INSTANT PLANT COVERAGE. HOWEVER, IT IS JUST AS HAPPY ON THE GROUND!

**The RHS Plants for Pollinators mark is only given to plants that support pollinating insects. Find out more at rhs.org.uk/plantsforpollinators

FEATURES: HERITAGE MEADOWMAT®

■ FEATURES

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time consuming than plug planting.

Biodiverse and pollinator-friendly providing a valuable source of nectar and food for many species of insects and birds.

Contains mainly perennial species to ensure a varied display each year.

Environmentally-friendly requiring no fertilisers or pesticides.

A mixture of grass and wildflowers for year-round interest.

Low maintenance – does not require regular mowing.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil or specialist roofing substrate.

IDEAL FOR:

BIODIVERSE LANDSCAPING SCHEMES

BIODIVERSE LIVING ROOFS

LOW MAINTENANCE AREAS

COMMERCIAL LANDSCAPING

URBAN AREAS AND PARKS

DOMESTIC GARDENS

**As sown. The actual percentage of each species contained may vary due to environmental factors. Harrowden makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual, bi-annual and perennial species. If installed after March many species may not flower during the first year.*
