SIT, the best technical application solution in power transmissions

SIT develops, engineers, manufactures and distributes high-quality solutions and components for industrial power transmission applications worldwide, driven by the challenges of increasing productivity for customers' machines and systems.

This comprehensive range includes belts and pulleys for friction and synchronous drives, keyless self-locking units, chain drives, ball bearings, planetary gearboxes, gear and backlash couplings, as well as bespoke solutions manufactured to individual customer requirements.

SIT products are constantly updated to meet the most advanced application requirements. Using a sophisticated test laboratory and a focus on application engineering solutions, SIT offers a broad portfolio of products and solutions for every technical application, from the lightest to the heaviest duties.

ELATECH, leader in the development and manufacture of polyurethane belts

Since its inception, Elatech has always focused on the demands and challenges of its customers, designing optimum solutions to match specifications.

Today, professionalism, experience and reliability make Elatech belts ideal for both simple and complex applications in linear motion, precise and synchronised transportation, lifting and power transmission.

The Elatech product portfolio includes an extensive range of high-performance profiles, providing premium technical solutions for every application.

Elatech products supplied by BE Power Transmission are designed, manufactured and optimised with static and dynamic tests, providing the best application solution in precision conveying systems.

BANDO, products for high quality and reliability

The Bando success story began back in 1906 with the manufacture of cotton power transmission belts in Japan. Today, Bando is a global corporation specialising in the research, development and production of rubber and plastic products.

Bando is a world leader in the field of engineering rubber and plastic products. Bando drive belts have a worldwide reputation for high efficiency, product innovation and high standards of quality, delivering products using advanced engineering and device technology.

For transmission systems, Bando produce some of the very best products on the world market today. All manufacturing is carried out to ISO-9001, TS16949 and ISO-14001 standards, giving customers the highest possible confidence in the quality and performance of their belts and ensuring that all products are highly uniform and consistent.

BE, Manufacturers and suppliers of drive belts, bearings and couplings

BE Power Transmission was originally formed as Bradford Engineering Services back in 1988 to service the industrial market with a fast and efficient supply of bearings, seals and power transmission products.

Engineering experts

Our team has multiple years of experience in design, manufacture, and supply of specialist belting. Relied upon by a vast number of companies for our expertise in Power Transmission and specialist belt application engineering.

Specialist applications

Recent investment in state of the art machinery allows us to perform more operations in house than ever before. Our skilled belt technicians are welding, grinding, and coating timing belts on a daily basis.

Global connections

Based in Bradford, West Yorkshire our customer base spreads across the whole of the UK and Europe. We represent world renown manufacturers SIT, Elatech and Bando.

Elatech Head Office, Via Fonte Solforosa, Val Brembilla, Italy.

BE Power Transmission is part of the BE Group Ltd.

Focused on providing great service

We've been supplying high quality engineering products for over 30 years. We focus on providing great service and swift delivery – often the same day – by holding stock of key items and from the flexibility we can offer as an independent company.

BE Power Transmission, Head Office and Trade Counter, Bradford.

Get in touch

We are happy to discuss orders or enquiries over the phone or please feel free to contact our team. We look forward to hearing from you.
