

## Wireless CCTV

If you are seeking protection for a vulnerable site or building, which may be experiencing or at risk of unwanted intrusion, vandalism, or damage, we offer a straightforward and cost-effective solution.

[Webeye battery-powered CCTV cameras](#) can be a straightforward and cost-effective way to enhance security and monitor vulnerable sites or buildings.

These cameras are often used in remote or temporary locations where traditional wired surveillance systems may not be practical.

Some key benefits of battery-powered CCTV cameras like Webeye might include:

They can be easily moved to different locations as needed, making them versatile for various security needs.

They don't require complex wiring, which means faster setup and less disruption to the site or building.

They can be a more budget-friendly option compared to traditional wired systems, especially in situations where a permanent installation isn't necessary.

Modern battery-powered CCTV cameras can be connected to remote monitoring systems or apps, allowing users to keep an eye on the site or building from anywhere.

The presence of visible cameras can act as a deterrent to potential intruders or vandals.

### **Our detection system offers the following features:**

- Affordable pricing starting from £100 per week.
- Quick installation within 5 – 7 working days.
- No need for on-site power, wiring, or Wi-Fi.
- Rapid transmission of images to a central monitoring center within 1 minute of activation.
- Avoids expensive false alarm response charges through video verification.
- Easy installation on scaffolding, site walls, or remote locations.
- Convenient arming and disarming options through a keypad or timed schedule.
