

AI SEARCH VISIBILITY

YOUR CUSTOMERS ARE ASKING AI. IS IT RECOMMENDING YOU?

People ask ChatGPT “who’s the best plumber near me?” Google shows AI answers above the blue links. Miss them and you’re not ranking low — you’re invisible.

QUICK CHECK £247 · FULL AUDIT £497 · AUDIT + FIX £997 · RETAINER £497/MO

WHAT WE TEST

01	AI visibility	Real prompts your customers use, across ChatGPT, Perplexity, Google AI Overviews and Claude.
02	Citation readiness	Can AI actually quote you? Clear statements, attributed data, extractable insight.
03	Technical setup	Schema markup, robots.txt, llms.txt, site speed, mobile-readiness, structured data.
04	Content structure	FAQ coverage, heading hierarchy, answer density. Does your site answer directly?
05	Authority signals	NAP consistency, directory listings, review profiles, brand mentions across the web.
06	Competitor gaps	Where rivals get cited and you don’t, and which prompts they’re winning.

WHAT AN AUDIT ACTUALLY SURFACES

WHAT A GEO AUDIT ACTUALLY FINDS.

TESTED ACROSS CHATGPT, PERPLEXITY, GOOGLE AI OVERVIEWS, CLAUDE & GEMINI · DELIVERED IN 24 HRS

|----|--|---|
| 01 | Page one of Google, absent from ChatGPT | You rank, but AI never cites you. We find the missing schema and unextractable content keeping you out of the answer. |
| 02 | Your rival gets named, you don't | Perplexity recommends two competitors by name for your core service. We show which prompts they win, and why. |
| 03 | AI literally can't read your site | No structured data, no llms.txt, thin FAQ coverage. We pinpoint what's blocking retrieval, then fix it. |
