Isitwood Traditional Twin Post Tee Sign

Durable, stable and sustainable...

Ken White Signs are excited to unveil the new isitwood product, further enhancing our huge range.

The isitwood tee signs are available as standard with a square or peaked top. Panels are manufactured as standard with a printed/matt laminated alloy composite panel.

Other sizes and shaped tops are available on request.

LIGHT OAK

DARK OAK

Available in 2 different Timber Effects (above)

Peaked top version, with hole plan and sponsor panel included

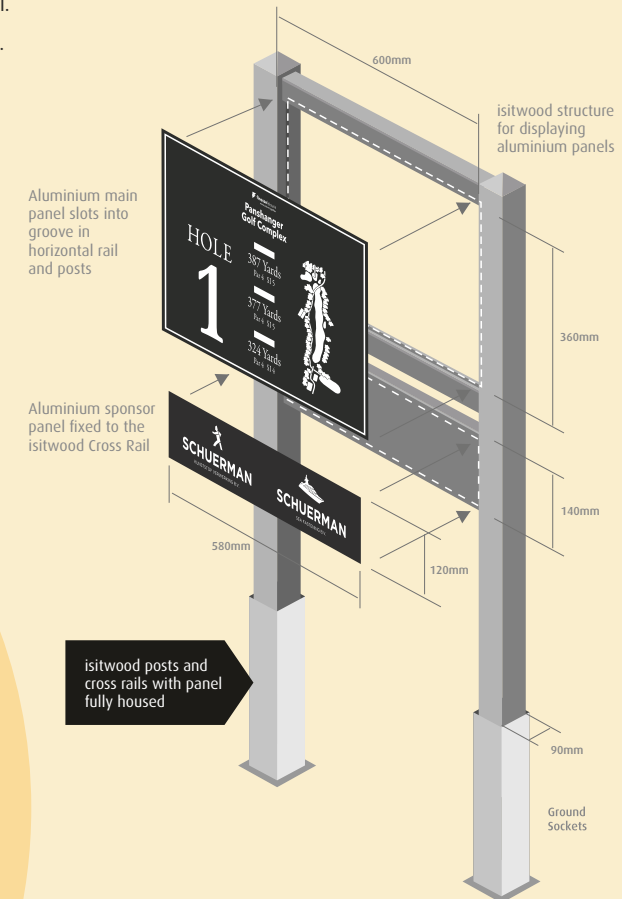

An alternative that offers the look and feel of real timber, but with the low maintenance properties that comes with this Wood Plastic Composite.

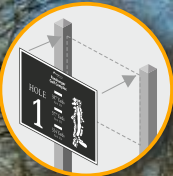

A highly durable product made from sustainable sources, you never need to worry about sanding, staining or painting.

In addition to these qualities, it also is the most cost effective Timber style product available.

Isitwood Classic Twin Post Tee Sign

Contemporary & classic
by design

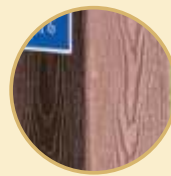

Looking for a timber influence but with a modern flavour, the new isitwood classic range does just that.

These isitwood tee signs are available as standard with a range of shaped tops. Panels are manufactured as standard in ultra strong black HDPE board with a printed/matt laminated graphic panel applied into a recess.

Other sizes are available on request.

Recycled Plastic Twin Post Tee Sign

Do your bit for our environment...

Recycled Plastic structure with all text and graphics produced in UV stabilised ink-jet format on aluminium.

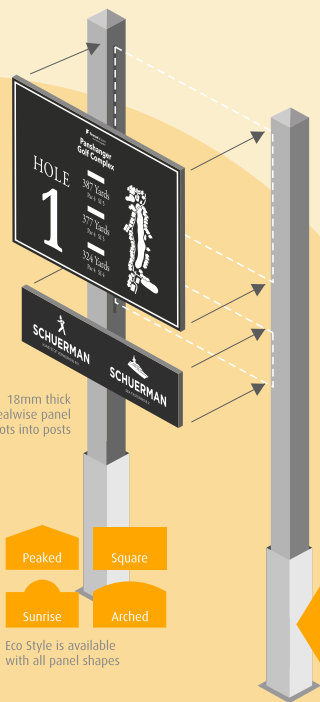

Available with a Square or Peaked top in the standard product. With a panel width of 600mm. Other sizes available on request.

Recycled Plastic posts and cross rails with a flat aluminium panel. Graphics are produced using UV stabilised ink jet format.

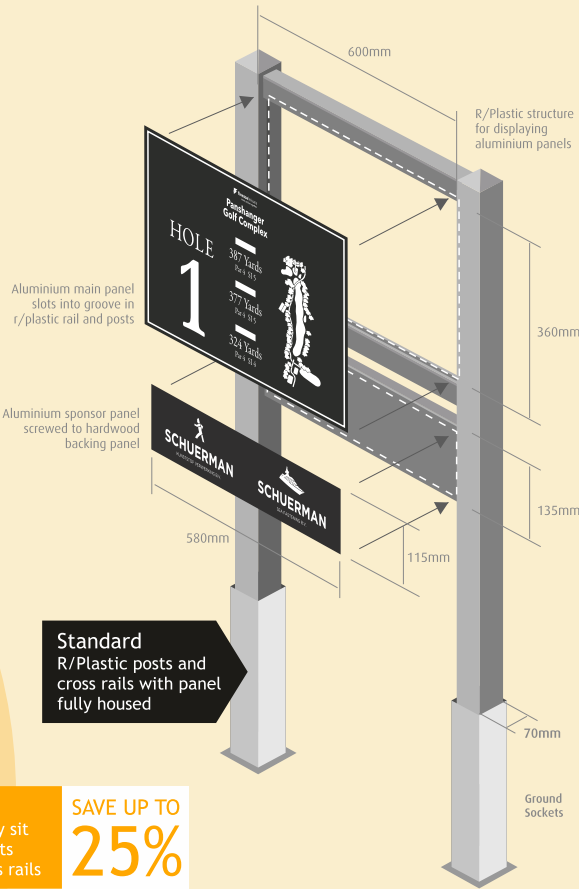

This superb tee sign is again very popular for use on large sponsorship packages.

Although mainly developed for its environmentally friendly appeal, this tee sign is also a very attractive option in its own right, projecting quality.

The product is very low-maintenance

First impressions are extremely important in any situation, no more so than on a golf course.

Ken White Signs can design and manufacture a sign to suit any environment. Explore the full range of materials, from; WPC (Isitwood), timber, alloy, stainless steel, bronze, cedar, stone and much more.

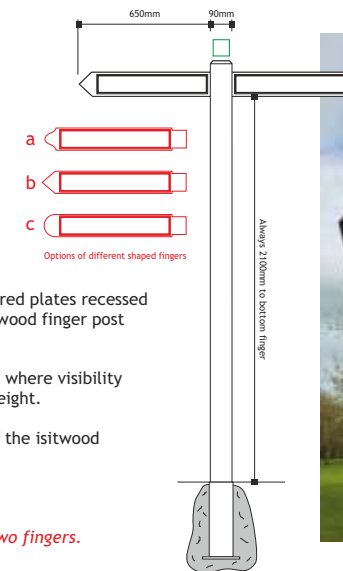

Beautifully designed and manufactured to suit your bespoke requirements, we will work with you to create a solution that both complements your environment perfectly, as well as being effective and informative.

- Course Maps
- Clocks
- Notice Boards & Poster Cases
- Interchangeable Panels

Isitwood Finger Post with Plates (IW/001)

Textured Aluminium Textured plates recessed into BOTH SIDES of an isitwood finger post structure.

Ideal for use in busy areas where visibility needs to be above head height.

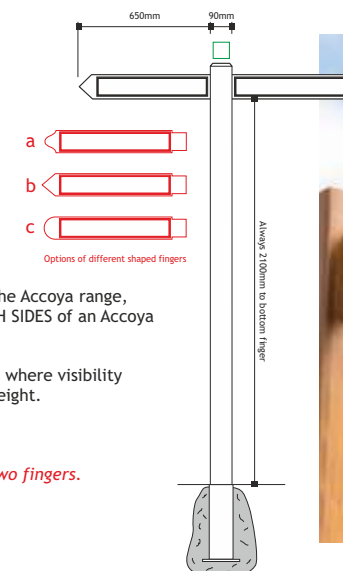

A superb partner for all of the isitwood products.

Post sleeve is available.

Comes as standard with two fingers.

Accoya Finger Post with Plates (AC/001)

Compliments the rest of the Accoya range, supplied with plates BOTH SIDES of an Accoya finger post structure.

Ideal for use in busy areas where visibility needs to be above head height.

Post sleeve is available.

Comes as standard with two fingers.

Cast Bronze Mow Over Markers

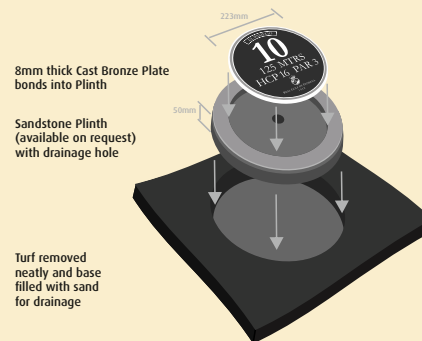

Circular Bronze Mow Over Tee Marker (CB/001)

Cast bronze mow over marker disk.

Ideal mow over option. The strong and robust style of the cast bronze ensures there won't be any long term damage.

The bronze plaque will need to be maintained in order to keep the surface clear and legible.

Can be supplied on its own or assembled into a sandstone plinth ready for simple placement in to concrete foundation.

Also available in other sizes

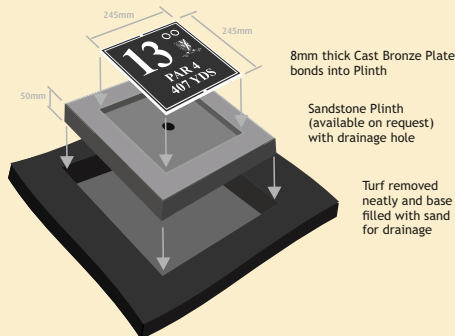

Square Bronze Mow Over Tee Marker (CB/002)

Cast bronze mow over marker plaque.

Ideal mow over option. The strong and robust style of the cast bronze ensures there won't be any long term damage.

The bronze plaque will need to be maintained in order to keep the surface clear and legible.

Can be supplied on its own or assembled into a sandstone plinth ready for simple placement in to concrete foundation.

Also available in other sizes

Granite Mow Over Markers

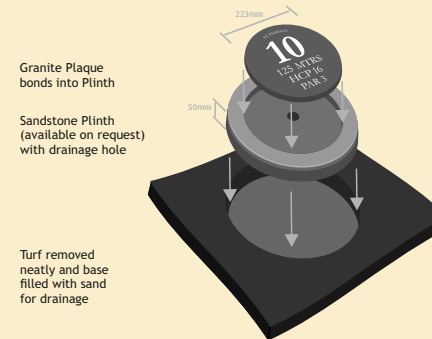

Circular Granite Mow Over Tee Marker (GM001)

Granite disk with all text and graphics engraved and filled. Ideal mow over option. The strong and robust style of the natural granite ensures there won't be any long term maintenance issues.

The granite plaque will not need to be maintained as much as the bronze option in order to keep the surface clear and legible.

Product is supplied complete with insert in rear and threaded bar for placement in to concrete foundation.

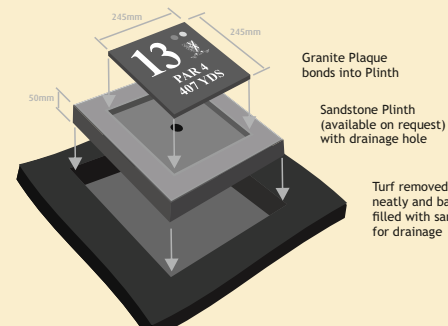

Square Granite Mow Over Tee Marker (GM002)

Granite plaque with all text and graphics engraved and filled. Ideal mow over option. The strong and robust style of the natural granite ensures there won't be any long term maintenance issues.

The granite plaque will not need to be maintained as much as the bronze option in order to keep the surface clear and legible.

Product is supplied complete with insert in rear and threaded bar for placement in to concrete foundation.

With nearly 60 years of working within the vehicle livery sector, it is still one of the most effective and cost-efficient ways we can help you to increase visibility and enhance a brand presence at your course and within the area.

We can design, print and apply your brand/image to any vehicle, from golf buggies, mowers & other equipment, to the golf professional car.

In and Around the Clubhouse

We offer a complete bespoke solution for your golf club interior.

Signage is far more than just a decorative element, it's a silent ambassador that welcomes guests and shapes their experience from the moment they arrive.

From the logo at the entrance to the subtle room names and numbers in the hallways, every sign is a chance to express your golf courses personality.

Cohesive, well-designed signage reinforces your brand identity, setting you apart.

Case Study

Golf Club d'Hulencourt

The renowned Golf Club d'Hulencourt, Belgium approached us in 2020 to enhance its brand identity with high-quality, durable signage. Working closely with the club, we brought their premium vision to life, creating a flagship signage project that balanced aesthetics with functional durability.

Using innovative metal fabrication, we crafted visually striking totems - a standout feature across the course. Each sign, made from precision-engineered, powder-coated aluminium, was built to withstand outdoor conditions while blending seamlessly into the club's landscape.

To achieve a premium look throughout, we used laser-cut acrylic, carefully bonded to create a raised effect reminiscent of high-end automotive emblems. For adaptable signage, we designed a custom modular finger post system with adjustable components, allowing for easy updates without compromising design cohesion.

We're very proud of the completed signage, which not only challenged our team's skills but exceeded client expectations, reflecting our commitment to quality, precision, and innovative design.

Case Study

The Mole Resort

Set in 25 acres of Devonshire countryside, The Mole Resort combines luxury accommodations with a 9-hole golf course and a range of year-round outdoor activities.

Our partnership began with golf tee signage and expanded to include resort-wide signage and lighting. A standout feature is our proprietary low-maintenance Isitwood - a wood-plastic composite that mimics hardwood, reducing upkeep while enhancing the resort's aesthetic.

The project includes striking entrance signs with solar-powered lighting, wayfinding systems, and an Isitwood LED bollard-lined driveway, creating a welcoming, illuminated entry.

Our collaboration with The Mole Resort remains dynamic, with ongoing updates to maintain the resort's consistent brand image and distinctive charm.

“

Having approached Ken White Signs at the early stages of the project, they soon became a trusted supplier of The Mole Resort. Always helpful and patient within the design phase and very timely and responsive in providing mock-ups and quotes. The quality of the product and service was absolutely fantastic, and nothing was too much trouble, we would have no hesitation in referring these to other people who have a wide and varied signage project on their hands.
