## LOW NUTRIENT TOPSOIL

■ **PRODUCT ORDER CODE** SOIL-LOW NUTRIENT

■ **STANDARD SIZE** 600 litres

■ **WEIGHT** 660kg

■ **COVERAGE** 24m<sup>2</sup> (28.7yd<sup>2</sup>) to a depth of 25mm (0.98")

*This product is sold per bag. Actual weight will depend on moisture content at the time of bagging.*

### ■ DETAILS

A British Standard (BS3882:2015) tested Loamy Sand Topsoil screened to 10mm, suitable for the establishment of species-rich wildflower areas. This predominantly sand based soil has a fine single grain structure, making a friable soil ideally suited for planting, turfing and seeding. The very low organic matter content ensures a low fertility status and has no contaminants that are considered toxic to plants, human life or the environment. Slightly alkaline, this soil suits plants with a wide pH tolerance.

### ■ USES

Establishment of species-rich wildflower areas.  
Wildflower turfing and seeding.

### ■ COMPOSITION AND COLOUR

**A SPECIALLY BLENDED  
LOW FERTILITY SOIL  
ESSENTIAL FOR  
ESTABLISHING A  
WILDFLOWER AREA.**
