

FIRE ALARM INSTALLATION & MAINTENANCE

Compliant Fire Detection Systems — Protecting People and Property

A functioning fire alarm system is central to any building's fire safety strategy. OCD FM provides comprehensive fire alarm installation and maintenance services for commercial, industrial, educational and residential properties, ensuring your system is always fully operational and compliant with current legislation.

What We Do

Our qualified engineers conduct a detailed site survey assessing your property's fire alarm requirements, taking into account current legislation, occupancy type and building layout before designing the most appropriate system.

We design, install, commission and maintain fire alarm systems to the highest standards in full compliance with BS 5839. For new builds we work alongside architects and contractors from the outset.

We provide maintenance and servicing contracts for existing fire alarm systems, carrying out regular inspections and tests to ensure ongoing compliance and optimal performance.

Following every visit you receive a detailed service report confirming the system's compliance status and any recommended actions.

Key Benefits

- Full design, installation and commissioning by qualified engineers
- Compliance with BS 5839 and all relevant fire safety legislation
- Regular maintenance contracts ensuring ongoing system performance
- Rapid-response call-out for system faults
- Covering commercial, industrial, educational and residential properties
- Detailed service reports provided after every visit

Why Choose OCD FM?

Highly experienced, fully qualified fire safety professionals delivering the highest standards of service.

Fully compliant with all current legislative and regulatory standards, giving you complete peace of mind.

Latest technology for efficient service delivery, cost reduction and real-time management information.

Covering all sectors across England: commercial, residential, healthcare, education, hospitality and industrial.
