

FIRE DOOR REMEDIAL REPAIRS

Restoring Fire Doors to Full Compliance

A fire door that has been damaged, incorrectly installed or inadequately maintained may fail to provide its rated fire resistance. OCD FM provides a comprehensive fire door remedial repair service, restoring doors to full compliance without the need for full replacement where possible.

What We Do

Following an inspection or FDRA report, our approved technicians address defects in fire doors across commercial, industrial, educational and residential properties.

Repair works include replacing intumescent and smoke seals, adjusting self-closing devices, correcting hinges and ironmongery, repairing door leaves and frames, and restoring correct door gaps.

All remedial works are carried out by trained approved fire door installers and are fully documented, with certification provided on completion.

Where a door cannot be economically repaired, we provide clear guidance and can arrange supply and installation of a compliant replacement.

Key Benefits

- Cost-effective alternative to full door replacement where appropriate
- Carried out by approved fire door installers
- All works documented and certificated on completion
- Restores full fire and smoke resistance ratings
- Rapid response available for urgent compliance issues
- Suitable for HMOs, offices, schools, hospitals and residential blocks

Why Choose OCD FM?

Highly experienced, fully qualified fire safety professionals delivering the highest standards of service.

Fully compliant with all current legislative and regulatory standards, giving you complete peace of mind.

Latest technology for efficient service delivery, cost reduction and real-time management information.

Covering all sectors across England: commercial, residential, healthcare, education, hospitality and industrial.
