

North West Security Services Ltd

2026 BROCHURE

WHO WE ARE

North West Security Services Ltd is a UK-wide provider of **Electrical, Fire, Security, and Telecom services**, delivering **high-quality, reliable, and fully bespoke solutions** to clients across a wide range of sectors.

We pride ourselves on:

- Engineering excellence
- Compliance-led delivery
- Long-term client partnerships
- A genuinely bespoke, one-to-one service approach

OUR APPROACH

Every client, site, and operational environment is different. Our approach is therefore **entirely bespoke**, ensuring solutions are tailored precisely to your requirements.

We provide:

- Dedicated one-to-one client support
- Tailored system design aligned to operational needs
- Scalable solutions for single or multi-site estates
- Full lifecycle support from design through to long-term maintenance

Our focus is not just installation, but **long-term performance, compliance, and reliability.**

END-TO-END SERVICE DELIVERY

Across all service areas, we offer complete lifecycle support:

- Design & consultancy
- Installation & commissioning
- Testing & inspection
- Routine service and maintenance contracts
- Compliance verification and reporting
- Reactive and emergency support

This ensures all systems remain **safe, compliant, and fully operational** throughout their working life.

ELECTRICAL SERVICES

We deliver a full spectrum of commercial and industrial electrical services, from installations and upgrades through to bespoke, high-end LED installations. We work closely with our clients to provide reliable, high-quality solutions, all delivered in line with current UK regulations and best practice.

FIRE DETECTION & LIFE SAFETY

Our fire services are delivered with safety and compliance as the priority:

- Fire alarm system design, installation, and maintenance
- Routine testing, inspection, and compliance reporting
- Life safety systems for complex and high-risk environments
- Planned maintenance contracts

We work closely with clients to ensure **full legal compliance and occupant safety.**

SECURITY SYSTEMS

- CCTV Systems
- Thermal Imaging Systems
- Access Control Systems
- Intruder Alarm Systems
- Perimeter Protection Systems
- ANPR & Traffic Systems

Our approach is based on layered, comprehensive protection rather than a one-size-fits-all solution. Every system is bespoke, designed specifically for each site following detailed threat and risk assessments, and integrated seamlessly with existing infrastructure and day-to-day operations. From single asset installations to multi-site enterprise solutions, we deliver compliant, insurance-approved systems that provide reliable protection and peace of mind. We are accredited to provide direct police response in accordance with BS 8243.

REMOTE MONITORING & RESPONSE

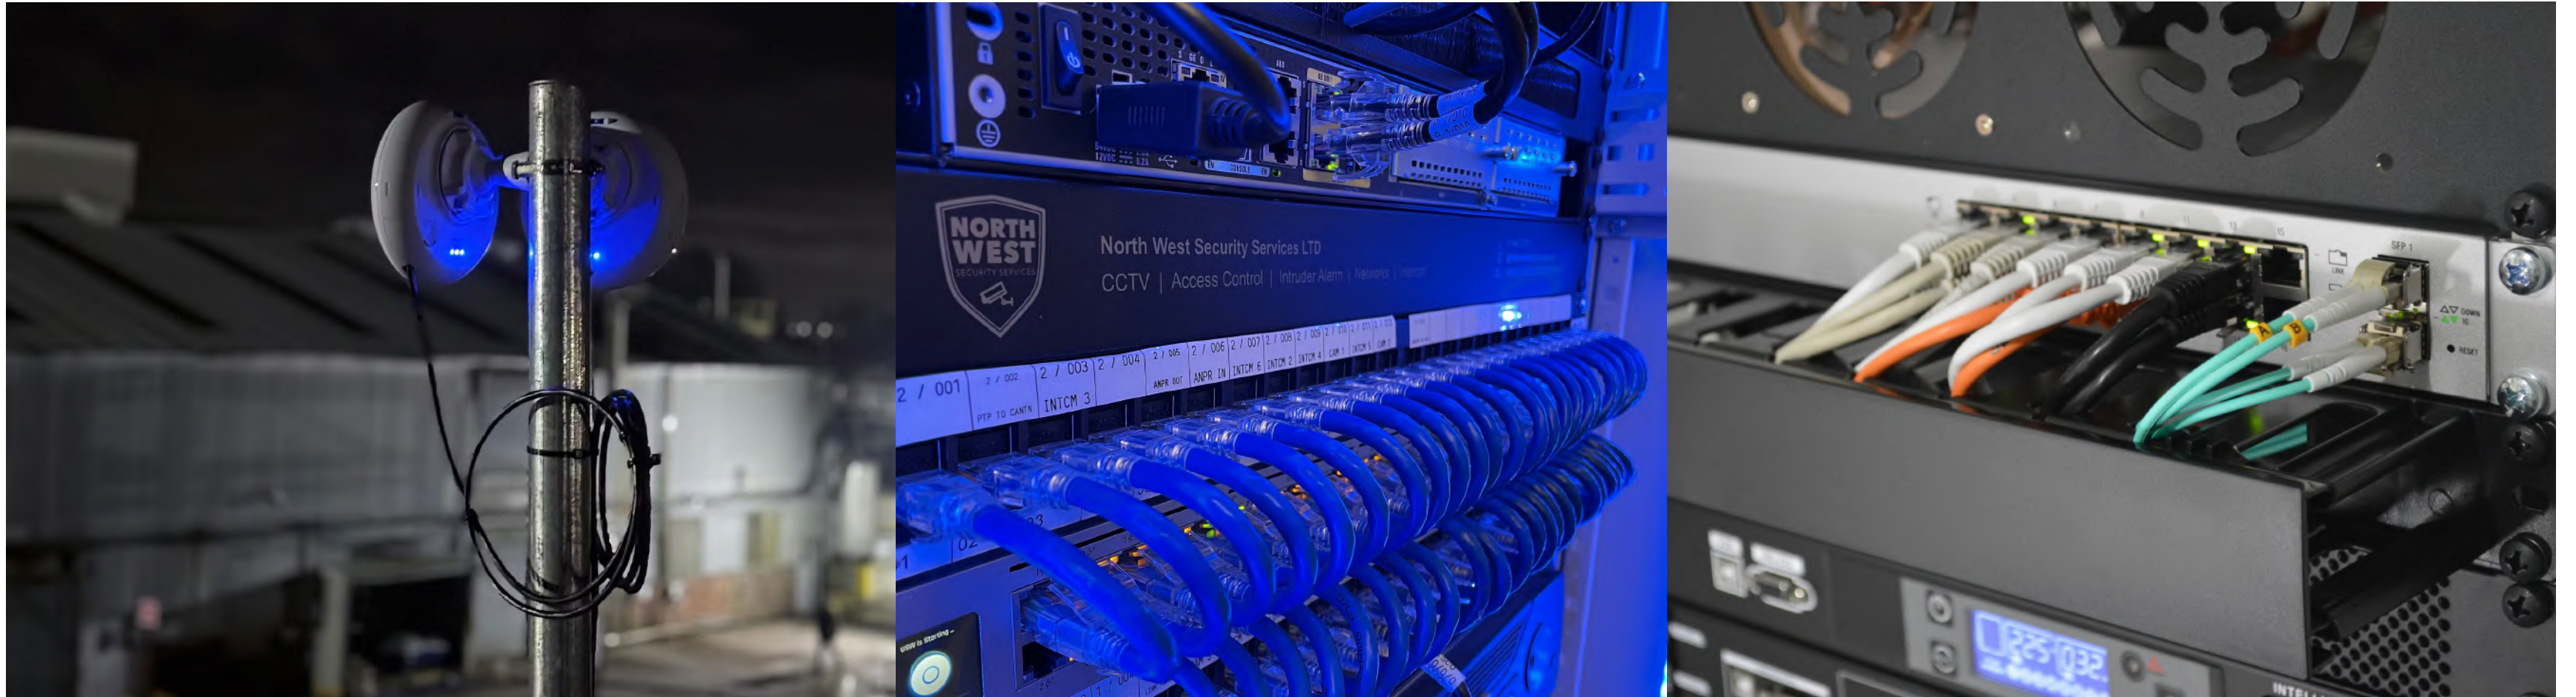

Our monitoring and response services are designed to provide complete peace of mind, offering 24/7 remote CCTV and alarm monitoring, with police response and rapid private security response available as options where required. We also integrate audio tannoy systems, enabling the control room to issue live verbal warnings and deter potential threats before they escalate. This proactive approach allows clients to move from reactive security to intelligent, preventative risk management.

TEMPORARY & RAPID DEPLOYMENT SOLUTIONS

We offer flexible temporary security solutions for short-term or evolving sites, including mobile remote CCTV towers and pods, temporary perimeter protection systems and rapid-deployment security solutions. Our systems can be deployed in under one hour and are ideal for sites where amenities such as power or connectivity are unavailable. They provide a highly effective and cost-efficient alternative to traditional security methods like manned guarding, delivering enhanced coverage, faster response and a higher level of protection at a significantly reduced cost.

TELECOMS, NETWORKS & CONNECTIVITY

Our telecoms and networking services include structured fibre and copper cabling, robust network infrastructure, fully managed Wi-Fi solutions, wireless point-to-point and mesh networks, and satellite internet for remote or challenging locations. We also provide ongoing network management and support, delivering resilient, reliable connectivity solutions where traditional infrastructure is limited or not viable.

AUTOMATIC GATES, BARRIERS & TURNSTILES

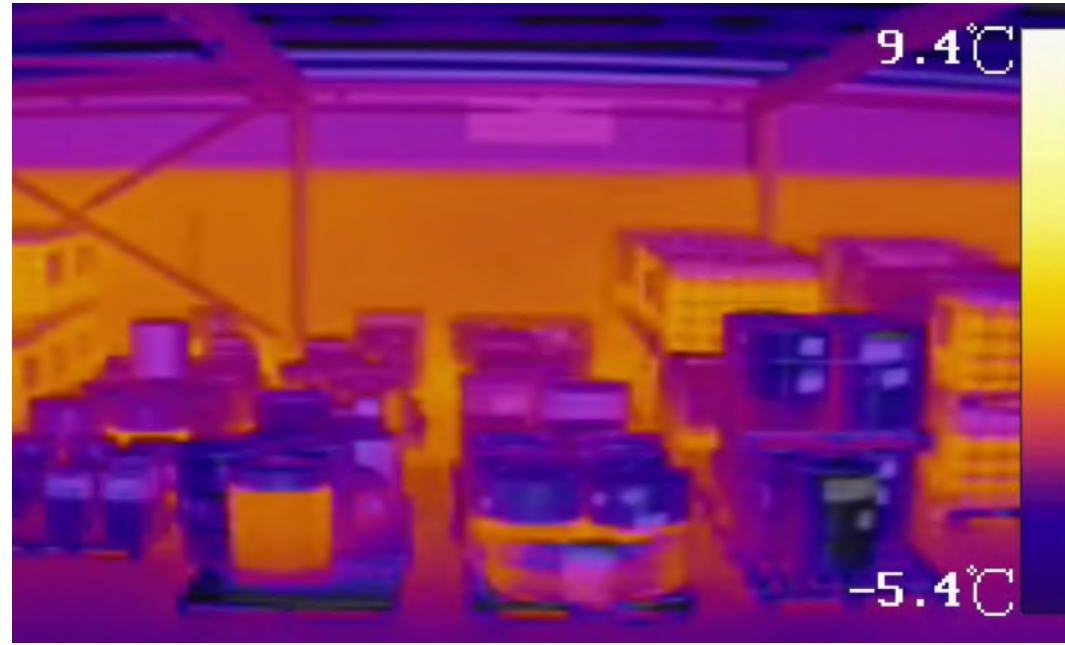

We operate across a wide range of sectors, including residential, commercial and industrial environments. In particular, we have specialist expertise within the industrial and environmental waste sector, delivering services across UK sites that operate under strict health and safety requirements and within hazardous and controlled environments.

SPECIALIST SOLUTIONS FOR HAZARDOUS & HIGH-RISK SITES

THERMAL MONITORING

Thermal imaging system providing continuous monitoring of a flammable storage facility within a hazardous waste transfer station.

ATEX RATED ENVIRONMENTS

ATEX-rated camera installed to monitor an ATEX-rated drumming line within a lower-tier COMAH registered chemical storage facility.

COMPLETE ELECTRICAL PACKAGE FOR BACKSTREET GYM

ELECTRICAL • PLANT ROOMS • LIGHTING • AUDIO • SPA FACILITIES • NETWORK, INTERNET & WI-FI • EMERGENCY LIGHTING • CCTV • FIRE ALARM

PROVEN LARGE-SCALE PROJECT DELIVERY

March 2021

NHS England - Bradford Royal Infirmary and St Luke's Hospital

Delivery of a large-scale access control solution covering **over 300 access-controlled doors** across complex, live hospital environments, operating within highly regulated healthcare settings.

May 2022

HM Government - The Coal Authority

Successful delivery of a **100-door access control project**, meeting strict government security, compliance and operational requirements.

August 2023

Qualichem Ltd - 15 Acre Chemical Waste Facility

Delivery of a large-scale CCTV and perimeter detection system, incorporating over 50 detectors across a 62,000 m² chemical waste facility. The project also included the deployment of temporary mobile CCTV tower security with remote monitoring during the site acquisition phase, ensuring continuous protection and risk mitigation throughout the transition period.

ACCREDITATIONS & COMPLIANCE

We operate to the highest industry standards, holding **NSI Gold accreditation** for over five years and **CHAS accreditation**, with management systems certified to **ISO 9001**. All staff are rigorously screened and vetted in accordance with **BS7858**, supported by continuous training and ongoing competency assessments to ensure the highest levels of professionalism and performance. We are fully compliant with all relevant British Standards and UK legislation, and are fully insured with **£10 million liability cover**. All works are delivered with complete documentation and full compliance verification, giving our clients total confidence in our people, processes and delivery.

WHY CHOOSE US

01

Bespoke, client-focused approach

Every solution is tailored to your site, risks and operational needs.

02

Multi-discipline expertise

Security, electrical, telecoms and networking delivered under one trusted provider.

03

UK-wide coverage

Consistent service delivery across single or multi-site operations nationwide.

04

Trusted long-term partnerships

Reliable delivery focused on protecting people and assets, not just installing systems.

05

Expertise where it matters most

Reliable delivery in challenging, high-risk and tightly regulated environments.
