

# Staff Pagers

FROM LRS UK

# Staff Pager Systems

- Staff Management
- Create a better experience for guests
- Compatible with LRS Connect

## SP4 Staff Pagers

SP4 Pagers allow staff in all industries to conveniently be recalled as quickly as possible. LRS Pagers can be used anywhere in the building to summon staff immediately. It has been successfully used in a wide range of industries. With this high-capacity rechargeable battery, this pager will operate for up to 48 hours.

Restaurants and bars use our SP4 pagers extensively as waiter pagers, where kitchen staff can quickly recall waiters to collect food and deliver it to waiting customers.

Improve your customer wait times and your employees' performance with LRS Staff pager systems. These pagers can integrate with CaptureCall, which allows managers to analyse the data and identify areas of improvement to improve productivity.

- 4 LEDs indicators
- Shock Resistant casing
- Strong Vibration
- Easy to use
- 48-72 hour battery life
- Nickel metal hydride batteries
- Long Range
- Leather cases available
- Anti-microbial coating available

## 4-Line Staff Pagers

The 4 Line Alpha Text Pager is an excellent device for staff paging. The system can be adapted to the needs of ALL sectors and can be configured to suit your work style. The staff pagers receive a four-line message of 160 characters from anywhere in the building.

One of the greatest features of the 4 line paging system is the swipe technology that can be used on our LRS UK Call buttons. As soon as the pager is swiped across one of the call buttons, the page is cancelled and a message is sent informing other staff that the request has been resolved. There is no other pager on the market that offers this as a feature.

- Improve the performance of your staff
- Deliver a faster, more efficient service to your customers
- Reduce wait times
- Increase customer satisfaction
- The system can be used to recall first aid personnel
- The system is highly reliable
- It is compatible with LRS call buttons
- 160 Character message to send custom messages to staff
- Return on your investment

## Watch Pagers

A very robust watch pager with a very bright display, this device offers features not found on most watch pagers. Using a simple USB power supply, this watch pager can be recharged and can easily last over eight hours.

Whatever industry you are in, this smartwatch pager is designed for staff that are constantly on the go during their working hours.

- Improve the performance of your staff
- Deliver a faster, more efficient service to your customers
- Comfortable fit on the wrist
- The system is highly reliable
- It is compatible with LRS call buttons and other LRS products
- The Alpha Watch Pager has vibrate or beep that can be selected accordingly
- Can be customised and programmed
- Battery is on-board and rechargeable
- Auto on and off
- Excellent warranty cover

## LRS UK Transmitters

LRS premium transmitter with embedded SMS mobile phone messaging.

The **LRS T7470 Freedom transmitter** can be Internet-connected and serves as the central hub that facilitates paging of LRS pagers, texting to customer mobile phones, and data collection for online reporting. When placed into Guest mode, the Connect Transmitter records times between service intervals vs. operational goals, offering insights into true service, delivery, or wait times.

Low cost Kitchen to waiter restaurant paging solution

The **T9560EZ** one touch transmitter from Long Range Systems is probably one of the top transmitters in the world today in restaurants for many reasons. It's a one touch transmitter for 20 pagers, it has the ability to message a total 999 users without any upgrades or costs so its unlikely you will out grow it at any stage in your restaurants development. The unit includes a rechargeable battery or can be mains driven.

## VueText

VueText LED message receiver is perfect for communicating with staff who are not always able to look down at a individual pager.

In a environment where individual staff pagers are not practical the VueText LED display can be used to notify staff that they are needed or it can be used to detect and inform staff of a machine fault.

- LED Message Receiver available for all sectors across the UK
- Monitor automatic machinery
- Quickly communicate with staff
- Cost effective solution to improve staff response times
- Integration with CaptureCall™
