Shutters To Suit Your Lifestyle

But who is ShutterMan?

ShutterMan was established in 2017 by Nathan Clarke to manufacture and fit high quality interior shutters, whilst maintaining full control over the design and installation processes.

Equally important was the concept of all-encompassing personal service: in Nathan's words, *'doing things the way we would want them done if we were our customers'*. From the start, that ethos has been central to the ShutterMan philosophy. In fact all of our shutters are manufactured with the attention to detail equal to that found in quality furniture.

Shutter Experience

Prior to setting up ShutterMan, Nathan has worked for many years with a number of shutter and blind manufacturers, and was the UK's first Dealer Sales Manager to introduce millimetre perfect manufactured shutters to the UK market.

Attention To Detail

Proud of every job we do, we consider nothing complete unless the client is absolutely satisfied.

In fact our attention to detail and client-focused approach earned a place in the rigorously-monitored Trading Standards' 'Buy with Confidence' scheme. We are so proud of the things people say about our services, that we have included a number of unprovoked testimonials within this brochure.

The service we received from your team at ShutterMan was second to none. Polite and professional and very clean - the fitter even bought in his own vacuum cleaner! We are very pleased with the precision finishing fit of the shutters and they look wonderful in our 1903 window frames. Our neighbours are already creating an interest and we will certainly be giving your company our highest recommendations. Thanks once again.

Your Home Deserves That Extra WOW Factor!

The benefits of shutters

See The Light And Choose

The classic clean lines of lifestyle interior window shutters blend seamlessly with both modern and period properties to create a warm, friendly and welcoming atmosphere to any home.

With multiple window design considerations available shutters give you fingertip control of light, ventilation and privacy.

Our innovations in shutter design technology, combined with the best construction techniques in wood working bring together permanent UV protection and considerable improvements in energy efficiency.

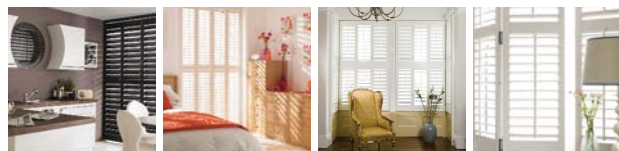

Interior Plantation Shutters Will...

- keep your rooms cooler by re-directing direct sunlight - up to 12.6 degrees cooler home throughout summer
- increase your home's energy efficiency by significantly improving insulation - 40% warmer rooms during winter
- reduce carpet and furnishing fading from UV rays
- notably improve the soundproofing within your home
- provide a lifetime of use!

By using our customisable window shutter framework you'll achieve greater security for your property, and make your rooms look bigger and brighter, creating a greater sense of depth to your interiors.

You'll also eradicate expensive dry cleaning bills and shield valuable possessions from prying eyes, whilst simultaneously reduce outside noise.

Beautiful Quality -Immaculate Styling -Local Expertise

I am delighted with my shutters and was extremely impressed with the speed of installation and quality of the installers handiwork. We love them and I hope that you will shortly hear from my niece who is thinking of installing shutters.

Mrs A Rose
Sussex

Our shutters will...

offer excellent insulation properties

make rooms look bigger and brighter

improve soundproofing

maximise the control of natural light

offer maximum privacy

create a sleek, cool, clean and modern look

Made To Measure Distinctive Craftsmanship

Technology and quality

To ensure your interior window shutters look, function and feel as good in 20 years time, as they do on the day of your installation, three major things are required;

Extra Strong Joint Construction

Regarded as the strongest joints in woodworking mortice and tenon joints are utilised in all our interior shutter collections. The joint is very strong, concealed and offers a large surface area for gluing so it cannot twist - it's used in all furniture construction where the highest quality finish is required.

Extra Strong Shutter Framework

Eliminate bowing and twisting over time, as the biscuit technology employed in the vertical stiles of Lifestyle shutters restricts movement to less than 2mm over a 20 year period. Magnetic closure of your shutters eliminates this further.

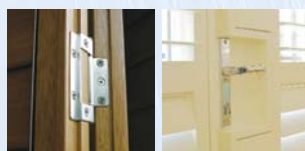

In addition, easy closure and maximum light blockage is achieved by rebating the inner and outer stiles of the window shutters.

Enhanced UV Protection

A quality spray finish is even more important than colour.

Painted shutters follow an eleven stage multi-coat finishing process. Every unit is sealed, sanded, primed, re-sanded, primed again colour finished twice and covered with two satin finish clear UV protective top coats.

The ShutterMan way of making window shutters built for a lifetime of use.

I have to say the shutters look fantastic (even nicer than expected) and Nathan fitted them really well. Our cottage is over 350 years old and so the windows are small with each wall/part ceiling of the windows NOT straight and off centre in their own peculiar way. Nathan however, was not to be put off and despite his having to be very patient (it took hours - poor thing!) he got them to fit exactly level and square. He was pleasant and polite at all times as well. We can't praise him highly enough!

- Traditional rod louvers
- Offset rod louvers
- Contemporary hidden rods
- Remote Operation

Solid Panel Shutters

Solid raised panel shutters are specially designed to resemble original Victorian Regency style solid shutters, historically made from pine. They retro-fit and blend beautifully with period room

features or with traditional, existing solid wood shutters.

From their earliest days, solid wood panel shutters improve insulation from noise, privacy from neighbours and introduce increased security.

Our shutters are manufactured with wider stiles for increased joint strength and rebated panel edges to block the vertical light gap where the shutters are hinged

together and so achieve a virtual 'blackout'.

Advanced Blackout Shutters

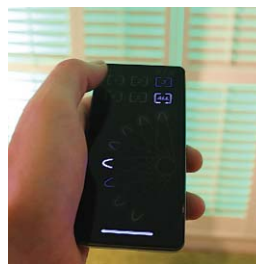

Enjoy a fantastic night's sleep with 100% blackout for your bedrooms. A specially designed blackout pleated

blind - inbuilt within your shutter framework makes them perfect for children's nursery's and night workers.

- Eliminate glare from streetlights
- Keep children's bedrooms dark
- Shield precious possessions

Advanced Remote Controls

Infinite control of light without even leaving your seat... with solar powered shutters. One touch of your remote rotates the louvres in unison to precisely set the angle for each shutter.

- No hard wiring
- Virtually silent, low voltage motors power effortlessly
- Radio controls offer 8 tilt positions with 3 band widths
- Perfect for hard to reach windows

Conservatory Specialists

Transform your conservatory into a comfortable and stylish living space you can enjoy all year, using shutters and blinds to add colour, style and effective temperature control. Practical and stylish - a perfect combination.

Better still, you'll prevent direct sunlight damaging furniture as easy control of your shutters redirects harmful UV rays

away from possessions, without depriving your conservatory of natural light.

Plantation shutters and conservatory blinds give your conservatory a degree of flexibility, simply not possible with other shading options.

I love my new shutters, they fit and glide along beautifully, in fact, we will be contacting you again as we would like them in the spare rooms as well. Our bedroom looks so much bigger & brighter - I love them! THANK YOU

Shutter Blinds

Unleash personal expression with bespoke blinds brimming with character.

Aluminium Blinds

Low cost, stylish, versatile and practical

Make the most of your outdoor living space

Awnings increase the potential time available for you to unwind, and will keep you cool on the hottest days. You can also enjoy the fresh air, using your patio when the weather is less than perfect, so it becomes a proper extension to your home. Awnings help protect carpets and soft furnishings from fading, as well as precious plants from drying out in really hot weather.

Thank you for your emailed written guarantee. We are very pleased with our shutters and we have passed on your name to several people, so hopefully you'll achieve a sale from these appointments. We hope to have another window done in the future and we look forward to speaking to you again soon.
