DeafSafe™
FROM LRS UK

FIRE ALARM - PLEASE
EVACUATE IMMEDIATELY
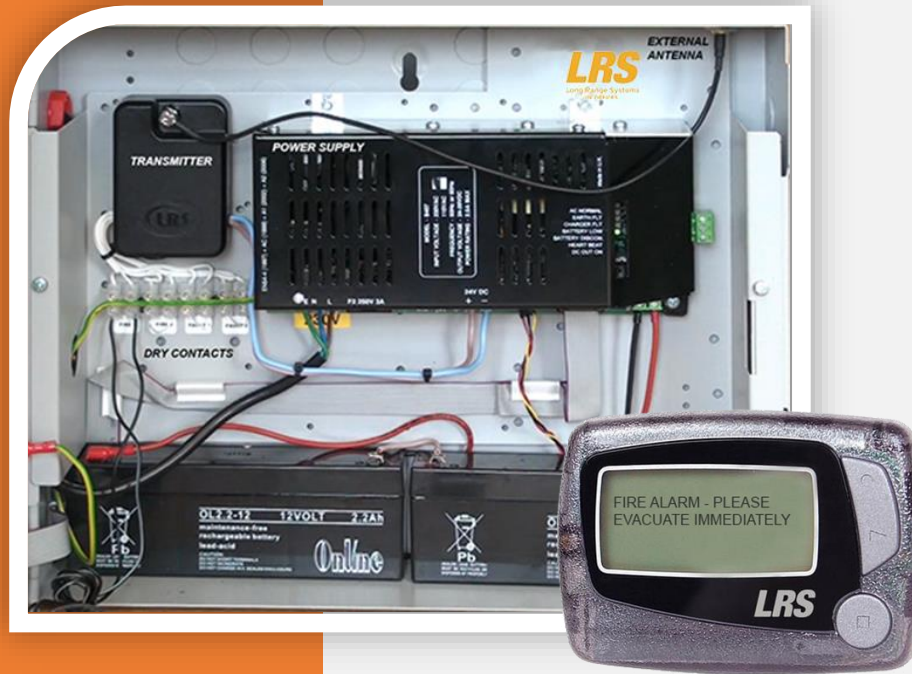

LRS

DeafSafe™ Pagers

- Alerts the deaf & hearing impaired in the event of fire
- Visual AND vibrating alert via LRS alphanumeric pagers
- Compatible with ALL fire alarm control panels
- Expandable to cover any size of building

What are DeafSafe™ pagers for?

The new Deafsafe™ Integra from Long Range Systems UK is a breakthrough in cost-performance for the safety of the deaf where fire is involved.

As a manufacturer LRS technology has revolutionised over 40 different industries and is set to change the way you think about paging in the fire safety industry.

DeafSafe™ pagers can page anyone who is hard of hearing informing them they need to leave the building immediately when a fire alarm has been triggered.

The Law

The law here in the UK recently changed regarding hard of hearing and deaf people and fire alarms on-site. Systems have to make deaf and hard of hearing persons on-site be aware of emergencies and fire alarm activations so that they can leave the premises immediately.

FIRE ALARM - PLEASE EVACUATE IMMEDIATELY
