Another successful concrete cutting and demolition package completed.

We were tasked with removing four sections of concrete to enlarge an existing opening within a 150mm deep ground-bearing slab. The works were carried out using a 3-phase floor saw to precisely isolate the areas, followed by controlled breakout using a Husqvarna DXR145 demolition robot.

Precision cutting, controlled demolition, and safe execution delivered throughout.

“

You guys have been great. Darren, your operative, has worked with us around quite a few challenges so thanks for that, credit to him. We will definitely be in touch for the next one. Thanks again I'm very satisfied with the work
