“The planterware range gave us exactly the quality and choice we were looking for... it’s just the result we expected from amberol.”

Cheri Owens, Purchasing Manager, Europlanters Limited.

Welcome to the planterware by **amberol** product range.

Planterware by Amberol planters look as authentic as any natural product. Seeing really is believing! So often plants are displayed in uninteresting plant pots. Planterware by Amberol provides an enormous range of stylish elegant containers in a truly astonishing range of colours that quite literally allows you to put plants in the container they would choose for themselves. Over 50 different sizes in many different designs and virtually any colour you can imagine. They are lightweight, strong, durable and above all frost resistant.

Planterware by Amberol products look stunning in almost every indoor or outdoor environment. It is a range that will enhance and complement the décor of any room, office, hotel lobby or external entrance. Combining cutting-edge Italian designs with quality state of the art British manufacturing, all Planterware by Amberol products are manufactured to exacting ISO9001:2008 standards. Our well trained friendly and professional staff will help you before and after your order is placed. And if for some reason you are not fully satisfied with your product, we'll put wrongs right without quibble.

That's guaranteed!

Our values.

Amberol is a family company and we pride ourselves on our world-class reputation for high quality production values and innovative product ranges. Amberol's trading philosophy and journey to success is built on firm and lasting values. With over 40 years trading Amberol has become the UK's leading manufacturer and seller of self-watering planters and environmental waste and recycling bins, made in Britain at their purpose built plant in the heart of beautiful Derbyshire.

As an Amberol customer you can be confident of working with an established supplier who listens to and understands your needs. Our aim is to strive for product excellence and totally satisfied customers.

Special products for special places. Classy, authentic designs for more traditional settings of substance and character. Planterware can be used inside or out.

For:

Interior designers and Architects
Landscape architects
Film studios
Local and National Heritage venues and sites.

“We have had many comments from visitors about how authentic the units look. Many people are unable to tell that they are plastic, until they touch them! ‘Why fight nature’ - if terracotta will not survive the harsh Scottish winters, why not use something different - Planterware fits the bill perfectly.”

Gordon Thomson
Head Gardener, Fyvie Castle.

Personalised colour chart

There are 18 standard colours to choose from in the planterware range. This allows you to match, compliment, colour-zone and co-ordinate according to your interior decor, organisation's identity or any marketing or sponsorship requirements. If you can't see the colour you prefer, for an extra fee you can specify a colour of your choice.

Technical Specifications:

General Information

Method of Manufacture	Rotationally moulded (rotomoulded) to ISO9000 quality assurance criteria. Rotational moulding is a low-pressure, low-temperature, highly energy-efficient method of manufacture.
Material	High-performance linear olefin-copolymer, with narrow molecular weight distribution. It is simply the toughest material available and gives the maximum resistance to impact, frost, ultraviolet light and temperature extremes. Base polymer is UV-stabilised and complies with US FDA regulation 121.2501.
Ecology note	Our rotomoulded products will give a lifetime of enjoyment or work, but they are fully re-cyclable, if necessary. We re-cycle all of our own production waste.
Flame Retardency	See Flammability Section

Typical Material Performance

	ASTM Test Method	Values SI Units	Standard Units
Environmental Stress Crack Resistance	D1693	F50-20h	F50-20h
Stiffness	D747	552 Mpa	80,000 psi
Tensile yield 50mm/min	D638	18 Mpa	2600 psi
Tensile yield 500mm/min	D638	24 Mpa	3400 psi
Tensile Impact	D1822	12 J/cm ²	55 ft lb/in ²
Brittleness Temperature	D746	<-70°C	<-94°F
Softening Point (Vicat)	D1525	118°C	245°F
