# Amberveil

designed to define  
your outdoor  
spaces with nature

Amberol's new living screen, the Amberveil, has been designed to enhance outdoor spaces by creating naturally private seating environments and adding greenery where planting may be limited.

Available in a variety of heights and planter options, Amberveil offers a low-maintenance solution that encourages connection with nature while delivering a premium aesthetic. Incorporating our Aquafeed™ Self-Watering System.

# The Aquafeed™ Self-Watering System

Amberol pioneered and developed a unique Self-Watering System called Aquafeed™

A series of high capacity capillary action wicks “suck” water up from a sub-soil water reservoir onto a dispersal mat. This dispersal matting distributes the water evenly to the compost overlaying it, keeping it optimally moist at all times.

As a result, evaporation is kept to a minimum and plant roots absorb only the water they

need, thereby keeping plants healthy and strong for longer. The Self-Watering Amberveil needs only be topped up once or twice a week.

Aquafeed™ helps to save precious water resources. You also save considerable amounts of time and money because unlike traditional baskets they don't need watering daily.

## The art of shaping spaces with nature

Whether you choose to call it a living screen, green screen or vertical garden, the Amberveil brings nature into the heart of outdoor environments. These natural partitions create a calm and welcoming atmosphere ideal for hospitality terraces, schools, community spaces, and urban seating zones.

Arranged individually or grouped together, Amberveil increases green

space, supports biodiversity, improves air quality and reduces ambient temperatures helping people to feel more comfortable and connected outdoors.

Create places for conversation and wellbeing, from intimate dining areas to “buddy benches” with the integrated benches, where children can relax and form friendships.

## Specification

The Amberveil screens are available in widths of 1.2m and heights of 0.6m, 1.0m, 1.55m, and 1.8m with planters measuring 1.4m long x 0.5m wide x 0.55m high.

### Single planter

1.4m long x 0.5m wide x 0.55m high

### Single sided bench seating planter

1.4m long x 0.96m wide x 0.55m high

### Double sided bench seating planter

1.4m long x 1.42m wide x 0.55m high

## Fixings

Ground fixings and benches are easy to secure with stainless steel brackets, ensuring stability in any setting.

Designed and manufactured in the UK, the Amberveil can be manufactured from up to 100% recycled\* materials and is available in a wide range of standard colours, we also have the facility to match\* colours precisely, to reinforce your brand image.

\*Subject to product, colour and availability

# Low maintenance, engineered for ease

- Built from durable polyethylene (LLDPE), the planters are tough enough for communal areas yet lightweight enough for handling.
- Integral pallet truck slots to simplify movement, and are stackable

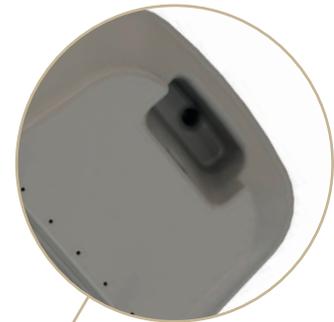

Water filling point both ends of the planter, diameter 22mm.

Ground fixings, 4x stainless steel brackets and washers with Hex head concrete screws. The slotted brackets fit in a moulded recess each end of the planter, benches are secured in the same way.

Each handle recess has a cone as a water overflow feature. This is just above the inside base level of the planter and prevents overflowing. This means any overflowing water does not leave a water mark on the visible sides of the planter.

Close up of threaded drain plug in the handle recess for emptying water from the planter when it's moved or stored.

Our aim is to make a visible difference in every city, town and village across the country. This not only includes beautiful floral displays but also recycling bins, litter bins and our recycled plastic 'Benches by Amberol' range.
